A personal word:

"I am fully aware of the fact, that without the nuclear whip and the biggest war of all times and without the most disastrous suffering from over population, contamination and climate change with all its consequences the people are never prepared to seek the genuine truth about humanity and the facts to the state of humanity and the planet. Let alone to take it seriously and to take consequences in ones personal life in order to show solidarity in the interest of a good future for people today and the future generations to come, the coming centuries and millenniums. It seems that the super rich and the powerful Elite of the western world have lost perspective that they will lose everything, absolutely everything and that their children will have nothing to inherit. Driven by blind lunacy, you will drag everything and everyone into the Armageddon. If you all don't want that, then talk to me! There is hope - however only through me! – Decide!"

Dr. Edward Schellhammer, RC

Introduction: The State of Humanity and the Earth

Warning: You may find the facts here offensive or disturbing. This information will change your life and thinking forever. You alone are responsible if you decide to read this document.

Millennium Manifesto: Perestroika Humanity

The state of most people around the globe, the societies around the world, is very bad: brainwashed, manipulated, narcissistic, arrogant, ignorant, superficial, neurotic, psychopathic, perverted, obsessed, infantile, stupid, stupefied, cowardly, hypocritical, gossipy, mendacious, stubborn, blinded, sightless, greedy, too lazy to learn, without discipline, lacking character, unable to think, self-opinionated and driven by consumption. Self-evidently there are exceptions.

The elite in most countries, especially in the capitalist coalition (in essence the Jewish-American-Israeli Elite) has created a disfigured and deformed human biomass out of humanity, in order to use it for their lunatic and psychotic means. The Soul of humanity is seriously ill to the core.

A massive global octopus, full of falseness, lies, misrepresentation, distortion, deadly poison, political and religious psychosis, perverse lust to kill of an indescribable and never before existing dimension and power, has got nearly the whole humanity in its iron grip. The global history since over 100 years is essentially very different from that what is portrayed in history books or taught in schools and universities.

The great majority of humanity suffers psychically: depression, anxiety, aggression, compulsion, guilt, psychosis, schizophrenia, sleeplessness, nervousity, obesity, despair, inferiority, lack of self-confidence, lack of love, hate, stubbornness, inner void, senselessness, hopelessness, alienation, mobbing, mistrust, addictions of all kind, neglect, behavioral problems, relationship problems, inability to love and to communicate, etc.

The majority of humanity suffers physically as a result of human-made factors: diseases and cancer due to contamination and pollution, victims of traffic accidents and fine dust, victims of catastrophes and climate change, victims of the ozone hole (skin cancer), suffering from work and environment stress, suffering from poverty, suicide and suicide attempts, constipation, anorexia and obesity, etc.

The majority of humanity suffers financially: exploitation of the workforce, distribution of wealth and income, poverty, unemployment, speculation of the banks and the taxes of the government, an estimated 65% of all taxes are lost due to misspending, political inefficiency, costs associated with catastrophes (climate change) and contamination (and pollution), costs due to the destruction of eco-systems, costs from the exorbitant armament and militarization, participation in wars, storage of nuclear waste (as well as the dismantling and storage of nuclear power stations in

the future), costs due to hotspots, interest payments and repayments of public debt, that are not even feasible over 200 years in many nations, etc.

The majority of humanity suffers spiritually-religiously: an archaic religion, that is characterized through neurosis, psychopathy, manipulation, fairy tales, myths, superstition, falsifications, lies, perversions, distortions, deceit, fantasies, legends, religious psychosis and an absolute inefficiency in terms of psychical-spiritual formation, love, Spirit and management of the inner and outer life.

The majority of humanity is psychically and spiritually completely deformed, mentally manipulated, self-alienated, enslaved and exploited. Whole nations are systematically lied to and seduced. Lies have replaced the truth. Lunacy and psychosis are the admired values in many societies. The adults destroy the future of their children! The earth is sliding towards the abyss. Politics, the economy, industry, media, education and religion have completely failed! Most leaders in many countries are hypocritical, cowardly, false and mendacious and act on the moral level of child molesters. The octopus celebrates its triumph.

Most nations have an incredible psychical-spiritual potential, to pave ways for solutions in their own countries and solutions for the huge global problems of humanity and the planet. Many nations have the moral and intellectual potential to build a new evolutionary and psychical-spiritual humaneness, rooted in the innermost of the soul and free from ideology and dogmatism. In order for the whole world to renew itself!

Woman! Man! 100 years at the mercy of the iron grip of this octopus, is it not enough? Man, woman wake up! Free yourself from the lethargy, the impotence and the chains of the horrendous lies and exploitation! Find your potential and your values again! Take action! You have many options:

- You need to find your healthy pride, your inner values, and your self-confidence.
- You must use the potential of the intelligence, love, the soul and the Spirit within.
- You must first find yourself, your genuine inner human being and your life.
- You must form, develop, balance, center yourself and become a unity.
- You must find the truth, the real facts and the genuine inner spiritual force.
- You must permanently educate yourself with relevant info (internet and books).
- You must convince others of the severity of the critical state and the dangers.
- You must improve your lifestyle in the interest of the inner values.
- You must develop local solutions together with others and do the best possible.
- You must take responsibility so that the potentials can breakthrough.
- You must unite with others in solidarity in clubs, networks and associations.
- You must accept that all this doesn't work without effort, time and costs.

The hopeful future begins with your renewal. A new humane life is needed. New forms of society and new ways of living are needed. A renewal of nations is needed. A new world is needed. A new political system is needed. A new, genuine form of democracy is needed! A new religion is needed: a humane religion and efficient spirituality, free from dogmatism and fundamentalism, founded within and built up from within with love and Spirit, with the highest values of the soul, the inner humaneness. And with that the Octopus can and must be completely eliminated.

This is the absolutely new, comprehensive catharsis and renewal in content, importance and dimension that has never before existed in humanity!

Read a lot! Learn in networked constellations! Carefully verify! Think thoroughly! Discuss seriously! Draw your consequences! Take on responsibility! Take efficient and balanced action! Report about the state in your country, discuss the facts and genuine human needs, unite and organize yourself with others on our forum.

This national and global renewal for the future of humanity is prepared and spiritually led with the Archetypes of the Soul and the new 10 Commandments.

▪ **An overview of the Mission**

The shocking truth about the state of humanity and the earth:

- The earth will completely collapse within 30-40 years.
- Humanity has got 7 years left to make drastic changes.
- There are solutions that can hinder this complete collapse.
- Only one man on this earth has these unique solutions.
- The total and all encompassing catharsis is essential.
- There is only one person that can manage this for humanity.

I will lead you and humanity to a new and good future within 20-25 years!

▪ **Kairos: It is high time for the top-to-bottom truth!**

- The truth has lost; Lies have taken its place.
- The real good has lost; it can never win by itself.
- Love has lost; the people are rotten to their core.
- Greed, fame, power and wealth have corrupted the people.
- Today perversion and lunacy have become mainstream in society.
- Religious psychosis has replaced the real psychical-spiritual path.

Most politicians and leaders in society lie to the people. They aren't telling them how bad it actually is with humanity and the earth as a whole. They aren't telling them how they have prepared for the "big final war". They aren't saying how the 9-10 billion people in 35-40 years will perish. They aren't saying how everything is contaminated and how all eco-systems are heavily damaged. They aren't saying how everything in politics, the economy and religion is corroded by falseness and lies and rotten so badly that it is on the verge of breaking.

- Politics, the economy, the industry, the education system, the media and the religions have completely failed! Humanity as a whole has failed!

▪ **We don't want hell on earth!**

☞ We don't want: Superficiality, life lies, cheats, falseness and hypocrisy.

- ☞ We don't want: Sick narcissism, stupidity, stubbornness, arrogance and ignorance.
- ☞ We don't want: Lunacy, megalomania, perversion, mega-greed and unscrupulousness.
- ☞ We don't want: People that poison humanity with their immorality.
- ☞ We don't want: Dogmatism, fundamentalism and religious psychosis.
- ☞ We don't want: Deceit, ensnarement, brainwashing and manipulation.
- ☞ We don't want: Exploitation of people as workforce and consumer robots.
- ☞ We don't want: Contamination, pollution, climate change and global destruction.
- ☞ We don't want: Poverty, misery, injustice, suffering, armament and war.
- ☞ We don't want: Excessive and possessed exploitation of natural resources.
- ☞ We don't want: An economy where 80% are poor and 0.1% is extremely rich.
- ☞ We don't want: Power that treats people and societies with devilish shame.
- ☞ We don't want: Enslavement through politics, industry, banks, economy and religion.
- ☞ We don't want: Fascism and dictatorship with their capitalistic "One World Order".
- ☞ We don't want: Oppression and allurement into neurotic spiritual meanders.
- ☞ We don't want: Humans to be treated like soulless human biomass.
- ☞ We don't want: Facades and masks that distort the true realities.
- ☞ We don't want: Nuclear energy that produces deadly waste at the cost of the future.
- ☞ We don't want: Over 200 chemical elements in the human body.
- ☞ We don't want: A future with poverty, unemployment, wars, cancer or dementia.
- ☞ We don't want: A society that misuses or violates the Archetypes of the Soul.

▪ We want Paradise on Earth!

We want a new world marked with: Truth, hope, love, happiness, health, genuine inner needs, authentic ways of living, inner fulfillment, understanding, stable work, economic balance, happy families, true friends, a healthy environment, constructive living environments for children and the youth, responsibility for the people in their "third age", truthfulness, thorough knowledge and thinking, strong people, constructive values and norms, inner rootedness, earnest orientation with meditation and dream interpretation, thorough self-realization, meaningful capabilities to master life, genuine inner meaning of life, and a spirituality, that is based on the Archetypes of the Soul.

Take responsibility for the real solution for the big problems of humanity and the earth! A completely new understanding about people and life is necessary! The mission of the global catharsis begins with every individual person.

Or do you want that blindness, stupidity, laziness, arrogance and ignorance together with the sick religious and political-economic lunacy leads humanity and the earth

into the Abyss? Do you want to let the sick minds of psychopathy and perversion of millions of people declare victory and bring about collective suicide?

I know, billions of people around the world need the most horrendous war and catastrophes of all times. This appears to have become indispensable and unavoidable. The 30-50% that will survive will then surely want the genuine psychical-spiritual catharsis, so that humanity will have a good future.

- The complete and all-encompassing catharsis is unavoidable!
- Only one person can manage this for the entire humanity!
- Refuse to participate and you will never get into Paradise!

The **World Report 2011** relentlessly unveils all the big problems. The foundations of the only solution are absolutely unique in the entire history of mankind. Take on this challenge for your future, for the future of your children and the following generations! Then you will get a ticket to Paradise.

I strongly advise you: Don't even start to express stupid, primitive or neurotic thoughts or verbal statements towards this mission! In the future something like this will be heavily punished!

Decide today and now to support this mission!

▪ **A short overview of the situation**

- The world population will rise dramatically; every 13-15 years there will be one billion additional people: In 30-40 years the planet will no longer be able to sustain the population; this will have distressing effects for humankind.
- 10 billion people are manageable only with dictatorship and military suppression; culture, individual development and life of free spirit will no longer be allowed, it will be impossible and definitely not open to discussion.
- Exorbitant spending on military, wars, large industries and state administration together with corruption do not allow for any solutions.
- The incredibly hyped up weapons and car industry will drain the earth of its resources and lead the planet to total collapse resulting in the complete destruction of life.
- Due to huge debts and speculation the next financial crisis will lead to a complete breakdown of the system and destroy with it entire countries and nations resulting in widespread anarchy and suffering.
- The unequal distribution of wealth and natural resources of the earth will mean the end of supra-millionaires and billionaires as well as their children's future.
- Increasing and ever more unpredictable change in the climate will bring enormous destruction to continents resulting in incalculable damage and costs; not to mention hideous suffering.
- We have to expect more drought, floods, heat waves, fires, heavy rainfall, storms, tornadoes, cyclones with the worst imaginable aftermath for the environment and people.
- Sea levels will increase by 40-120 cm in the next 20-60 years; some experts predict an increase of 90-150 cm by 2100; all this will wreak havoc.

- Beaches, landscapes, entire islands and natural habitats will be completely destroyed or simply disappear; there will be overwhelmingly more contamination and pollution.
- Natural resources (e.g. fish, drinking water, natural food, water for agricultural productions, healthy farm land) will decrease spectacularly and become more and more contaminated.
- Mega-cities and widespread construction as well as pollution, littering, contamination and radiation of the earth, air, water, seas and food will increase.
- All variations of cancer and serious illnesses will increase dramatically as a result of pollution, poisoning, fine dust and radiation: What the chain reactions in the human body will be nobody knows. No one has been there before.
- 1-2 billion people will fall into poverty in the coming 10 years; in 30-40 years this will be 80% of the population; completely without or at best with minimum medical provision.
- The sewage water (with poisonous substances) of 2.5 billion people flows directly into the oceans and seas today; this amount will double in the next 25 years and in 40 years will completely destroy nature.
- Several hundred million people will migrate in search of a new home as a result of unemployment, wars, climate change and natural catastrophes.
- All kinds of rubbish and waste, especially nuclear, electric and car waste, will take on gigantic dimensions and totally poison land, oceans and seas.
- The price of oil, wheat, corn, rice, coffee, sugar and soya will rise dramatically and thus become unattainable for 30% of the world's population; 80% of all humans will have to live under the bread line.
- Most people in industrialized nations will have significantly less disposable wealth which will curtail holidays. Tourism around the globe will collapse.
- Unemployment statistics fail to reflect reality. Around the world today there are over half a billion people who have no work or too little work; this will result in massive social unrest.
- Crises, unrest, revolutions, wars, tax hikes and martial laws will completely choke the human experience; religious conflict will form part of everyday life.
- The explosive hotspots and conflicts will increase and totally change the world; WWIII is imminent, ongoing and can begin any moment; they are all ready.
- Humanity and all religions have lost the Archetypes of the Soul, also Love, the Truth, Trust, as well as genuine inner needs and the inner Spirit.
- The truth has no chance today. Lies, perversion, lunacy, religious psychosis, narcissism, arrogance, ignorance and stupidity have replaced the truth.
- Humanity is (nearly) completely brainwashed and manipulated, degenerated in its inner being. It has become soulless; therefore driven by illusions, greed and repression of guilt.
- The world will collapse beyond repair in 30-40 years with 9-10 billion people. The "end" is foreseeable and will become reality for those alive today and especially for the coming generation!

▪ **Future development**

The past is never dead. It's not even past.

UN: Humanity is close to breaching the sustainability of Earth.

The world is facing exploding population, an energy crisis, global climate change, increasingly destructive natural disasters and increasing starvation.

\$1.9 trillion per year will be needed over the next 40 years for incremental investments in green technologies. At least \$1.1 trillion of that will need to be made in developing countries to meet increasing food and energy demands.

3 billion poor people aspire to gaining access to electricity and modern energy services.

In order for populations in developing countries to achieve a human living standard, especially the 3-4 billions who currently still live in conditions of abject poverty, and the additional 2-3 billion people who will have been added to the world's population by 2050, enormous economic progress will be needed.

Consumption patterns and production methods deplete and pollute incessantly our natural environment.

The march toward self-annihilation has already obliterated 90 percent of the large fish in the oceans and wiped out half of the mature tropical forests, the lungs of the planet. At this rate by 2030 only 10 percent of the Earth's tropical forests will remain.

Food and water shortages expand across the globe.

During the coming 40 years we must produce the same amount of food as food has been produced the last 8000 years together.

The Pentagon says: Climate change will destroy us: Secret report warns of rioting and nuclear war; Britain will be 'Siberian' in less than 20 years; Threat to the world is greater than terrorism. An imminent scenario of catastrophic climate change is 'plausible and would challenge United States national security in ways that should be considered immediately. Widespread flooding by a rise in sea levels will create major upheaval for millions. Disruption and conflict will be endemic features of life. Warfare would define human life.

Climate change over the next 20 years could result in a global catastrophe costing millions of lives in wars and natural disasters.

Britain is plunged into a 'Siberian' climate by 2020.

According to USAID, one-third of all humans will face severe or chronic water shortages by the year 2025.

Nuclear conflict, mega-droughts, famine and widespread rioting will erupt across the world.

Abrupt Climate change could bring the planet to the edge of anarchy. The potential ramifications of rapid climate change would create global chaos. It could start tomorrow and we would not know for another five years,

By 2020 catastrophic shortages of water and energy supply will become increasingly harder to overcome, plunging the planet into war.

Spread of antimicrobial resistance causes WHO to declare: "The World is on the Brink..."

America will become an undeveloped nation, that there will be a revolution marked by food riots, squatter rebellions, tax revolts and job marches, and that holiday will be more about obtaining food, not gifts.

Food riots will soon hit Britain too.

In the Northern city of UK poverty is already a way of life, for too many adults and children. Jobs are few. Young people face an uncertain future. Unrest and food riots are to expect on the streets of the UK. The new generation of British people will not be as easily led as previous generations may have been.

What we are doing is functionally insane. If we do not change this pattern, we will condemn our children and all future generations to struggle with ecological curses for several millennia to come.

The WHO warns that depression will be the most often diagnosed illness in industrialized nations by 2030, herewith topping heart diseases.

▪ What is the point of such facts?

It is certainly normal that people actually don't want to know too much about such statistics. We understand the reasons: They cannot change anything of the dire state of humanity and the earth. They have no power and no influence. Most probably the vast majority of people in industrialized nations don't even notice the dramatic state of humanity and the earth. They also have to work and simply want to live their life, aim for their goals and realize their visions.

Imagine the value of having inside knowledge about the state of humanity and the earth like this:

- Awareness about the state of humanity makes you very strong inside.
- Having the overview of the global network provides a good feeling.
- Not knowing provides insecurity, fear, mistrust, and emotional weakness.
- Without this global knowledge you live a blind, short-sighted and ignorant life.
- Not wanting to know is contagious; in the end nobody knows anything.
- The less people know the more power is abused to exploit the masses.
- Those that do not know will somehow always be deceived, lied to and exploited.
- Everybody is confronted with facts via the media; the effect is always emotional.
- What you suppress haunts you unconsciously and yearns for compensation.
- It can only be an advantage, to be prepared for the coming developments.
- To have the knowledge and subsequently base decisions on it, is efficient.
- The way you live, multiplied by 6-7 billion people, creates the state.
- Certainly you can do something: It starts with small things in everyday life.

Nevertheless there are more serious reasons to want to know and to have the knowledge: You don't want to know anything then you will not get into Paradise. You have no wish to do anything in your everyday life to contribute towards the truth; then you will not get into Paradise. You do not want to live the truth and truthful love; you will not get into Paradise. You do not want to learn anything about or with your inner Spirit; Paradise will be denied to you. You don't want to live the Archetypes of the Soul, then you will not enter Paradise.

The worst part however is: It is already 5 minutes past 12. WWIII is unavoidable. It is no longer possible to stop these terrifying mighty forces. I tried during 23 years. Many people know me; People in politics and in religion (Christianity, Islam), NGOs from around the world, as well as millions of people from various nations, amongst them thousands of "experts". They all merely live and function for their own sick narcissism. They do not wish to know anything but they are all extremely conceited.

The pseudo-messianic political craze and messianic religious psychosis have already completely broken through on all levels of power. Most people do not deserve anything better than WWIII; including most of the young people. They are nearly all completely conditioned and decayed inside, completely degenerated in the authenticity of their being; they are merely superficial copies of marketing and consumer ideals. WWIII will result in 2-3 billion victims and considerable collateral damage to the environment and nature. The survivors will perhaps then wish to know and learn to live the Archetypes of the Soul.

There are approximately 2.2 to 2.4 billion Christians and 1.5 to 1.8 billion Muslims. That is around 4 billion people who believe in the one God and teach the path to God from the same historical source. They claim to teach love and the "truth" yet they haven't succeeded in bringing peace and justice to this Earth or protecting the planet. Both religions have failed miserably! Something must be wrong in their teachings, practices, holy books, institutions and the people in them!

The problem is simple: The religions have lost the Archetypes of the Soul! They do not bring the Archetypes of the Soul to life! They refuse and deny the psychical-spiritual evolution! They have perverted the truth! They abuse their power! They operate with brainwashing instead of with inner education. They ignore the Spirit (of God) in their inner life. With all this they destroy all of humanity and the planet. They deny the creation and the plan of psychical-spiritual evolution towards God to the complete fulfillment of being human and the root to inner happiness.

Nothing is "holy", meaning "forever valid and untouchable", except for the Archetypes of the Soul. Nothing is "spiritually" more meaningful for the people and their souls than the vivid realization of the Archetypes of the Soul through humanity in their real life.

The Global Octopus

In 1970 I first began to take interest in the global problems of the world, at the time especially for Africa and South America. Over a thousand documents began piling up on my desk, also books about peace research and development aid. Later, around 1978 I had the first dreams concerning the state of humanity. From 1984 these dreams increased: weekly and more and more even daily I dreamt about the problems of humanity and the earth. This motivated me, to find facts and try to understand them.

Up until today I have had approximately 12,000 dreams about the state and development of humanity and the earth. Since 2009 I began to thoroughly research online. It is indeed difficult to identify which sources transmit objective facts and what is more a conspiracy or qualifies more as blatant lies.

In the first four months of 2011 through complex analysis a horrendous picture began to form. A massive global octopus, full of falseness, lies, misrepresentation, distortion, deadly poison, political and religious psychosis, perverse lust to kill of an indescribable and never before existing dimension and power, has got nearly the whole humanity in its iron grip. In the hidden reality of politics, economy, media and religion there is a diabolical titanic battle that has been ongoing since 150-200 years.

There are no solutions for humanity without the complete disclosure of the truth about this global octopus! Humanity needs to be enlightened up to the minute details. This also means: the entire history since the Middle Ages up until today must be entirely re-written.

On the 17.04.2011 I dreamt: The door to Paradise must now be completely closed for all souls, until the complete enlightenment of the truth (concerning this octopus and other issues) is fulfilled globally.

Therefore, with all the power of attorney from my spiritual authority I decide today:

I will not let a single soul into Paradise, apart from a few exceptions, until this octopus is detected and disclosed, until the truth is researched and clarified and until both are fully understood by the entire humanity. Everyone is summoned to work on this: Researchers, Experts, Scientists, Journalists, Politicians, legal professionals, CEOs, and all kinds of power holders and religious officials.

Every single person must be educated, with the sole feasible solution for humanity being the fulfillment of the Archetypes of the Soul: the all-encompassing catharsis, guided by the inner Spirit and the power of love. If this occurs, then I will re-open the door to Paradise in 25-30 years. If this does not happen, the door will be closed to all souls currently on earth for 50,000 years (apart from certain exceptions).

Indictment and Conviction by the Highest Court

Just to clarify upfront: Everything that is stated here is the absolute truth, free from any doubt, historically founded like never before, much better and more comprehensible than anything all the religions have ever provided. Your problem is therefore not what is written here, but the brainwashed pulp you have in your head, your ignorance and arrogance, your big mouth and your sick narcissistic Ego, your laziness to learn, your inability to think thoroughly and in networked constellations, your greed for power, your cowardice and hypocrisy, your ideological and religious or spiritual enslavement, your stubbornness and infantile infatuation, your neurotic distortion, your greed for having and lust, your obsession, your bad education and your blind cantankerousness paired with hate against the truth and the real love. That which you believe to be as “true”, is nothing more than a twisted and distorted lie. Nevertheless, partial relief from this is that you are the result since your pre-natal time of everything in your biography as well as the influences from your environment. Self-evidently there are also certain exceptions.

There are approximately 2.4 billion Christian, that believe, that Jesus Christ will descend from heaven physically with 10,000 angels (armed with swords), to come and free the people. This Jesus Christ is even expected to come and clean up the mess, which people around the planet created. They further believe that Jesus from Nazareth, an exceptional miracle maker, died on the cross for the sins of mankind. On top of all this they are obsessed with the idea that God is “forgiving” and will simply just take everybody into Paradise.

That is stupid, naïve, primitive, blinded, neurotic, perverse and all around completely psychically ill. This belief shows the extreme laziness and hypocrisy of the Christians. This whole thing is nothing more than a ridiculous trap: Once you are in it you are poisoned and won't be able to get out anymore. The powerful and super rich are laughing their heads off, because this stupidity and blindness conveniently serves them and their interests.

Billions of believers and millions of priests as well as hundreds of self-declared Messiahs have misused the name of the true prophets for power and war, for genocide, for stealing land and commodities, for narcissistic satisfaction, out of stupidity or dishonesty and out of a spiritual aberration or religious psychosis. Nearly everything that remains is nothing but lies and deceit. All this has got nothing to do with me. But you will have to realize this yourself with thorough reflection and investigation.

Fact is: Christians need to find the truth themselves and they need to develop their psychological-spiritual salvation and reconciliation on their own for the actions (“sins”) they took against the Archetypes of the Soul, against themselves, against humanity and against the planet.

Now let's get to the point

I am the Primus inter Pares of all Kings in the spiritual world. Ordered by God and supported by all the Kings and Prophets in the spiritual world I am now here on Earth, commissioned to give humanity a chance for a new future.

During the last 30 years I have fulfilled all Archetypes of the Soul. Those Archetypes of the Soul are the highest orientation for humanity and humaneness, for religion, spirituality, politics, economy, industry and education. With approximately 2,000-3,000 dreams about the Archetypal Processes of the Soul, I know what I am talking about here.

I have got all the powers of attorney from God and all the support from the spiritual Kings, the prophets and wise men that in the past have been on this earth. I am the highest judge of all souls that have lived on this earth, that live on this earth today and those that will come tomorrow. Therefore it is not only my right, but moreover my duty, to harshly criticize the Elite, including the Jews and the government of Israel! Their entire future depends solely on me, on this Earth and in the spiritual world!

You can inform yourself about the psychical-spiritual foundation:

<http://www.rcigi.com/about/books/the-incredible-solution/>

In essence the form of punishment in the spiritual world is quite simple: For a specific time, measured in the time we know on earth, there will be no access to Paradise. At the same time this means: Being far away from God and his light.

The state of Humanity and the Earth is disastrous. Most leaders in politics, economy, industry, religion and education have failed terribly. The planet is in frightening danger of collapse.

On the 14.08.2010 I dreamt: "In 35-40 years everything will be over, the end, no more earth and no more humanity."

In 2008 I dreamt: "Humanity has got 10 years left to take drastic measures". Today, 2011, Humanity has only got 7 years left to make these changes!

- The truth has lost; Lies have taken its place.
- The real good has lost; it can never win by itself.
- Love has lost; People are rotten to their innermost core.
- The inner Spirit of humans barely stands a chance anymore.
- All Archetypes of the Soul have been abused and destroyed.

Indictment: Examples

1. Armament and wars: The last two decades humanity has suffered from many wars: Gulf War I and Gulf War II, Balkan Wars, Iraq War, Afghanistan War, Israel's Wars against Palestinian and Arab people and today the War against Libya. In not one of these wars was the capitalist coalition, especially not the European Union and

the United States, threatened, attacked or in any way in a dimension of collective emergency state of war. All these wars were and are based on lies.

These wars produced millions of victims, injured and handicapped people, of orphans and widows. Hundreds of thousands of soldiers will suffer mentally during their entire life. Millions have been displaced and forced from their homes. Country-wide infrastructure and extensive environments have been totally destroyed.

The motives of these wars are pathogenic narcissism, neurosis and psychopathic, perverse lunacy, obsession and greed, lies and falseness, the madness of the "One World Order" of the capitalist coalition, stirred up also by the Jewish-Zionist rulers as well as certain leaders in Christian circles in order to trigger another religious war against Islam and the Muslim people. The interest of making astronomic profits in the weapons industry is also a hidden motive.

Conviction: The souls of all the leaders and rulers of these wars must be punished very hard. I can emphasize here only some examples from the governmental scenes: U.S. President Barack Obama, U.S. Secretary of State Hillary Clinton, Mr. Dick Cheney, Mr. George H.W. Bush (senior) and Mr. George W. Bush (junior), Mr. Bill Clinton, Mr. Tony Blair, Sr. José María Aznar, Sr. José Luis Rodríguez Zapatero, Mr. Nicolas Sarkozy, Mr. Gordon Brown, Mr. David Cameron, Mr. Benjamin Netanyahu, NATO Secretary General Anders Fogh Rasmussen (plus former office holders), and many more state office holders as well as all those who worked and work behind the scenes in secret organizations (such as the so-called Illuminati, Freemasons, the Bilderberg Group, etc.).

All leaders with power in government, industry, economy, media and religion that supported and actively contributed to these wars will be punished with 10,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

2. The State of Israel: Since 14.5.1948, the day of the establishment of the State of Israel, the world has been endlessly terrorized by the Zionist-Israeli-Government with wars, war-like attacks and an absolute shameless oppression of the Palestinian and Arab people. It is well known how extensively the Jewish Lobby influences, blackmails, manipulates, and lures with money members of the U.S. government and those of the governments in the European Union, and personalities in countless corporate groups, especially media corporate groups. People like the philanthropists Dr. Miriam and Sheldon G. Adelson and others with similar agendas also form part of the "Jewish-Zionist Stream".

To that I can only say: I can prove with the Archetypes of the Soul and many dreams, that the Jewish people had their mission taken away from them by God already 2,000 years ago.

Conviction: "Nobody that is part of the Jewish stream will get into Paradise" (as a dream showed me). Jewish people stole the land of the Palestinians and Arabs. Therefore, they have to give back 100% of the stolen land and they have to pay reparations for the suffering and misery of all the Palestinian and Arab people since 1948. The Jewish-Zionist rulers must calculate with 20,000 years of being far from

God and his light, especially those who are involved in any kind of global domination behind the capitalist coalition. They are all, absolutely all to be held accountable.

3. Destruction of the Highest Spiritual Mission: The Swiss government and the Swiss people are pivotally responsible for the First and Second Gulf War, Iraq War, Balkan Wars, Afghanistan War, global terrorism, the suffering of the Palestinians and Arabs, incredible global poverty and misery worldwide, the financial collapse, the exorbitant increase of climate change, and especially the preparations for World War III that have been in motion for many years already. The Swiss people and the Swiss government were offered the most unique solution. They all rejected my mission and therefore committed the most terrible crime against humanity in the history of mankind.

Conviction: The entire Swiss population, including its government, is collectively charged with the gravest crime against humanity and is herewith convicted with 20,000 years of being far from God and his light! They all lose their Swiss homeland for all times.

4. Pollution and Contamination: The pollution and contamination around the globe have brought the planet and all its eco-systems to the brink of collapse; and with that the most probable extinction of humanity in the near future. Countless poisonous chemical substances can be found in the environment, in the water, in the earth, in rivers and seas and oceans, in animals and fish and in all kinds of food products. Up to 200 of these chemical elements can already be found in the body of many people. Human-made catastrophes due to contamination are taking on frightening dimensions. Diseases, cancer as well as deformed babies are already today the consequences. Millions of people are dying every year due to this; and in 10-20 years billions will die as a result. Billions of people are (and will be) affected in the long-term over hundreds of years due to the consequences, including poverty, misery and terrible suffering.

Conviction: Those responsible leaders in politics, the economy, and the industry are herewith convicted with 8,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

5. Nuclear Energy: The ideology and vision of nuclear power stations is a horrendous lie. Nuclear energy is the most expensive energy that has ever existed. The state even subsidizes the industry with various indirect contributions (tax contributions!). Nuclear energy is the result of the obsession with economic growth. Then you have the tens of thousands of tons of nuclear waste around the globe, which contains a lethal danger and entails billions (of dollars) in maintenance and storage costs. The coming generations will have to pay for today's electricity for thousands of years. Anyone that accepts this is absolutely stupid, evil and devilish! There are no end storage places that are safe; and they will never exist. Possessed by delusion the representatives talk about a "minor risk". Every body already knows this "minor risk", we saw it with Chernobyl and today again with Fukushima (Japan). Billions of people can get sick and die in such a nuclear accident. Not to mention the immense contamination of land, seas and oceans. Even entire continents could become poisoned for hundreds of years, including the entire drinking water and agricultural land. Not even the devil could want such a "minor risk", only those people

in the industry that earn billions with this. The decision to abandon nuclear energy and the actions to undertake this should be taken immediately.

Conviction: Those responsible in politics, the economy and industry will be punished with 6,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

6. Climate Change: Climate change is 97% proven by thousands of scientists around the globe: this Climate Change is human made! All the catastrophes due to climate change, in the past, the present and the future will cause unimaginable damages, billions of victims, misery, suffering, poverty, and displacement of entire folks. The greed for money and power of the elite in politics and industry is the main cause. The ignorance of billions of people is the other part of the human cause.

Conviction: The responsible rulers in politics and industry will be punished with 6,000 years of being far from God and his light. They are all, absolutely all to be held accountable. The people that continue to ignore their contribution by abusing material prosperity and not willing to take the necessary individual measures must be punished with 500 years of being far from God and his light.

7. The Media: It is well known that some media corporate groups brainwash and manipulate billions of people in the interest of the elite by using all possible tools: lies, deceit, distorting realities, propaganda, and thoroughly ignoring the truth. With that they support the elite's interests and block every solution for humanity that is within the Archetypes of the Soul.

Conviction: The responsible rulers in the media industry will be punished with 6,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

8. Banks: With their horrendous speculation (real estate, commodities, resources, etc.) and fraudulent and deceitful models of investment countless banks and financial institutions have destroyed the existence and hope of millions of people. Many of these banks and financial institutions have provided immense loans to governments, partly with enormous interest rates, ultimately to dominate politics and oppress the people. Lately they are starting to speculate with food. This will force up to 2 billion people into poverty and hunger; poverty will increase dramatically.

Conviction: Those responsible will be punished with 6,000 years of being far from God and his light. They must immediately halt such speculation! It is unacceptable that the people today and tomorrow should pay for such devilish speculation! They are all, absolutely all to be held accountable.

9. Corporate Groups: Corporate groups are one of the main causes of global poverty, hunger, unemployment, pollution, contamination, destruction of the environment and the natural eco-systems. Power, greed, arrogance and unscrupulousness are the driving motives. They are carrying out an absolutely diabolical exploitation of all resources and of the workforce without any consideration for health, human life and future generations.

Conviction: Those that have supported and support these developments as CEOs, managers, board of directors and shareholders, will be punished with 6,000 years of being far from God and his light. All those responsible must immediately stop with such business models! They are all, absolutely all to be held accountable.

10. Politicians: There are too many politicians that are imprisoned in pathogenic narcissism, neurosis and psychopathy, perverse lunacy, obsession and greed, lies and falseness, intrigues and maneuvers. They only serve themselves, the elite and their power. They barely serve the people. They all disregard and abuse the Archetypes of the Soul. They are far too uneducated for the issues they manage, especially in their understanding of the psychical-spiritual being.

Conviction: Any politician that disregards the Archetypes of the Soul in the future for their own benefit or to abuse the people will be punished with 4,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

11. Laws: There are many laws that merely serve politicians themselves, their power, the wars, the elite, the exploitation and misuse and in many cases infringe the basic rights of every human being. The Holocaust laws hinder the truth and the exact (objective, neutral) establishment of the truth; it serves the lies and hidden benefits. On the other hand new laws must be established to prohibit the brainwashing of people. New laws are also necessary for the protection of the environment, the planet and every human being. Too many laws and forms of punishment are only there to oppress the people, create mistrust and hatred and to ultimately sow fear and suffering. All those who created these laws must be held accountable, absolutely all of them.

Conviction: I declare the Holocaust laws as null and void; these laws must immediately be disposed of because the truth is above the law. Those that create laws or uphold laws that prohibit the establishments of truths (also in religious issues) and those that infringe the basic rights of human beings will be punished with 2,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

12. Religions: More than 6.5 billion people are brainwashed and deformed in their soul. They are trapped in dark psychical and spiritual labyrinths, in religious psychosis, in stupidity, in arrogance and ignorance. Religions have failed! Even their officials are trapped within.

Conviction: Those responsible in religions must all completely renew their “holy books” and teachings in the frame of the Archetypes of the Soul. All the lies, shams, manipulations, fairy tales, illusions and psychopathic constructions and all the psychotic fascinations (scenes) must be cleaned out. If they don’t do this, they will be punished with 8,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

13. Universities: Most of the state universities are far too big, operating like the mass industry and completely neglecting the (inner) being as part of teaching in all areas of study. The social sciences (philosophy, psychology, education, sociology, business, tourism, politics, journalism, etc.) “sell” a predominantly inefficient and

inappropriate bulk product (knowledge) with very heavy ideological and elitist molding. Since hundreds of years they teach about the “old human being” but not about the “evolutionary psychical-spiritual human being”. It is unacceptable that politics, which generally has an image of human beings from the Middle Ages, gets to have a say in the content of such study programs. Social sciences must also be allowed to be taught at private academic institutions. The state shouldn’t meddle in the content. The state must officially recognize private academic institutions and their academic titles.

Conviction: Those that actively hinder this or don’t immediately lay down the path for this will be punished with 2,000 years of being far from God and his light. They are all, absolutely all to be held accountable.

14. People: Most people are too lazy to learn, especially too lazy for self-realization and psychical-spiritual development. They avoid every serious human challenge for the truth and for love. They are hypocrites, blind sheep, big mouths, and they mostly talk a lot of rubbish and nonsense. They only make fun of true love, about human values and the inner Spirit. They piss on the Archetypes of the Soul. These people are good for nothing and only pollute the world with their ways of living and their stupid and perverted gossip. This must now come to an end!

Conviction: Anyone that does not immediately stop talking rubbish, anyone that drags the truth into the mud, anyone that runs after pathogenic lunacy and lets himself be obsessed with lust or anyone that lets himself be stirred up with religious psychosis, anyone that creates their own triumph with ignorance and arrogance and anyone that rejects thorough self-realization and development in the psychical-spiritual frame of the Archetypes of the Soul will not get into Paradise.

15. Catharsis: The entire humanity, all religions, all social systems need a thorough and all-encompassing Catharsis. This is also the absolute obligation for the entire Elite around the world.

Conviction: For everybody: Begin now with the Catharsis; otherwise your soul will spend 2,000 years far away from God and his light. If the collective doesn’t want this Catharsis, then the collective will be punished with 50,000 years of being far from God and his light. Then, they can start again as a pre-hominid on another planet. This is how a prophetic dream unveiled this to me. Given the acute danger for humanity and the earth, if necessary, I will not hesitate to ask God for permission, to increase the punishment for the collective to 200,000 years.

16. Stupidity: Stupidity, ignorance and arrogance with regards to the psychical-spiritual human being and the Archetypes of the Soul destroys humanity and the planet.

Conviction: Anyone that talks about the Judgment of the Highest Judge of all Souls or the psychical-spiritual human being and the Archetypes of the Soul in a stupid, aggressive or hostile manner or even dares to devilishly drag this into the mud or somehow distort this or make it funny, will be punished with up to 2,000 years of being far from God and his light.

Everyone must know this: I will not let a single soul that doesn't want this global Perestroika (renewal) with the Archetypes of the Soul into Paradise!

17. Protection of the Mission: Bear in mind the consequences of your reaction about these indictments and convictions and the mission for humanity as a whole!

Conviction: If you do not want my mission or even intend to harm me or damage me in any way or even kill me, you (and the entire humanity) will lose the earth! If you harm my son, or even kill him you (and the entire humanity) will lose a quarter of the earth! If you harm my future wife, or even kill her you (and the entire humanity) will lose a quarter of the earth!

Given that lunacy and stupidity practically dominates everything on this earth today, I have to make the following clear: All the actors and followers against me and my mission will receive the highest punishment; today that is: 50,000 years of being far from God and his light and until then no incarnation on earth.

In 20 years, I will ultimately determine these indictments and convictions (with some exceptions) and re-assess the achievements and performances of all human beings, rulers and leaders around the world – for the better or for the worse.

I have all the powers of attorney from God, to impose the harshest punishments in the interest of the future of humanity and the planet.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

▪ Hope

There is a solution. Only one person on this whole earth has the solution. Only one man on this earth today has all the Archetypes of the Soul vivid inside of him. He is thereby the highest authority over the entire humanity and world of the souls. A higher, more truthful messianic mission doesn't exist.

You don't want to show solidarity with his mission and don't want to support the greatest project in all the history of mankind, then you will not get into Paradise. If the people don't take the Archetypes of the Soul seriously and don't want to make them

vivid inside themselves, then this means the definite end of humanity and the planet – and this very very soon. The state of humanity and the earth today in 2011 shows this clearly enough. You have got 7 years left for a new orientation globally and for drastic measure in all areas of life and society.

The choice is yours: Decide yourself for the truth or for the lie, for the Archetypes of the Soul or for psychotic lunacy and morbid narcissism!

▪ About the Statistics, Facts & Figures

- The figures shall draw a general global picture.
- We do not claim to have found the most objective figures.
- Most figures from different sources sometimes vary strongly.
- Figures change every year either to the good or to the bad.
- Even “serious sources” are only estimates and vary accordingly.
- Statistics are often manipulated or refer to a specific view.
- Everybody can find thousands of facts and figures on the internet.
- Find the “right” (objective and all encompassing) figures yourself!
- We cannot verify the “more or less” of single figures.
- Experts must calculate exact figures for global changes.
- Figures about a field become important in the whole network.
- Figures are important because they express a human reality.
- We focus on human realities, on 7 billion human lives, on humanity.
- Humans created this disastrous world as the statistics show.
- Therefore the solution lies in humans, in every single human.

1. Population Growth

▪ World Population today

→ In 2011 the earth population will reach 7 billion people.

▪ Forecast: Increase of 1 billion people every 13-15 years:

→ 2024-2027: 8 billion people

→ 2037-2040: 9 billion people

→ 2050-2053: 10 billion people

→ 2050: 90-93% of the earth population will live in Asia, Africa, and South America.

UN report January 2011: "The world population is expected to reach 7 billion later this year and the figure could potentially double to **14 billion by 2100** unless preventive measures are taken."

▪ Continents today

→ 4.157.000.000 live in Asia, including Turkey (60.3% of the world population)

→ 1.030.000.000 live in Africa (15% of the world population)

→ 0.500.000.000 live in the European Union

→ 0.350.000.000 live in the United States and Canada

→ 0.480.000.000 live in South America

▪ Some special facts

→ 1.340.000.000 people live in China

→ 1,192,950,000 people live in India

→ 80% of the earth population is living in Asia, Africa and South America.

→ 15% of the earth population is living in United States, Canada, and Europe.

→ Today 3.5 billion people are living in mega cities with high increase rate.

→ Today 4-5 billion people don't have enough food and drinking water.

→ Today more than one billion people suffer from hunger and dirty water.

→ The UN estimates that 2.6 billion people live without proper sanitation.

→ Today the sewage of 2.5-3.5 billion people goes to the soil, seas and oceans.

▪ General future perspectives

→ Population India: 1.2 billion; in 2025 India could have higher population than China.

→ Population Africa today: 1.02 billion; at the end of the century 3.6 billion people will live on the African continent.

→ Some experts estimate: 10 billion people by 2050.

→ In 2050-2055 around 70% of the world population will live in mega cities and immense cities (urban growth).

→ In one year one additional billion people will suffer from hunger due to the increase of food prices.

- In 40-45 years 3 billion people more will need food, water, health services, education, sanitation, energy, etc.
- In 40-45 years 10 billion people will produce immense volumes of sewage, air pollution, chemical emissions (contaminations), and waste in general.
- Europe and the United States will not have a significant increase of population, maybe rather a decrease.
- Europe and the United States will face increasing conflicts with the rest of the world due to the global demand of resources.

▪ **Depending on local medium life expectancy, people born in:**

- 1960-1980: will face a very tough and bitter third age in the future.
- 1981-2000: will face and live unimaginable nightmares in the future.
- 2001-2010: will suffer terribly due to the failure of global politics.

▪ **Religions**

- Christianity: 2.2 billion (other figures found: 2.4 billion)
- Islam: 1.5 billion (other figures found: 1.8 billion)
- Secular/Non-religious/Agnostic/Atheist: 1.1 billion
- Hinduism: 900 million
- Chinese traditional religion: 394 million
- Buddhism: 376 million

▪ **Needs and demands**

Every 13-15 years one billion more people – in total 3 billion more people in 40-45 years will need and want to have:

- A home
- A job, work
- Money for living
- Education, professional and higher education
- Public Health Care
- Medicaments
- Sanitation
- Food and beverage
- Healthy water
- Water for agriculture
- Fertile agriculture land, free of contamination
- Energy (electricity, gas, oil, petrol)
- A variety of natural resources
- Sewage and rubbish recycling
- Clothes and shoes
- All kinds of products and goods
- Furniture
- Hardware
- Detergents and toilet articles
- Cars and scooters
- Condoms

- Televisions
- Stationary articles
- Mobile phones
- Computer and internet connection
- Leisure areas
- Touristic opportunities
- Fun and entertainment
- And much more ...

▪ **Political management**

Every 13-15 years one billion more people – in total 3 billion more people in 40-45 years will need an efficient political management and state administration:

- Citizen registration
- Tax registration and management
- Public traffic systems (people and goods traffic)
- Registrations of cars and vehicles
- Court and police institutions
- Road construction and maintenance
- Sanitation and rubbish disposal
- Disposal of corpses
- Nuclear waste maintenance
- Electricity delivery and maintenance
- Water system maintenance
- Pension system
- Education and research
- Culture promotion
- Public health care
- Energy resources management
- Media systems
- Food quality control
- Delivery of construction licenses
- Management of catastrophes
- Military force and secret service
- Economical and industrial systems
- Businesses and service sector
- And much more ...

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

2. Poverty and Misery

▪ State of humanity today (2011)

a) Food and Water:

- 2.3 billion people are malnourished, under-fed or starving.
- 1.000.000.000 people are undernourished.
- Every year 15 million children die of hunger.
- Between 30.000 and 50.000 babies die in Africa every year.
- People who died of hunger in one day (January 2011): 24.000.
- Over 4 million people die of starvation every year.
- Asia and the Pacific have 650 million hungry people.
- Sub-Saharan Africa counts with 265 million hungry people.
- Nearly 30% of all children in developing countries are undernourished.
- Food and water supplies are more and more in danger.

b) Deaths:

- Deaths of children under the age of 5 in January 2011: 1.000.000.
- Over 3 million deaths due to water related diseases.
- 22.000 children die every day from poverty; over 10 million per year.

c) Poverty:

- Over 500 (600) million people live in absolute poverty.
- 4-5 billion people live under poor and very poor conditions.
- 50% of all children on the earth (2.2 billion) live in poverty.
- Over 1 billion people have no housing.
- 2 billion people don't have access to electricity.
- 2.6 billion people have no access to sanitation.
- 640.000.000 children have no housing or live in slums.
- 400.000.000 children have no access to healthy drinking water.
- For 3.2 billion people drinking water will be rare in the future.
- 1.3 billion people dispose of dirty and contaminated drinking water.
- 1.8 billion people must walk 2 km or more to get drinking water.
- 4 billion people have insufficient education.
- 1 billion people are analphabets; they all can't read or write.

d) Economical conditions:

- 1.3 billion people earn less than US\$1 per day.
- 3 billion people struggle to survive on US\$ 2 per day.
- Nearly 50% of the earth population lives from less than \$2.50 per day.
- 40% of Egyptians live on 2 dollars a day or less.
- 1.4 billion people dispose of less that \$1.25 per day.
- 80% of the earth population lives from less than \$10 per day.
- 1-1.2 billion people live in really good economic conditions.

- 3.4 billion people disposes of 1% of the world's wealth.
- 2.5 billion people depend on biomass (wood, coal, etc.) for cooking. In the Sub-Saharan, in India or China over 80% depend on traditional biomass for cooking.
- The richest 20% of the world population cover 76.6% of the worldwide private consumption. The poorest 35% cover 1.5% of the consumption volume. The richest 10% cover 59% of all consumption; and the poorest 10% only 0.5%.

▪ Poverty in industrialized countries

- Currently 3.7 million children are living in poverty across Britain overall.
- 22% of the British population live in families with earnings of only 60% of the median (average) income
- Out of the 22% (13 million people), 5.8 million suffer from “deep poverty” which means they earn less than 40% of the median income.
- In the countries of the European Union, the rate of poverty varies between 10% and 23%.
- At least 80 million people in the EU are “below the poverty line”. Countries with the highest poor population include France, Germany, Italy, Poland, Spain and the UK.
- 5.8 million Brits suffer from “deep poverty” which means they earn less than 40% of the median income.
- Across Britain overall there are currently 3.7 million children living in poverty.
- 11.5 million Germans live in poverty (population: 82 million).
- In 2009 14.6 per cent of the population of Switzerland was in danger of becoming impoverished, which means around 1,140,000 people out of a total population of 7,800,000. 6.7 per cent of the Swiss population is affected by strong material deprivation.
- (In December 2010) 20% of the Spanish population lives in poverty (population: 45 million). 2008: 1.1 million people were considered to be poor.
- The German pension system will lead to mass poverty (says the OECD); most probably this will also happen in other EU-countries.
- In the United States 2009, 43.6 million people live below the poverty line; one in five children in the United States live in poverty.
- 3.5 percent of U.S. households experience hunger. Some people in these households frequently skip meals or eat too little, sometimes going without food for a whole day. 9.6 million people, including 3 million children, live in these homes.
- In the U.S., households with incomes below the poverty line: 14.3 percent.
- 44 million Americans live in poverty.
- About 9 million people live in poverty in Spain, many without legal support or access to information to enable them to assert their rights.
- Spain: There are nearly 300,000 people who lack Public health coverage.
- New official data have revealed that more than eight million Italians, constituting almost 14 percent of the country's population, live in relative poverty. From among the same number, more than 3 million, over five percent of the whole population, live in “absolute poverty,” unable to procure their most basic needs and services, according to the Italian National Institute of Statistics (ISTAT). Furthermore, every one out of five Italian households lives under the poverty line. In the country's southern regions, every one out of two households lives in the same condition.

▪ Emotional state of people living in poverty

How do people living in poverty feel? How is their daily life of not-wellbeing?

- Helpless, powerless, hopeless, desperate, passive, distrusting
- Very low self-esteem, no genuine self-identity, no self-realization
- Fighting for food, drinking water, and some cash every single day
- Fear of violence, disease, illnesses, lack of food and water
- Unable to analytically think about their situation
- Running after every dollar just to be able to buy something necessary
- Resigned and consumed with fatalistic attitudes
- Turning towards criminality to get some cash
- Life experiences full of misery, suffering, misfortune, sadness
- Unable to understand and communicate for solutions
- Easily suggestible for radicalism, fatalistic and dogmatic religion
- Increasing readiness for aggression, unrest, riots, and revolution

▪ The main causes of poverty

Extracted from several articles on the internet:

a) Economy:

- Speculation businesses, including food speculations of banks
- Global industry and trade: destroyed by / dominated by speculators
- World economy ruled by the Federal Reserve, World Bank, Jewish banks and ...
- Dependent on credits of the western world and therefore "enslaved"
- Greed for exorbitant profit and speculations, for power and reputation
- Extreme and not justifiable disproportion of wealth and money

b) Industry:

- Industry producing products of very cheap quality for artificial needs
- Corporate groups having destroyed millions of self-employed businesses
- Shopping malls and shopping centers destroying local businesses
- Destruction of agricultural land and exploitation of natural resources
- Miserably paid and humanly exploited by the exploitation industry
- Capitalistic system with extremely unbalanced distributions
- Unlimited capitalism as a rule of thumb in all corporate group institutions

c) Politics:

- Corrupt politicians and CEO's, dominated by the Jewish lobbyists
- Lobbyists hindering changes of politics and financial systems
- Military, wars and secret services absorbing 30-40% of all the money
- Arrogance and ignorance of most leaders around the globe
- Complete unscrupulousness of leaders in all systems of society
- Leaders with a complete lack of reliability in human values
- The most extreme lies and cheat in religious and political positions
- A psychopathic megalomania and religious lunacy (psychosis)

d) Psyche:

- Most people are blinded, brainwashed, manipulated, deceived, lured
- Tremendous lack of integrity and ethics – of the truth – everywhere
- Religions teaching illusions instead of ways to master life and the inner life
- Psychopathic megalomania, religious psychosis, political lunacy
- The pest in the industrialized nations: Narcissism and neuroticism

e) Education:

- An educational system and curriculum that doesn't prepare the youth for life
- Tremendous lack of education for qualitative professional work
- Lack of public education that teaches how to master life and resolve problems
- Lack of education for personal psychical-spiritual development

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

3. Food and Water

▪ Water

- People with no access to safe drinking water: 1.400.000.000.
- Up to 250 million people across Africa face water shortages by 2020.
- Nearly 900 million people live without clean water.
- At least 4.000 children die every day from water-related diseases.
- More people died due to contaminated water than from violence and war.
- Glaciers and snow cover expected to decline, reducing water availability in countries supplied by melting water. Big water reservoirs will be gone in 20 years.
- Billions of people face shortages of food and water and increased risk of flooding.

▪ Agriculture

- 70 to 90% of the available water is used by the agriculture industry.
- Agriculture fed by rainfall could drop by 50% in some African countries.
- Up to 30 million hectares of land (the size of Italy) is lost each year due to environmental degradation, industrialization and urbanization.
- The average landholding fell from 2.6 hectares in 1960 to 1.4 hectares in 2000.
- Desertification in January 2011: 1.300.000 hectares.
- Arable land lost in January 2011: 550.000 hectares.
- Forest lost (for agriculture) in January 2011: 950.000 hectares.
- Industrial agriculture has destroyed 200.000.000 small farming businesses.
- Climate change is a major factor in damaging agriculture.

▪ Food resources

- 500 million small farmers suffer from hunger partly because their right to land (and water) is violated.
- One billion people in the world depend on fish for their principal source of protein.
- Fishing resources are rapidly decreasing because of excessive exploitation.
- Everywhere on this earth the seas and oceans are extremely exploited; fishing resources are destroyed.
- Crop yields decrease by up to 30% in Central and South Asia.
- 20-30% of all plant and animal species at increased risk of extinction if temperatures rise between 1.5 and 2.5 C.
- Agricultural market is increasingly dominated by speculations.
- Wheat, grain, corn, rice, cocoa, fruit juices, sugar, staples, meat, and coffee are now the new fields for speculators (banks). The consequence: 15-40% price increase.
- Exorbitant exploitation is a major factor of lack of resources.
- Exaggerated use of chemicals destroys the soil for hundreds of years.
- Mad greed for exorbitant profit destroyed the agriculture market.

▪ **Contaminated fish and meat**

Sewage and garbage (e.g. plastic) polluting oceans, poisoning chemical elements, cesium, pesticide, heavy metals and mercury, oil, chemicals for agriculture, fine dust, etc., in the world's seas are only one side of the ocean's contamination.

The other side: 50-90% of consumed medicines also go into the sewage system. Oceans, seas, lakes, rivers and groundwater are rendered impure by the residue of medicines in urine and feces: pain killers, antibiotics, hormones, tranquilizers, cholesterol reducers, medicines for epilepsy and cancer, birth control pills, high blood pressure tablets, bipolar disorder and depression chemicals, and many more.

Drugs and medicines are not the whole problem: soaps, shampoos, hair products, cosmetics and perfumes contain chemicals that disappear down the drain when washing and showering. They are absorbed by the earth's natural waters.

Fishes and sea fruits ingest this chemical and drug residue cocktail. Researchers also found all kinds of drugs in livers and tissue of fishes. These drug infested fish and sea fruits are then eaten by people around the globe for lunch or dinner.

In the not to distant future this mix of the fish together with meat infested with antibiotics will cause the human body to rebel. Nobody knows the combined reactions of all chemical and drug elements in the future. Nevertheless, enjoy your meal tonight!

The smoking-ban many countries have introduced distracts people not only from the intended "One World Order" and global oligarchy, but also and especially from the extremely serious contamination present in the environment and in the food we eat.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of "being far from God and his light".

4. Exploitation of Resources

▪ Examples of facts

In February 2011, at the World Economic Forum in Davos (Switzerland), the UN Secretary-General Ban Ki-Moon stated that the world is committing collective global suicide by consuming resources without replenishing them and warned that we are running out of the most important resource of all: Time.

Most corporate groups don't care about environmental destruction. The 3,000 most important corporate groups produce environmental damages of nearly \$2 trillion each year (UN report). The protection of nature and diverse species at risk from the abuse of natural resources, pollution (contamination) of the air and water, and the rapid decrease of the existing number of species is rarely something that the industry or economy cares about.

- Most resources are exorbitantly overexploited and within 40 years will be destroyed.
- Forest loss per year approximately: 7-10.000.000 (hectares).
- Carbon dioxide (CO₂) emissions per year approximately, in tons: 183.000.000.000
- Desertification per year (hectares): more than 12.000.000
- Species that become extinct per year: more than 100.000.
- Days until the end of oil: 15.000 days = 42 years (if consumed at current rates).
- New expectations; the peak of the highest oil production will be: 2014
- At the end of the actual century 30% of existing animals and plants will be gone.
- The worldwide destruction of the environment in the interest of profit is unlimited.
- Nuclear waste is extremely hazardous for both environment and humans.
- Nuclear waste – many thousands of tons – must be stored for 1.000.000 years.
- Nuclear waste storage must be controlled, protected and administered for 1.000.000 years and will always carry a permanent risk.
- Nobody knows if the nuclear waste storage packaging is safe for 1.000.000 years.
- Repacking nuclear waste in the future will have to be paid for by future generations. It will be very expensive.
- Nuclear electricity is the most expensive energy humanity has every produced.
- Sweden has stored 9.000 tons of nuclear waste. Hundreds of thousands of tons are stored around the world.
- In India Coca-Cola is destroying the food security of countless people by stealing the water and poisoning the water and soil; it is also responsible for ensuring a life of misery for future generations to come.

▪ A result of oil exploitation

2010 - The latest satellite data establishes that the North Atlantic Current (also called the North Atlantic Drift) no longer exists and along with it the Norway Current. These two warm water currents are actually part of the same system that has several names depending on where in the Atlantic Ocean it is. The entire system is a key part of the planet's heat regulatory system; it is what keeps Ireland and the United

Kingdom mostly ice free and the Scandinavian countries from getting too cold; it is what keeps the entire world from another Ice Age. This Thermohaline Circulation System is now dead in some places and dying in others.

▪ **Facts about exploitation summarized in keywords**

- Resources are exorbitantly overexploited
- Carbon dioxide (CO₂) emissions
- Chemical emissions
- Storage of nuclear waste
- Forest loss
- Loss of agriculture land
- Desertification
- Extinct species
- Days until the end of oil: what next?
- Destruction of nature and the environment

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

5. Health Care

Every year around 240,000 people are diagnosed with skin cancer in Germany – increasing tendency. Every year skin cancer sees an increase of five per cent. Today in April (2011), we already have a greater sun intensity than in August due to the thinner ozone layer.

Breast cancer in Germany: In 2010 59,510 women were diagnosed with breast cancer; 17,286 women died. According to statistics every ninth German woman gets breast cancer. If we calculate this over a period of 10 years we are talking about 600,000 women that get breast cancer: Over a period of 80 years that makes around 5 million women that have breast cancer, are cured or not, or died. How many in Europe as a whole? Estimates would suggest around ten times as many. Incredible suffering, psychically as well as physically and socially! The question remains: Did they all fall ill from highly toxic contamination? It cannot be smoking and the psyche can also not be the source.

People living in cities are 21 per cent more likely than those living in rural areas to fall victim to anxiety disorders. In the case of depression it rises to 39 per cent... Researchers assume that the cause lies in the fact that so many people live so close together... Already today more than half the world's population lives in cities – tendency increasing.

The widespread misuse of antibiotics is rapidly rendering them powerless against infection.

Each year there are about 440,000 new cases of multi-drug resistant tuberculosis, resulting in at least 150,000 deaths.

An estimated 25,000 patients in the European Union die each year from drug-resistant infections.

The world is on the brink of losing these miracle cures. In the absence of urgent corrective and protective actions, the world is heading towards a post-antibiotic era, in which many common infections will no longer have a cure and, once again, kill unabated." Most of the blame lies with doctors who overprescribe the drugs.

Another huge problem is the use of antibiotics in food-producing animals. Approximately half of all antibiotic production is used in agriculture. Factory farms routinely give perfectly healthy animals antimicrobials both as a precaution against infection and to promote growth.

Spain: Chronic illnesses from 16 years old: Hypertension (17.2%), Back pains (16.3%), Neck pains (14.2%), chronic allergies (12.0%), Migraines and frequent headaches (8.6%), obesity (16.0%), very overweight (37.7%), under weight at age 18-24 (8.4%), Men with moderate overweight (62.8%) and women with moderate overweight (44.6%).

▪ General overview - Health

- More than one billion (1.5 billion) people are overweight
- 2.3 billion adults will be overweight by 2015
- 4 billion people only have access to poor health services
- In the European Union over 30 million are undernourished
- More than a billion people suffer from diarrheal diseases
- Respiratory infections, HIV/AIDS, and tuberculosis
- Huge illnesses caused by dirty water and malnutrition
- Diseases caused by bacteria, viruses, fungi and other parasites
- Hunger causes a variety of illnesses and millions of deaths
- Alcohol is a major cause of serious illnesses
- Chemical products and fine dust everywhere influence health
- Health care expenditure per day: \$7.300.000.000
- 1 billion people have no access to health services

▪ Single facts

a) Health care:

- 1 billion have no access to health services and another 4 billion only to poor health services.
- 99 percent of the 536,000 maternal deaths each year occur in the developing world.
- Every year 1.5 million children die due to illnesses caused by dirty water.
- Every year 11 million children under the age of 5 die, half of them due to malnutrition.
- In the European Union more than 30 million people are undernourished, especially people in hospitals and nursing homes, but also 5-15 % of the population in general.
- Germany: Every year around 600,000 hospital patients get infected with dangerous germs. Up to 40,000 patients die every year as a direct result of insufficient hygiene in hospitals.
- Medicare fraud costs Americans US\$60 billion each year.

b) Diseases:

- Diseases caused by bacteria, viruses, fungi and other parasites are major causes of death, disability, and social and economic disruption for millions of people.
- Over 9.5 million people die each year due to infectious diseases – nearly all live in developing countries.
- Among children under 5 years of age in low-income countries, infectious diseases cause nearly 70 percent of all deaths.
- Infectious diseases, including HIV/AIDS and lower respiratory infections, cause nearly 40 percent of all deaths in low-income countries and about 18 percent of deaths globally.
- Worldwide, lower respiratory infections, HIV/AIDS, diarrheal diseases, and tuberculosis are among the top 10 causes of death; these diseases along with malaria account for the top 10 causes of death in the developing world.

- An estimated 30-40 million people live with HIV/AIDS with 2.4-3 million deaths every year.
- Over the past 30 years, more than 25 million people have died from AIDS. In 2008, 430,000 children under the age of 15 were infected with HIV and 270,000 died of AIDS. In addition, about 15 million children have lost one or both parents due to the disease.
- 350-400 million Malaria cases are registered per year; with one million deaths.

c) Obesity:

- 50.1 percent of adults across the 27 EU nations are overweight or obese based on the BMI (body mass index) values.
- There are 1,160,000,000 overweight people on earth today.
- Calculations predict that in 2015, 2,300,000,000 adults will be overweight and more than 700,000,000 will be obese (corpulent).
- 2010: more than 72 million adults in the USA suffer from obesity which has turned the condition in to a major public health threat.
- Money spent due to obesity in the USA per month: estimated \$80,000,000 and per year approximately \$1,000,000,000; on weight loss programs: \$35,000,000 per month.

d) Chemical products:

- Around 100,000 chemical products are used in Europe. More than 700 carcinogenic elements are present everywhere in the environment of everyday life. They can be found in food, water, soil, air, furniture, electrical devices, computers, carpets, cars, paintings and clothes. Heavy metals in high concentration can also be found in animal bowels, fish and sea food.
- Poisonous substances can be found in food, in the soil, in the air, in the sea, and then in the body of humans.
- About one in three people in the UK will get cancer due to contamination.
- One of four German people in the future will die due to cancer.
- The animals we eat are given large amounts of antibiotics and this not just when they are sick: healthy animals can be fed antibiotics every day because it makes them grow bigger and faster. As a result, people are getting sicker and sick people are taking longer to get well. The day will come that antibiotics will be over – thanks to chicken farms.
- The sewage that goes into the sea is full of traces of medicines. When eating fish we take in these chemical elements into our bodies. What will be the result for pregnant women and children in the future?
- 11 million Canadians go to hospital every year due to food poisoning (especially from chicken).

e) Results of the Zeitgeist:

- 1,200,000 suicides per year around the globe; that is 1,200,000 human beings!
- Abortions worldwide: more than 40 million per year.
- Over one in 5 Americans has a personality disorder due to alcohol or drug abuse.
- In Europe people spend 11 billion euros on ice cream, 50 billion euros on cigarettes, and 105 billion euros on alcohol.

- Alcohol is a major cause of serious illnesses and early deaths. Exaggerated consumption of alcohol plays a serious role on traffic accidents, crimes, violation, home and working place accidents, arsons, etc.
- Stress, work stress, time pressure and traffic jams result in people constantly being tense. Blood pressure, blood sugar and serum lipid levels increase with stress. Stress promotes cardiovascular diseases such as arteriosclerosis, high blood pressure, heart attacks and strokes.

▪ The anti-smoking law

It is said: 6 million people die each year due to the abuse of tobacco around the world. In Germany 140,000 people die every year as a result of smoking; In Spain there are 9.5 million smokers. 56,000 Spaniards die of smoking annually.

In many countries the so-called anti-smoking laws have been implemented, also in Spain. Smoker statistics, which supposedly justify this law, are a complete charade, a monstrous lie and scientifically lacking credibility. This new law serves four purposes:

1) The citizen has to categorically learn to obey the government, even if the orders from the state and the underlying laws are absurd and economically extremely damaging. This is called: generalized conditioning of behavior, the adoption of standards and laws, and thus it serves to prepare people for much tougher and more absurd laws that are already planned.

2) Nobody shall identify that diseases of the respiratory system are in the most part a result of completely different carcinogenic sources:

- Pollution
- Contamination
- Chemicals everywhere in daily life
- Heating
- Oil refineries
- Chemical factories
- Coal mining industry
- Gold mining industry
- Other mines sourcing for raw material (operating with chemicals)
- Chemical substances in goods
- Chemicals in food and drinks
- Asbestos
- Agriculture industry (chemicals such as pesticides and fertilizers)
- Car emissions
- Fine dust emissions from cars (diesel, break pads, tyres, tarmac)
- Fine dust and chemical emissions from airplanes
- Chemical emissions from the auto industry
- Chemical emissions from the chemical and paint industry
- Pesticides in the agriculture and cotton industry, etc.
- Carcinogenic toxic elements (to promote addiction) added to tobacco

Example: On a bad day, breathing in Mumbai's (or Malaga's) inversion-trapped air is the equivalent of smoking two and a half packs of cigarettes.

Example: After a certain amount of time, the lungs of a person who smokes 40-50 cigarettes a day, do not look worse than those of a person that lives in a traffic prone area of a big city.

Has a doctor ever investigated the cause of human deaths in reference to all these much more toxic substances affecting all the everyday environments of people? Are these people not dying from the trillions of tons of carcinogenic emissions and not from smoking?

Aren't many more people dying around the globe every year as a result of the morbid psychological deformations of the leaders in politics, economy and religion, i.e. by delusional wars and exorbitant, perverse and psychopathic material and spiritual exploitation of 5-6 billion people and resources worldwide?

3) The creation of the scapegoat:

- The smoker is at fault.
- The smoker is the bad person.
- The smoker makes others ill.
- The smoker is a danger for society.
- The smoker kills other people ("passive smokers").
- One has to beware of smokers.
- One has to denounce smokers (when they smoke in prohibited places).
- One has to always give severe punishment, if there is a lack of obedience.

Denunciation is a key element of the American "One World Order". On top of this the new law distracts people from the dramatic local, national and global financial crisis and monstrous global contamination.

4) The new anti-smoking law influences social behavior: Smokers talk and like to discuss for hours on end at bars, cafes and restaurants. They criticize politics; talk about the financial crisis, unemployment, social unrest, revolts and demonstrations, and especially about their governments. They share their sorrows and pains, etc. This must be prevented. This new law cuts such discussions in half or completely eliminates them because smokers go less to bars, less to restaurants; or they only stay for a very short time.

The motto: Divide your enemy! The damages go to the hospitality industry and in the end to the entire population, which once again falls into the hands of dictatorship?

Conclusion: Respiratory illnesses and especially cancer are the result of a concentrated combination of many chemical elements and fine dust in the air, in our environment, from the industry, and also as a result of the chemical elements (including pesticides) in cigarettes.

Example (Spain): There is a Restaurant owner in Marbella, who has fought against this new anti-smoking law. He even traveled all the way to Madrid and Bilbao to

collect signatures and money. He is refusing to implement the new law and backing his protest with solid arguments.

The Junta de Andalucia reacted with a nuclear strike: 145,000 euros fine for this rebel and an additional 10,000 euros fine from the local Marbella government. On top of this there is talk of revoking his business license. The restaurant has since been closed via court order. The next option for stubborn rebels amongst the population is a multiple nuclear strike: 600,000 euros fine and a possible prison sentence.

This extremely disproportionate response is an abuse of power! This perversion of power only exists because those who have the power are effectively perverted. i.e. they are psychically ill. The reaction of state authority also shows they have no wish to apply reasonable measure. They can neither talk nor convince. They have no desire for dialogue. They can only smash with brutal force because their psychical morbidity satisfies itself on the lust of this injury. This is fascistic dictatorship. This is the Nazi spirit.

The only response is simple: Whoever gave the order to this absurd nuclear strike of a swingeing fine and the closure of the restaurant must be imprisoned in an educational correction facility and working camp in Siberia for at least 10 years. In addition they must themselves pay this 145,000 euro-fine. Additionally their souls will be banned from Paradise for the next 1,000 years. Those that carried out the order will also be punished at 50% of the mentioned amounts.

▪ **Mental disorder and disease**

Mental health problems are costing Scotland £10.7 billion a year... The report said almost one in six working people in Scotland have poor mental health, such as depression or anxiety.... They also estimated employers lose £439 million a year through absence caused by mental health issues – 20% more than in 2004-05. The total lost rises to £2bn a year if other factors, such as staff attending work but being less productive because of hidden problems, are included.

Dementia: The total estimated worldwide costs of dementia will exceed 1% of global GDP in 2010, at US\$604 billion. About 70% of the costs occur in Western Europe and North America. The report reveals that the number of people with dementia will double by 2030, and more than triple by 2050.

Increasingly psychical disorders are the reason for absences at the work place. Thus producing damages to the economy in the billions.

According to statistics from Germany, in 2006, depression caused damages of 26.7 billion euros to the economy.

The consumption of antidepressants has tripled in the last 10 years in Spain... The spending on antidepressants represents 47 per cent of the pharmaceutical spending on mental health in Spain.

In the European Union, the most common disorders are anxiety disorders and depression. By 2020 it is expected to be the number one illness in the developed world.

The WHO has determined that 58,000 people commit suicide every year in the European Union.

People that keep on working with depression instead of seeking treatment cause a damage of 9 billion euros. A person suffering from depression at the workplace performs half an hour to two hours less than a healthy colleague. 5.2 billion euros is the sum of the direct costs of treatment. On top of that the cost from the incapacity to work. The total sum for the economy amounts to 15.2 billion up to 22 billion euros. Every year depression drives around 14,000 people to commit suicide.

One of 100 adolescents between the age of 14 and 18 falls into the grip of anorexia, while 2.4% develop bulimia. Chronic anxiety (6.0%), diabetes (5.9%), depression (5.3%) and asthma (4.3%). All these problems, except for diabetes, have a higher presence in women than in men.

According to data released by the United Nations, three out of every 100 Spaniards is a cocaine addict, making Spain the most addicted country in Europe...19% of all European cocaine addicts are in Spain

In 2008, with over \$14 billion in sales, antipsychotics became the single top-selling therapeutic class of prescription drugs in the United States, surpassing drugs used to treat high cholesterol and acid reflux.

Once upon a time, antipsychotics were reserved for a relatively small number of patients with hard-core psychiatric diagnoses – primarily schizophrenia and bipolar disorder – to treat such symptoms as delusions, hallucinations, or formal thought disorder. Today, it seems, everyone is taking antipsychotics. Parents are told that their unruly kids are in fact bipolar, and in need of anti-psychotics, while old people with dementia are dosed, in large numbers, with drugs once reserved largely for schizophrenics. Americans with symptoms ranging from chronic depression to anxiety to insomnia are now being prescribed anti-psychotics at rates that seem to indicate a national mass psychosis.

▪ **Smoker lies**

New research from the Århus University Occupational Medicine Institute shows that Chronic Obstructive Pulmonary Disease (COPD) is not, as generally believed, only a smoker's disease.... According to the survey, some 65,000 Danes have contracted COPD, which in Denmark is also known as Smoker's Lung, without their illness having any connection to tobacco smoke.

Smoking and nicotine have therapeutic effects:

A new study adds to the previously reported evidence that cigarette smoking protects against Parkinson's disease.

The benefit concerns restenosis, that is, the occlusion of coronary arteries. Smokers have much better chances to survive, heal and do well.

Since the benefits of smoking are too numerous and consistent to be attributable to error or random chance, it follows that the established truth asserting that smoking is the cause of (almost) all disease cannot be true – a reality that dramatically clashes with the gigantic corruption of public health, its pharmaceutical and insurance mentors, institutions and media. Therefore, it is constantly suppressed in the interest of public health, but not of the people.

Smokers are actually at lower risk from gum disease.

From the apparent shielding effect against Parkinson's and Alzheimer's diseases to the more intangible benefits associated with well-being and tranquility, smoking tobacco in many ways is definitely good for health: "Smoking Protects against Parkinson's Disease" or "Smoking protects against Alzheimer's Disease," or "Smoking protects against Ulcerative Colitis".

Children of mothers who smoked at least 15 cigarettes a day tended to have lower odds for suffering from allergic rhino-conjunctivitis, allergic asthma, atopic eczema and food allergy, compared to children of mothers who had never smoked.

Carbon monoxide is a by-product of tobacco smoke. A report indicates very low levels of carbon monoxide may help victims of heart attacks and strokes. Carbon monoxide inhibits blood clotting, thereby dissolving harmful clots in the arteries.

Smoking may act as a preventative for developing a skin cancer that primarily afflicts elderly men in Mediterranean regions of Southern Italy, Greece and Israel.

Those who smoked cigarettes for more than 4 pack years (i.e., number of packs per day multiplied by the number of years of smoking) were found to have a statistically significant 54 percent decrease in breast cancer incidence when compared with carriers who never smoked.

Nicotine reduces circular muscle activity, predominantly through the release of nitric oxide-this appears to be 'up-regulated' in active ulcerative colitis. These findings may explain some of the therapeutic benefit from nicotine (and smoking) in ulcerative colitis and may account for the colonic motor dysfunction in active disease.

A statistically significant inverse relation between smoking and Alzheimer's disease was observed at all levels of analysis, with a trend towards decreasing risk with increasing consumption.

The benefits of smoking tobacco have been common knowledge for centuries. From sharpening mental acuity to maintaining optimal weight, the relatively small risks of smoking have always been outweighed by the substantial improvement to mental and physical health.

Most people around the globe are highly affected from mental disorder (disease) and from deformed or degenerated psychical functions:

- Depression
- Social phobia
- Chronic anxiety
- Stuttering
- Sleeping disorder
- Alcoholism
- Headache and migraine
- Speech disorder
- Personality disorder
- Behavior disorder
- Learning difficulties
- Family disruption
- Squalidness (waywardness)
- Aggressive behavior, violence
- Addictions (drugs, medicine, gambling, etc.)
- Morbid (psychopathic) relationships
- Neuroticism
- Narcissism
- Psychopathy
- Perversion
- Sadism
- Emotional stress
- Megalomania
- Aberration
- Schizophrenia
- Religious psychosis

▪ **Psychical health in industrial countries**

Let's take Germany as an example of an industrialized country with 80 million citizens. Figures have been collected from the media during the period 2006-2010. The figures obviously vary from year to year or source to source. The picture as a whole is important:

- 9 million suffer from depression (with 20% having suicidal intentions)
- 10 million suffer from migraine
- 3.2 million stutter
- 8 million have social phobia
- 5 million are dominated by chronic anxiety
- 8 million are at risk to become alcoholic
- 1.6 million are alcoholic and 25,000 die of alcoholism
- Exaggerated alcohol consumption produces economic damages of €20 billion.
- Over 0.65 million suffer from cardiac fibrillation
- Every tenth woman has breast cancer (47,000 new cases 2010)
- One million occasionally have thoughts of committing suicide
- One out of two (three?) people suffer from some sort of sleeping disorder
- 11 million suffer from chronic pains
- 0.8 million have Alzheimer's disease
- 8 million suffer from diabetes B ("prosperity disease")

- 3 million have headaches on a daily basis
- 7 million are plagued by impotence
- 35-45 million are affected by constipation
- 50% of all adults and youth are overweight
- More than 4 million suffer from skin allergies
- Every eighth citizen suffers from respiratory allergies
- Every second child is overweight and suffers some sort of postural deformity
- 1 million children suffer from asthma
- 14 million young adults have hearing damage (excessive volumes from Mp3 players and nightclubs)
- Every 5th child in the pre-school-age has speech disorder (lack of parental communication)
- Every fifth citizen suffers from stomach burns
- More than 50% suffer from spinal and other back pains
- 90% of all children have a headache either occasionally or very often
- Millions are addicted: drugs, medicine, gambling, consumption, chocolate, eating, etc.
- Over one million people live in poverty
- 70% of all medicaments are consumed by people over the age of 65
- One out of three marriages will end in divorce
- Every tenth child is a victim of violence within its own family
- Every third act of violence happens in a marriage (relationship) and family environment
- In one out of 3 relationships, 50% of women and 50% of men are violent
- Over one million children live on social welfare
- Two in three nursing home residents are badly or not sufficiently nourished.
- 6.3 million people are severely disabled (main cause: accidents)
- Out of 4 million unemployed there are 30% psychically ill from their situation; More than 6 million criminal acts committed per year
- Around 400,000 traffic accidents with over 6,000 victims and 0.5 million seriously injured
- 5-8 million people live in permanent sadness due to losing a beloved person through a car traffic accident
- Millions live in a permanent fear of becoming unemployed, lack of money, catastrophes, terrorism, war, weapons of mass destruction, etc.
- In Germany today there are 360.000 physically or psychologically handicapped children.
- Depressions produce costs (including economic damages) of more than 30 billion euros per year.
- Nearly 10,000 people committ suicide every year. Three of four are men.
- An estimated 100,000 people try to committ suicide.
- Billions of euros of damages each year due to psychical stress at the workplace.
- More than one of three Germans will become dement and require special care.
- Nearly one of two women must expect to get Alzheimer's disease.
- 1.2 million Germans have got Alzheimer's disease; with figures increasing yearly.
- New governmental statistics in January 2011: 400,000 Germans have fallen into the trap of compulsive (pathological) gambling – in Germany officially declared as a mental illness.
- Additionally, we have to point out millions of people in the following categories: separated and divorced, partly analphabet, lonely, bedraggled, victims of the

economic crisis, victims of accidents, victims of medicine, victims of justice and administration, claimants from environmental catastrophes, homeless, people suffering from stress (noise, pollution, contamination, hunger, cold, etc.).

Is this a society that people want? It is a perverted, thoroughly sick and mad society!

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

6. Transport Systems

▪ Cars and public transport

- Road Traffic Accidents (RTAs) result in 1.2 million deaths and 50 million injured every year.
- Over the last 50 years more than 60 (100?) million people died and 2.5 billion people were injured due to RTAs.
- WHO: The global annual cost of Road Traffic Accidents is almost 518 billion US dollars.
- 10% of all hospital beds are occupied by RTA-victims.
- In 2008, 380,000 people died in Europe as a result of fine dust from road traffic; and millions more around the globe.
- Cars produced in January 2011: 4,500,000; for 2011 as a whole, expectations are 65-70,000,000 (as China enormously increases its car production).
- In 2007 an estimated 73 million cars were produced.

▪ Car and lorry traffic pollution

- 1) Exhaust gases, including fine dust (diesel)
- 2) Fine dust from the abrasion of tyres
- 3) Fine dust from the abrasion of driving surfaces
- 4) Fine dust from the disk brakes
- 5) Traffic noise is also considered as an extremely unhealthy emission

▪ Train pollution

Fecal fine dust, fine dust from rail abrasion and iron wheels.

▪ Aviation pollution

Fine dust, gases and noise (civil, military, sport)

▪ Wrecks

Wrecks of cars and lorries or trucks, all kind of transport vehicles, also trains and airplanes leave behind dangerous metals and chemical elements.

▪ Oil tankers

Oil tankers, pipelines, and oil derricks produce – especially catastrophic accidents – produce an incredible amount of destruction of the world of animals and nature, including sea and oceans. Contamination of soil and drinking water has dramatic long term effects on nature and humans.

▪ Some examples

- In Germany 55% of the driven car-kilometers are due to holiday and leisure travelling.
- Special holiday pollution: A cruise ship produces the same amount of fine dust as 50,000 cars driving at 130 km/h.

- There is an enormous demand for petrol, diesel, ceresin, and oil; not only from private traffic; probably even more from military use.
- High speed trains consume a lot of electricity and also produce fine dust.
- Traffic noise is also considered an extremely unhealthy emission.
- There are estimated 1.5-2 billion cars and other motor-vehicles (eg. Lorries, vans, etc.) in use worldwide; all producing pollution, contamination, accidents, etc.
- In the air inside certain car models, traces of more than 100 different chemicals can be detected - some of them can cause cancer. Source: Degassing plastics and solvent-based adhesives and coatings. Carcinogenic substances in the interior of a car are not uncommon.
- The concentration of toxins from traffic congestions such as the cancer-causing benzene is about five times as high in the car as in nature. The concentration of toxins in the car also rises sharply when one is stuck in traffic.

▪ Negative implications of transport systems

- Road Traffic Accidents with millions of victims, injured and handicapped people
- Sea traffic accidents (oil tankers) producing mega damages to the environment
- Waste from ships and other vessels thrown directly into the sea (ocean)
- Car and lorry traffic pollution
- Train and airplane pollution
- Cruise ship and in general vessel pollution
- Wrecks of cars, vans and lorries
- Oil tankers
- Noise pollution
- Negative impact into nature, sea life and sea nature
- Enormous global demand of petrol, diesel, kerosene and oil
- Trains, especially high speed trains: high demand of electricity

▪ Car production: from raw materials to the owner of a car

Raw materials needed: Glass, steel, plastic, copper, lithium, aluminum, iron, plastic steel, wood, cotton, rubber, coconut fiber, chemical elements, detergents, oil, electricity, water, rare elements, paint, leather, and much more.

Exploitation of prime resources produces (mines): destruction of environment, chemical and fine dust contamination (soil, air, and water), very low wages (poverty), exploitation of people, illnesses (cancer), low life expectations of the workers, etc.

Probably more than 1.5 billion people work within this “car production” chain from raw material exploitation to the final buyer of a car including the car maintenance during an average of 15 years (accidents, repair and service, cleaning, traffic lights, car washing, etc.), including insurance providers and damage management (banks for loans, lawyers, insurance companies, police, repair of lateral damages, hospitals, and doctors), and the recycling of the cars.

We must also calculate the millions of machines and tools, including high tech apparatus (robot and conveyor high tech), that are needed to maintain this production chain. Above that during winter there are even more costs: snow removal or salt against ice on the roads, and road damages in general.

Hundreds of thousands of components suppliers are working for the car industry. The effects include: High electricity demand, contamination and environmental destruction (pollution).

Another estimated 100,000,000 people are working in the car repair and service industry, the road building and road repair, including technical equipments and all kind of services (required for road maintenance). Every 2 years or once a year, depending on the location, a car must be checked and get the “technical inspection” stamp for another year.

Not to forget the building constructions for every factory or office building, for the service and administration offices (plus furniture, equipment, stationery) and for the workshops (plus equipment, furniture, stationery).

Global transport of raw material, car components and cars produce: contamination (of air, soil, sea, and oceans), health problems (fine dust), oil, environmental damages, etc. This is a contribution together with the general car traffic to forest decline, to environmental pollution, and illnesses of people.

The car production business is gigantic. These businesses need marketing, an IT-infrastructure, stationery, ink (millions of liters with fine dust emissions), all kind of administration tools, etc. Technical infrastructure requires a maintenance service. Hundreds of millions of emails need to be sent, additionally the costs for internet, telephones, and cell phones.

The best business in the whole lifeline of this “product”: from the resource exploitation until the “end” of a car life (recycling), the governments make huge sums of money from taxes, duties and VAT and this every time an element or component “changes hands”.

Most of the working people in this chain need a car themselves or need public transport to travel to their workplace: more petrol and more contamination! Effects: contamination and environmental destruction (pollution), including billions of unproductive hours wasted on “traveling” per year.

In the end we should not forget: traffic accidents produce more than one million fatalities and several millions of injured people every single year. There are additional costs and institutions working for: unemployment, handicapped people, loss of manpower, orphans, as well as separation and divorce due to dramatic changes in a family life as a consequence of car traffic accidents, etc.

Identify the lunacy: within the next 20 years an estimated 1.5-2 billion cars will be produced around the globe! Conclusion: fantastic business for the owners of the factories in the production chain, for the CEOs and for some car dealers. But it is lethal for the planet and for the entire humanity!

▪ **Main profiteers**

- Car and car supplier industry
- Mining industry
- Oil industry
- Governments: tolls, taxes and other fees (yearly)
- Insurance companies
- Hospitals, clinics, doctors
- Lawyers
- Car dealers
- Repair and service industry

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

7. Economy and Industry

Fed: The Federal Reserve is the central banking system of the United States of America.

The Fed sent billions in bailout aid to banks in places like Mexico, Bahrain and Bavaria, billions more to a spate of Japanese car companies, more than \$2 trillion in loans each to Citigroup and Morgan Stanley, and billions more to a string of lesser millionaires and billionaires with Cayman Islands addresses.

US 2011: the rich Upper Class is doing just fine. In 2009, the richest 5 percent claimed 63.5 percent of the nation's wealth. The richest 20 percent of Americans own 84 percent of all wealth. The overwhelming majority, the bottom 80 percent, collectively hold just 12.8 percent.

Former International Monetary Fund (IMF) Chief Dominique Strauss-Kahn was charged and jailed in the US for sex crimes on May 14th after his discovery that all of the gold held in the United States Bullion Depository located at Fort Knox was 'missing and/or unaccounted' for.... The Central Intelligence Agency (CIA) who provided him 'firm evidence' that all of the gold reported to be held by the US 'was gone'.... Gold is regularly exchanged between countries to pay debts and to settle the so-called balance of trade.

The leading commodity trader Glencore is valued at 69 billion US Dollars... Barclays estimates that Glencore's net income of 3.8 billion US Dollars last year will double to 8.86 billion US Dollars by 2012.

In Germany experts registered 924,000 cash-millionaires last year, an increase of 7.2 per cent... The study shows Germany at third place, after Japan and the United States. The most super rich are found in North America, precisely 3.4 million millionaires. The Asian-Pacific regions follow with 3.3 million millionaires. Expensive status-symbols and asset values such as property, luxury cars or art collections are not taken into account.

In 2010 there were around 10.9 million super rich around the globe, an increase of 8.3 per cent compared to 2009. The total sum of liquid assets, that the global financial elite disposes of according to the statistics: 42.7 trillion dollars, that is around 30 trillion euros.

German private investors – from the multi-millionaires to the unemployed – have amassed a fortune of 5.2 trillion (5,200 billion) euros.

The rich are becoming richer and there will be more of them: In industrialized nations the number will increase to 55.5 million by 2020.

The wealth amassed by millionaire households is set to increase by more than 100% over the next 9 years. From a total of \$92 trillion held by the world's richest in 2011, by 2020 the world's millionaire households will possess \$202 trillion, or roughly 4

times current global GDP. Even though much of move up is attributed to the wealth surge in the developing world... the biggest beneficiary is the United States where the millionaires (those with net wealth of at least \$1 million), who currently account for \$38.6 trillion of total wealth, will see their assets increased by 225% to \$87.1 trillion!

According to one analysis, the total wealth of millionaire households in the 25 economies is forecast to grow from \$92 trillion in 2011 to \$202 trillion in 2020.

The U.S. and Europe will remain the global centers of wealth over the next decade.

In the U.S. in 2020 will likely reach \$87 trillion, from \$39 trillion in 2011.

The World Economic Forum says that we need to grow the total amount of debt by another 100 trillion dollars over the next ten years to “support” the anticipated amount of “economic growth” around the world that they expect to see.... The entire global financial system is a gigantic Ponzi scheme. It is designed to keep everyone enslaved to perpetual debt.

The global economy is built on the erroneous belief that the marketplace—read human greed—should dictate human behavior and that economy can expand eternally.

Around 40 million more working poor at the extreme level of US\$ 1.25 a day in 2009 than would have been expected in the absence of the global economic crisis.

An estimated 630 million workers (one in five workers in the world) were living with their families at the extreme level of US\$ 1.25 a day in 2009.

Increasing poverty and misery trigger street protests in the Middle East, Africa and Europe.

Rich rulers

In 2003, Yassir Arafat, Palestine, had a fortune of around 300 million dollars. With which he belonged to the ten richest rulers of the world.

Other super rich rulers include the Crown Prince of Saudi Arabia, the Sultan of Brunei, Hans Adam II of Lichtenstein, the Iraqi President Saddam Hussein and the British Queen Elizabeth II. Also on the list you can find the Queen of the Netherlands and Cuba's President Fidel Castro. They all did not make their fortunes with successful ventures.

In more recent lists of high net worth chiefs of state one finds the names of many Arabic oil Sheikhs as well as the King of Thailand, Italy's Silvio Berlusconi, Chiles President and former Prime Minister of Lebanon, Saad Hariri, whose father Rafik Hariri, had amassed millions in Saudi Arabia.

The Pakistani President Asif Ali Zardari, widow of the murdered Benazir Bhutto, was marked as “inexpressibly corrupt”. His wealth is estimated at 1.8 to 4 billion US Dollars.

Also in Africa one can find multi-millionaires, such as the King of Swaziland, Mswati III, who is known for his many cars, many palaces and many women.

The wife of the Tunisian President Zinedine Ben Ali is alleged to have taken 1.5 tonnes of Gold.

In 2009, around 10 million people held financial assets worth more than 1 million US Dollars. Nearly every 100th millionaire has financial assets worth more than 30 million US Dollars, qualifying them as so called super rich. This group held 35.5 per cent of the entire wealth of all millionaires in 2009.

The average millionaire in India will be richer than his counterpart in the US. By 2020, China’s rich will hold a fortune of 3.6 trillion (3,600 billion) US Dollars Chinese, ranking amongst the top ten richest nations. By 2015 Singapore’s millionaires are predicted to hold an average wealth of 4.5 million US Dollars.

The richest of the rich is no longer an American, but instead a Mexican, the Telecom tycoon Carlos Slim. He leads the list of 1029 billionaires with an estimated wealth of 74 billion US Dollars. Next on the list is Microsoft’s Bill Gates, with 56 billion US Dollars and investor Warren Buffet with 50 billion US Dollars. Had Bill Gates not donated 28 billion US Dollars, he would still remain in first place.

The richest European, Bernard Arnault, is in fourth place, with 41 billion US Dollars. The Frenchman owns the luxury goods empire Louis Vuitton-Moët Hennessy (LVMH).

It wasn’t the Bank managers that skimmed of the most. With a yearly salary of 84.3 million Dollars the boss of Viacom (MTV, Paramount, Nickelodeon), Philippe Dauman, led the way. Software producer Oracle’s Larry Ellison, came at second place with 68.6 million Dollars. Third place was granted to TV mogul Leslie Moonves, from CBS with 53.9 million Dollars.

The media bosses came at the top of the ranking. Other big earners included Ford CEO Alan Mulally (25.8 million dollars), IBM boss Samuel Palmisano (24.1 million dollars) and oil corporation ExxonMobil’s Rex Tillerson with 21.0 million dollars. The best earning German was the former Siemens CEO and today’s CEO of the Aluminum producer Alcoa, Klaus Kleinfeld, with 12.2 million dollars.

Further examples (2010):

Linde, Wolfgang Reitzle: 2010 Salary 5.45 million euro; Stock options included total of 6.95 million.

Volkswagen: CEO Martin Winterkorn Salary 9,3 million euros.

Daimler-Boss Dieter Zetsche: Salary 8,7 million euros

Josef Ackermann, Deutsche Bank, Salary 8,9 million euros

Peter Löscher, Siemens, Salary 8,9 million euros

Jürgen Grossmann, RWE, Salary 6,6 million euros
Michael Diekmann, Allianz, Salary 5,8 million euros

Israel has 6,000 millionaires and 6 million beggars. Over the last five years, the average income in Israel has increased by 17% and food prices by 25%. Water rates have gone up 40% and gasoline by 23%. The average apartment price has gone up 55% and rent by 27%.

▪ **Distribution of wealth**

- 2% of the earth's population (approx. 13 million) own more than 50% of the world's wealth.
- The poorest population, 40% of the earth population, disposes of 5% of the global income.
- The richest population, 20% of the earth population, disposes of 75% of the global income.
- Millionaires hold 38% of the global wealth.
- 10 million people dispose of a wealth of more than \$1 million. One of 100 of these millionaires disposes of more than 30 million.
- The world's richest 1% owns 40% of all the wealth, a UN report discovers.
- 10 million millionaires dispose of USD 41 trillion (2008), home values not included.
- In 2009 the world has 793 billionaires and the net worth of the world's billionaires stands at USD 2.4 trillion.
- The top 20 percent of Americans has 93 percent of the nation's financial wealth and the bottom 80 percent has a mere seven percent.
- During the economic crisis the wealth of the 400 richest Americans actually increased by \$30 billion. Collectively, those 400 have \$1.57 trillion in wealth.
- The HNWI (High Net Worth Individuals) in the U.S., Japan and Germany together accounted for 54% of the world's HNWI population in 2008; wealth of HNWI for 2013 forecast: \$48.5 trillion.
- Germany 2010: Public debt rises to nearly two trillion euros: The debts of the German Federation rose nearly 22 per cent (230.3 billion euros) to 1,284 billion euros. The debt of the German States stood at 595.3 billion euros at the end of 2010. The debt of the municipalities and local authorities stood at 119.4 billion euros.
- Germany has 103 billionaires. The number of millionaires in Germany rose by 60,100 people in 2009 or an equivalent of 11 per cent up to 779,300.
- In 2009, 221,700 dollar millionaires lived in Switzerland, around 19.7 per cent more than in 2008. Switzerland is amongst the richest nations on earth. 4,000 inhabitants take home a yearly income of over 1 million Swiss francs. 3 per cent of the private taxpayer's possess the same amount of wealth as the remaining 97 per cent. The generation of the over 65 year olds possesses more than half of the private wealth in the whole nation. If we take the real estate assets, pension funds and savings too that brings a sum of over 2,000 billion Swiss francs. Over 120 billionaires live in Switzerland (of around 1,000 billionaires around the globe).

▪ **Largest five personal landowners on earth**

- Queen Elizabeth II: 6.600 million acres

- King Abdullah of Saudi Arabia: 553 million acres
- King Bhumibol of Thailand: 126 million acres
- King Mohammed IV of Morocco: 113 million acres
- Sultan Quaboos of Oman: 76 million acres

Queen Elizabeth II, head of state of the United Kingdom and of 31 other states and territories, is the legal owner of about 6.600 million acres of land, one sixth of the earth's non ocean surface.

The Queen's land holding is worth a notional \$33.000.000.000.000. She is the only person on earth who owns whole countries, and who owns countries that are not her own domestic territory. This land ownership is separate from her role as head of state.

Her holding is based on the laws of the countries she owns and her land title is valid in all the countries she owns. Her main holdings are Canada, the 2nd largest country on earth, with 2.467 million acres, Australia, the 7th largest country on earth with 1.900 million acres, the Papua New Guinea with 114 million acres, New Zealand with 66 million acres and the UK with 60 million acres. This makes her the richest individual on earth.

The soul of such people will never see the light of God for at least 10,000 years. Comparison; a dream told me: Adolf Hitler's soul got 10,000 years of being far away from God and his light.

▪ **Since the end of World War Two the United States has**

- Endeavored to overthrow more than 50 foreign governments, most of which were democratically elected.
- Grossly interfered in democratic elections in at least 30 countries.
- Waged war/military action, either directly or in conjunction with a proxy army, in some 30 countries.
- Attempted to assassinate more than 50 foreign leaders.
- Dropped bombs on the people of some 30 countries.
- Suppressed dozens of nationalist movements around the world.
- Has spent over 50 trillion dollars on Israel.
- Has masterminded and dictated politics throughout the European Union.

▪ **Financial Crisis**

- The White House's 2012 fiscal budget: \$13 trillion in the red, the worst since World War II.
- The global financial crisis has slashed the value of financial assets by 50 trillion dollars (2008).
- The estimated total damage of the financial crisis 2009: 10,500 billion Dollar (7,300 billion Euros). The costs for each human on this earth would be: \$1,500.
- The total spent on stimulus should amount to \$4 trillion, or about 7 percent of global GDP, a roughly seven fold increase over current efforts.
- The collapse of the Spanish property market resulted in 300 billion Euros in bad debt.

- 5,000 CEOs and stockbrokers have destroyed 30% of the world's wealth; and they continue speculating.
- China had lent the United States another \$17.7 Billion. China is the largest holder of American debt to equal \$895.2 Billion.
- In the next decade the world needs 100 trillion more credit, so they say.
- The profits of the large American companies have reached record levels in the third quarter of this year (2010): Gains of over 1.6 trillion dollars were recorded.
- Egyptian President Hosni Mubarak and his family's net worth are estimated to be around \$70 billion (February 2011).
- Over the next five years, the UK government debt is expected to rise from £600 billion to £1.4 trillion, while the US national debt could double to \$10 trillion.

▪ **Global destructions of most societies**

- Bank losses: approximately \$1,600 billion
- Loss of real estate values (US and UK): \$4,650 billion
- Damage to the world economy: \$4,200 billion
- Destruction of asset values: \$50 trillion
- Financial Governments spent \$10.8 trillion on the "bail-out"
- \$3.6 trillion was spent on the bail-out in the US
- \$2.4 trillion on the bail-out in the UK
- \$3.2 trillion on the bail-out in other rich nations
- \$1.6 trillion was spent by China and other emerging nations
- The US spent the equivalent of 25.8% of its GDP
- The UK spent the equivalent of 94.4% of its GDP
- The financial burden for each US citizen is \$10,000
- In the UK the cost (debt) per person is \$50,000 (£31,250)
- Governmental dept in Germany Jan. 2011: 1,800,000,000,000 Euros
- The global debt clock shows (February 2011): \$39,000,000,000,000

Who pays for all this? The people, the citizens, and every single individual for the next 4-6 generations will have to pay for the moral attitudes and ineptitude of politicians and CEO's. Together with the yearly interest payments and the continued increase of governmental dept in the future, there is no end in sight for the next 200 years.

▪ **Costs of nuclear waste; example Germany**

Nuclear waste is very dangerous for the environment and humankind.

Restoration of old nuclear power stations, final storage of nuclear waste, relocation of unsafe nuclear waste storages, and maintenance of provisional and final nuclear storages will cost, for example for Germany, during the next two decades, at least 10 billion with highest probably two or three times more. This means: 20-30 billion Euros (as experts calculated). Such costs are not in the electricity bills that German citizens get today every month! Who will pay this in the future? The German citizens with their taxes will have to pay such enormous costs.

▪ Nuclear Power Stations

Seventy-six operating power stations in Japan, Taiwan, China, South Korea, India, Pakistan and the US are located in areas close to coastlines deemed vulnerable to tsunamis.

Of 442 nuclear power stations globally, more than one in 10 are situated in places deemed to be at high or extreme risk of earthquakes -- in Japan, the US, Taiwan, Armenia and Slovenia.

In every nuclear reactor in Germany there could be a meltdown. All the radioactive elements would be freed, destroying the environment completely in a radius of 400-500 kilometers.

Every reactor has a limited lifespan. At the end, what remains are thousands of tons of contaminated material. Disassembling is done by hand. That is time consuming and very expensive.

The cost of storing nuclear waste is high: 1.8 million tones is the weight of all the nuclear power plants "end material". A third of it, around 600,000 tones, is contaminated radioactively; 10,000 tones so much that they have to go to a nuclear waste repository. This waste has to be stored safely over decades, some even hundreds and thousands (up to one million) of years.

The whole process of dismantling a nuclear power plant costs enormous amounts of money. The bill is footed by the electricity consumer and as is often the case the state or better said the taxpayers.

In Germany the talk is of 3.2 billion euros until 2013 to dismantle one reactor. End storage several hundreds of millions of euros more. Add all this together and for the 17 currently operating nuclear reactors we reach a figure of around 55 billion euros.

▪ Mega Supermarkets

Example: Wal-Mart (USA)

The US mega-supermarket Wal-Mart has 2.1 million full-time employees. Wal-Mart is the largest company in the history of the world. Wal-Mart's revenue last year: \$405 billion. Wal-Mart would be the 23rd-largest economy in the world (if it was a country). Every week nearly one-third of the U.S. population visits Wal-Mart's U.S. stores. Wal-Mart is the largest overall employer in the USA, and the biggest employer in 25 states. Wal-Mart operates internationally under 55 different names.

Example: America's corporate tax rate

The tax rate is 35 percent. But 115 companies pay less than 20 percent in taxes. That's not even counting 37 companies like Citigroup and AIG that received more in tax credits than they paid.

Example: Tesco and Primark (UK)

Workers producing clothes for Tesco and Primark in the Bangladeshi capital Dhaka earn as little as 7 pence an hour for up to 80-hour weeks. British supermarkets are currently exploiting women workers and small scale farmers in poor countries around the globe.

A single mother, 39, with three children earns just 38 pence per hour picking fruit that ends up on Tesco's shelves. Some employees receive only the minimum wage, £13.97 a month, far less than the £44.82 needed for nutritious food, clean water, shelter, clothes, education, health care and transport.

Pesticide exposure: "Fruit pickers have no gloves or protective clothing and have to climb wet ladders and pick pears from the trees while they're still wet from pesticides."

▪ **US Health Care**

Approximately 46 million Americans do not currently have any health insurance at all. Approximately 41 percent of working age Americans either have medical bill problems or are currently paying off medical debt. US hospitals overcharge Americans by about 10 billion dollars every single year. Medical bills cause more than 60 percent of the personal bankruptcies in the United States.

The US health care industry has turned large numbers of doctors, lawyers, health insurance company executives and pharmaceutical company executives into multi-millionaires. America's five biggest for-profit health insurance companies ended 2009 with a combined profit of \$12.2 billion. There were more than two dozen pharmaceutical companies that made over a billion dollars in profits in 2008.

▪ **Lobbyism**

Over 17,000 lobbyists are working in Washington to influence the entire American government.

16,500 lobbyists are working to influence the European Union in Brussels.

In the US, corporations spent an average of \$200,000 a year on lobbying every politician elected to state legislatures.

The United States, the European Union and many other countries are significantly manipulated, dominated, controlled, abused and exploited by hundreds of thousands of Jewish and Zionist lobbyists, CEO's, institutions, personalities, secret service "Mossad" agents, (co-)owners of banks and corporate groups or educational institutions.

Nepotism, favoritism and informal understandings between businesses, officials and politicians in many places lead to inefficiency and gross waste of resources.

▪ Media

It is known that six major conglomerates that make up what is called the mainstream media or MSM control 90% of the shares of large media companies that, in turn, produce 90% of what is read, seen and heard by Americans. From the MSM, the American power elite maintain a systematic and effective control of information, not only within the U.S., but globally.

According to a Canadian magazine published by Global Outlook, six conglomerates control information and entertainment in the United States and in much of the world. They are:

DISNEY, owner of ABC, Touchdown Pictures, Buena Vista, Hollywood Pictures, Caravan Pictures, Miramax Films, the production of documentaries A & F, TV History Channel, Discovery, Disney and others; AOL / Time Warner, which owns CNN, HBO, Warner Brothers, Castle Rock, Time, Sports Illustrated, People, Fortune, Entertainment, Money, Netscape and others;

VIACOM, which includes CBS, Paramount Pictures, Simon & Schuster, Pocket Books, Blockbusters, Showtime, MTV, The Movie Channel & Nickelodeon, BET, Nickelodeon, etc..;

GENERAL ELECTRIC, owner of NBC, CNBC, MSNBC, Bravo, Universal Pictures, and thirteen television stations, and closely linked to the arms and aerospace industries;

RUPERT MURDOCH'S NEWS CORPORATION, owner of Fox TV, DirecTV, TV Guide, New York Post, The Weekly Standard, 20th Century Fox, MySpace and others;

Bertelsmann AG, one of the world's largest media corporations, has the European RTL-TV, Random House, Bantam Dell, Doubleday, Alfred A. Knopf, Vintage Books, and others.

The first five are registered as American and the last one is German. It would make sense to find out who the owners are of the most important media groups around the globe. They represent a religion, an ideology, financial interests of the elite, and an orchestrated media power strategy in order to influence (condition, brainwash, manipulate) humanity.

It is also of highest importance to find out what the media do not say about the state of humanity and the earth, and the hidden actors of politics, religion, economy, industry and media.

Implementing the One World Order is not a conspiracy! Media are the modern propaganda tools used to prepare the people for the global dictatorship. They are all supposed to operate in the interest of the United States and Israel (Zionism). The United States and the European Union are supposed to be victim of the Zionists'

mission, a copy of Hitler's Reich vision. If this is only conspiracy, it is a very serious question.

▪ **The Capitalistic Principles**

An example:

Media in Singapore claim that fake rice is being distributed in the Chinese town of Taiyuan, in Shaanxi province. This "rice" is a mix of potatoes, sweet potatoes, and plastic. It is formed by mixing the potatoes and sweet potatoes into the shape of rice grains, then adding industrial synthetic resins. The low cost of the fake rice is allowing wholesalers to make huge profits.

Another example:

The Brazilian iron-ore corporate group Vale made a net profit of 17.3 billion USD in 2010, tripling the figure of the previous year. What isn't accounted for in the mining of resources of all kinds are the damages such as: environmental destruction, contamination, deadly diseases due to fine dust, poverty as a result of miserable pay of the workers and health damages due to dangerous working conditions.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of "being far from God and his light".

8. Global Tourism

State of Tourism

Tourism is the biggest employer around the world (255 million jobs, every 15th worker is employed in the tourism industry). In 2007 the travel boom reached record levels: Nearly 900 million travelers. Today in 2011 estimates suggest it could be one billion people.

Tourism generates about 9% of total GDP and provide for more than 255 million jobs in 2010 representing 8% of global employment.

The United Nations World Tourism Organization (UNWTO) is expecting the sector's global economy to provide 296 million jobs by 2019. Tourism has the potential to become a major generator of jobs after the crisis.

The tourism sector suffered a decline that began in the second half of 2008 and intensified in 2009 after several consecutive years of growth. A sharp reduction in tourist flows, length of stay, tourist spending and increased restrictions on business travel expenses led to a significant contraction of economic activity in the sector worldwide.

▪ The Tourism Plague

Europe alone records around 460 million visitors from around the world every year. An estimated 80-120 million from Northern Europe (exact figures unknown) travel every year towards the south for holidays, to the Mediterranean and the Black Sea: Portugal, Spain, Italy, South of France and the Balkans. Around the world over 1 billion tourists move around.

Avalanches of cars and aeroplanes arrive in the high season every few minutes. The consumption of electricity, gasoline, diesel and kerosene is immense. Tonnes of carcinogenic fine dust are breathed in by people, at airports and around airports. Rubbish and sewage water reaches astronomical levels in the area around the Mediterranean Sea during high season. Billions of tonnes of sewage flow directly into the sea.

The fish eat nearly everything; and the people then eat the fish. The environmental contamination and pollution is horrendous; also the noise. Depending on the season massive smog clouds form over the big cities such as Madrid and Barcelona, in Spain. This is what you call the contamination (gasing?) of millions of people, or of over 30 million tourists in the tourist resorts. In this context the tourism sector around the world needs to be labeled as a plague producer.

The greed in the tourism industry will destroy even its own foundation. Not to mention that from Almeria to Malaga (Spain) there are now plans to explore and subsequently drill for oil and gas in the Mediterranean Sea: more emissions into the

air and sea! All it needs is a small minor oil disaster and the whole coast will be completely destroyed for decades.

In February 2011, the Spanish Foundation for Science and Technology (FECYT), declares: “The rise in sea level of the Mediterranean Sea appears to be accelerating. The sea level in the Mediterranean has risen by between 1 and 1.5 millimeters each year since 1943. It now seems that the speed at which it rises is accelerating. Since the start of the 21st century the level has already risen by 20 centimeters (this means: 2 cm per year!). During the next 30 years the rise in temperatures and in sea level will continue (this means: 60+ cm rise within the next 30 years!).” – This will destroy practically all beaches on the Costa del Sol (and all other Mediterranean beaches) and therefore enormously affect Tourism!

Following an example of the tourism sector in Spain, because this is where we have something of a perspective. The following picture about Spain must subsequently be placed into the frame of humanity and the earth as a whole. The situation of individual areas and places must be placed in the context of the global developments of the following 30-40 years. If we generalize the main critical aspects to the situations over numerous tourist resort areas around the Mediterranean Sea and then throughout the world one thing becomes self-evident: Today’s form of tourism worldwide is not sustainable in the long-run.

▪ The Aftermath of the Financial Crisis

In 2006 several hundred thousand expatriates lived in the Mediterranean areas. In Marbella alone, and on the Costa Blanca, approximately 65-75% of all expatriates (approximately 120,000 to 180,000 each) have left due to lack of work opportunities and as a result of the devaluation of the British Pound (against the Euro). This is an annual cash flow in Marbella alone of approximately 3,600,000,000 euros. The loss of annual cash flow on the Costa Blanca can easily be higher. How high is the annual loss of cash flow on the Costa del Sol as a whole? How about in Mallorca or the Balearic Islands?

On top of the loss of cash flow we estimate that there are approximately over one million residential and commercial properties that lie empty (on sale or for rent) or in a state of unfinished construction.

In January 2011 the area of Marbella alone had approximately 2,000 empty commercial premises on the market, either for sale or for rent. This is huge for such a small area. Most of the new developments in all the resorts throughout the Mediterranean Sea have a yearly occupation of maximum 10-20%, certain developments not more than 1-3%.

During the so-called golden years many properties were sold on the coasts of the Mediterranean Sea. In Marbella and on the Costa Blanca alone the property business moved billions of euros. Lawyers, fiduciaries, real estate agents, banks and the state made huge profits from the booming sector! Up until 2008 many people throughout these areas amassed a great deal of wealth. Where is this money today? Where did it go? Who has it and where do they keep it? Today the average unemployment rate in these resort areas lies around 18-35%.

Some resorts have dozens of golf courses which occupy massive areas of land that need to be maintained daily with immense amounts of water. The areas around are dry and overgrown with weeds and bushes. There is hardly a place for relaxing, for walking or for fun. The implausible numbers of golfers no longer visit.

The tourist resorts in Spain will never be able to recover from this incredible disaster. It is never possible to go back to the golden years by pumping up the real estate market with attitudes, lies and massive exaggerations, with glamorous marketing, with glossy brochures or with celebrities. Certain resorts are *per se* no longer competitive compared to other tourist resorts in Turkey or Egypt, or with those on the Black Sea for example.

A survey in an English newspaper (January 2011) discovered that half of those Brits who have a home in Spain or France want to sell this year. We suspect the same attitude is prevalent amongst the Germans in the same situation. It is certainly well known that many Germans decided to go back to their homeland at a certain age (70-75). They would never wish to go to a Spanish nursing home let alone die in Spain and be buried here. It would be wise to dig up the reasons and discuss them.

▪ Prices

The totally excessive real estate and rental prices that resulted from years of speculation, fuelled by greed from property owners, investors, constructors, banks, lawyers, real estate agents and others involved in the property business. In Marbella today 2011: Apartments that have a value of 250,000 euros are still offered for 600,000 euros. Luxury properties that have a value of 2-3 million euros are offered at 5-7 million euros; Miserable old apartments are rented out for 800-1000 euros per month when the real value is more around 400 euros. The rental prices of many villas are similar in constellation. The prices are not appropriate to their true value; they are not oriented at the local employment market, nor at the demand and definitely not at the local salaries.

Most of the properties are of lowest construction quality: no oil or gas heating, no isolation, thin walls, cheap windows, cheap air conditioning. Many second hand properties are in a dilapidated condition with outdated furniture. Some of the smart owners get their properties painted, re-decorate their "new" place with new furniture and appliances for 30,000 euros; then they increase the sales price by 150,000-300,000 euros. At 35-40° C in the sun the trick starts to work. Where doesn't the trick work? After all this is the American concept of 'value appreciation'.

The prices of commercial premises are 40-75% over valued. In certain locations they are completely absurd, especially when taking into account the current economic climate. The owners prefer to leave their properties empty for years and speculate that one day another "idiot" will come along, blinded by the sun and the manipulated (hyped up) reputation of the resorts to pay the outrageous price. The arrogance of these owners: "I do not have to rent out these premises!"

Big shopping malls, commercial centers and office developments have completely destroyed small and medium-sized businesses. Many of the tenants can only pay

the horrendous rental prices by ripping off their clients, speculating with dubious business practices, with money-laundering and outright fraudulent financial scams.

▪ **Gastronomy and Hospitality Industry**

The prices in cafes, bars and restaurants in many places do not reflect the value of that which is served on the plate. The cooking quality is miserable (food from the day before or worse from the week before). The value of the content on the plate is at best 2-3 euros, the price however between 12-15 euros. A glass of wine is charged at double the value of the whole bottle. Smart business owners even have a different menu for summer and winter (of course with their respective price differences). Here and there some of the businesses have their kitchen cleaned once every 10-20 years (if at all) and toilets are cleaned monthly, sometimes only yearly – or so it seems here and there.

Another rip off also exists on the beaches with sunbeds, with drinks, with parking fares, taxi prices, drink prices in clubs and especially with car rental prices. Other especially blatant rip off services are offered by lawyers, fiduciaries, dentists, private doctors and car dealers. Even the police have long realized that the ideal way of financing their troops is by hunting down parking offenders on a daily basis. Their hunt begins around midday and lasts deep into the night; they know all the weak spots.

Depending on the resort, 35-65% of the hotels are closed during the winter season. Some 5-star hotels in Marbella for example have closed for good. In the last two years hotel prices have fallen significantly. In 2011 Spanish hotel prices are expected to decrease 12-15%.

Hotel prices have plummeted. Nevertheless during the high season in summer and winter they are still over valued and often subsidized by Spanish government initiatives. It is estimated that several million beds in hotels and tourist apartments (Spain) are empty during 9-10 months of the year. The food served does not qualify for anything merely resembling a competent cook. Cleanliness in most hotels is light years away from perfection. Most hotels are boring industrial-like mass-production rabbit stalls. How old are the mattresses? It is well known that you can find between 100,000 and 10 millions acarians (dust mites) in your bed sheets. Imagine how many millions are in those hotel mattresses after a few years?

▪ **Reputation**

The reputation of many tourist resorts in Spain is irreparably damaged, destroyed and even rotten to the core. The media is filled with stories about criminals, tax evaders, adventurers, scammers, fraudsters, drug dealers, mafia bosses, prostitution rings, online scammers, human traffickers, weapons dealers, old Nazis, loan sharks. Pages are filled with reports of corruption and the excesses of the super rich of whom no one knows where they got their millions from. Here and there there is fierce and angry talk about the real estate kings (and queens), who ripped off foreigners for 10-40 years; to rub salt into the nation's wounds have taken most of their wealth to offshore havens (tax-free of course). Some have died. Others moved away. Are there still others around?

▪ Infrastructure

The cleanliness of many public spaces in Spain is a well known topic on many online forums: dog excretia and hundreds of thousands of discarded chewing gum are nailed to the pavements. In some areas even the main streets are littered with rubbish, which the people throw out of their windows when driving by. Many plants in public spaces are either dead or untended.

The public bus service is in most areas a complete catastrophe, or rather a disgrace: dirty bus stations and dirty buses, bus shelters adequate for 4-6 people despite there being 30 or more standing in the rain or the blazing heat; indecipherable over optimistic timetables, irregular arrivals, no night routes; during rush hour and during the high season you will find masses of tourists, working residents and locals packed into the buses.

Many developments have no local bus connections making it possible to live there only with a car (if you are single), or two cars in the case of couples or those that have families. These circumstances together with the ridiculously high rental prices make life for singles, couples and families in such developments impossible for most people!

Especially along the main streets in towns and cities across the country you will find that the contamination and pollution is horrendous: exhaust fumes, fine dust, noise, and smell. The smog clouds in Malaga, Madrid and Barcelona for example, or the traffic intensive cores of tourist resort areas are pathogenic if not nearly deadly.

Take Malaga in Spain, a well-known tourist city. On one out of two days of the year the air contamination is over the norm established by EU directives. Cars are responsible for 85% of these emissions. Presumably a similar situation exists in Barcelona, Madrid, Valencia, Alicante as well as many other major towns and cities. Even small tourist towns like Marbella are highly contaminated by car emissions.

Further to the car problems many areas completely lack adequate parking areas. Those offering parking facilities are expensive, as much as 2-3 euros per hour. Large shopping malls and office developments further enrich their pockets with ludicrous high hourly parking fees.

▪ Spanish Culture

Local culture in tourist resorts is seldom present. Here and there you will come across an event or a show; every now and then a religious procession reflecting culture from 500 years ago; archaic rubbish without any educational value and solely for "very simple" people. Cultural events, when they happen, are so expensive that only those with big wallets can attend. Historical monuments, artistic buildings, cultural locations or educational and historic museums for tourists and locals (national and international) don't exist in most coastal resorts. International music schools, tango schools, art academies, artist ateliers, theatres or concert halls or highly professional nostalgic bars (with Jazz, Blues, etc.) you will never find in most

of these reports. Marbella for example does not have anything of these genres for tourists and expats, let alone for locals.

There is an international (English) University in Marbella. In the last few months five personalities who represent private interests have visited them. They have done so in order to covertly threaten that this “Marbella University” is not at all welcome. The government has not shown any interest whatsoever. Over 2,000 students from 35 different nations applied to study there: Four have received their student visa. The annual cash flow loss for local businesses and thus local citizens lies around 20-30 million euros. Together with a partner project “rcigi.com” there is a potential of 5,000 students within 3 years: This represents an additional cash flow up to 100 million euros for the region. Unfortunately, this is not possible with such a negative visa-policy!

Out of around 200 business owners in the tourism and hospitality sector, most with failing businesses (threatened with economic ruin”, at best one is interested in contracting a business coach to learn something or improve something. There is not a single business owner which wants to see their business situation in a bigger picture, let alone with a future perspective. This is what it is like in Spain and surely also in many other Mediterranean countries.

Bull fighting is part of the Spanish culture. For entertainment they kill bulls. Many earn huge sums of money with this “fun”. But we live in the modern 21st century. To have fun harming and killing a noble animal surely belongs to the Middle Ages. That is where it should remain. The real problem however is very simple and yet extremely embarrassing: The bull is a symbol for masculinity, virility and manly procreativity, and has been for thousands of years. The Spaniards kill that which the bull symbolizes and carries within it: their own male procreativity and male strength. On top of it they enjoy themselves whilst doing it. Surely certain women, mothers and the church will find this useful. Does this need further explanation?

Cultural peculiarity: 95% of all Spaniards who play the lottery fail to win during an entire life spent playing the ‘game.’ During their entire life, week after week they experience “I am a loser”. This makes their inner ‘I’ weak and their soul depressive. They become conditioned and brainwashed to ‘have wealth without performing or achieving’ and “only very few are winners”. Their belief: “To have a lot, but achieve nothing or give very little”

Marriage is also a “culture”. The divorce rate in Spain is apparently 68-75%. It shows: Young Spaniards are unprepared for marriage. They are unsuitable for a constructive relationship, unprepared to raise children and incapable of educating them. They have got absolutely no clue about what love is, with exceptions of course. Their motto: “Throwing it away resolves problems”. Should people just be thrown away when they have or create problems?

When analyzing a culture and society it is always essential to take into account its history. History always repeats itself, until it is amended, reconciled and redeemed. Until today this has not happened in Spain. Not the murdering and stealing of hundreds of years ago, not the Franco-era.

Hundreds of years ago the Spaniards invaded and occupied nearly half of the earth's surface. They massacred entire populations and stole their lands and possessions. They did so in the name of Jesus Christ and the Bible. For the building of their ships they cut down 80% of their own forests: today all that remains is dry land covered in weeds and bushes, in many cases these are now wastelands, shrublands. The wealth from the last centuries has long been wasted and misspent. Today they again want to enrich themselves with corporate groups who drain people (and the oceans). This is also the case with France, England and other nations such as the United States: Furthermore, (especially for the Europeans), who conquered the Americas, the Far East and the African continent. Who murdered their populations and stole their lands and goods "all in the name of the Lord J.C." as part of their "culture".

What also belongs to Spanish culture is the fact that many large companies have their headquarters abroad. 82% of the companies listed on the Spanish IBEX 35 index have branches and operations in fiscal paradises. Each is certainly a case to unravel and meticulously explore with highest professionalism. The big corruption scandals milked by the media are only the tip of the iceberg. In some cases they are merely a form of distraction and revenge for the years that others didn't get a piece of the pie.

▪ The Political System

Who has ever met a friendly, helpful, competent and efficient civil servant? Surely, here and there they must exist. No? Which civil servant can speak a few words of German or English? Surely some here or there must do so. No? Many resorts live mainly or fully from tourism and from expatriates; also foreigners who come here to retire. Yet more often than not the attitude in the service from these civil servants expresses envy, contempt, indifference, laziness, ignorance, disrespect, and almost always above all professional inefficiency.

The legal system isn't very much different. It does not work in the interest of the people it serves including the world of business. As a foreigner try and find a Spanish lawyer that will go to court for you against a Spaniard (and your opponent's Spanish lawyer). First of all this costs a fortune paid up front (30% of the quantity claimed) and this without any guarantee whatsoever. The procedure is long-winding, can take many years and in the end you receive nothing whether the amount reclaimed is 10,000 euros or 200,000 euros.

Hundreds of thousands of foreigners were ripped off over the past 20 years in the Spanish real estate sector. They all barely stand a chance in the Spanish legal system. This certainly can be interpreted as a "typical Spanish attitude" against foreigners and tourists. Rip off and abuse as much as possible! But this is not "typical Spanish"; much rather this is "typical capitalistic" and with that typical for the Swiss, Germans, Brits, French, Italians, etc. And it is also "typical Christian".

Many politicians and greedy business people have destroyed the lives and futures of millions of people, couples and families, and with that also the future of hundreds of thousands of children: their inherited love and their fortune, their wealth and their hope. They created a daunting disaster and committed incredible emotional suffering. Yet nobody is holding them accountable. Incredible!

The incompetence, corruption and greed for money that most politicians and many business people have in the tourist areas are mindblowing. They have neither morals nor the capacity to think in dimensions that take into account the soul of people, the genuine inner human needs, nature and the environment, the economic balance, and the future of their own children and the future of tourism itself.

Today one thing is clear: They all want to go back to the old lies, tricks and glamour marketing strategies to revive the old days of glory in the tourism and real estate sector. They haven't learnt anything.

▪ **The Expats**

Far too many foreigners come to Spain, to the coastal areas, thinking that they can simply open a bar, restaurant or consumption oriented business; an office offering a service. They think that they can then just wait and a constant flow of clients (guests) will show up miraculously. Most are far too idle to work hard, think creatively, let alone to take advice or educate themselves; to offer something that people really need for their genuine needs. Education and culture isn't of their interest. To develop themselves psychically and spiritually, to read a book or attend a course is something they see as for fools.

Most of those that come to Spain to retire are lazy, gossip about others, eat and drink (a lot), watch hours of TV and become more and more stubborn, rigid and mentally regress year by year. Animal farm, their average life potential is of 15-25 years yet they sit around and wait for death to arrive (or they one day return to a nursing home their country of origin).

Education and culture is of no interest to them. To develop themselves psychically and spiritually, to read a book or attend a course is something they see as a stupid joke. Not exactly a role model.

The million-strong herd of tourists also has certain peculiarities that don't have a future: There are those with very little money, who only eat, drink, sleep and lie on the beaches, who want only to have fun (i.e. sex) and gossip. Most of them are badly educated. Then there are those who think they can behave arrogantly in their narcissistic obsession just because they are well off financially.

They consider themselves superior having usually put one over on their fellows. The interests and needs of the local people don't interest them. Ultimately there are of course a select group of tourists who certainly do deserve to spend their holidays by the Mediterranean Sea.

▪ **Modern day-slaves in Almeria**

The Guardian revealed (February 2011) a report about the exploitation of tens of thousands of migrants (some estimates believe there to be over 100,000) used to grow salad and vegetables for supermarkets.

This had been uncovered by investigative journalists enquiring into the €2 billion-a-year (£1.6 billion) hothouse industry of southern Spain.

- Migrant workers from Africa living in shacks made of old boxes and plastic sheeting, without sanitation or access to drinking water.
- Wages that are routinely less than half the legal minimum wage.
- Workers without papers being told they will be reported to the police if they complain.
- Allegations of segregation enforced by police harassment when African workers stray outside the hothouse areas into tourist areas.

In El Ejido (Almeria) there are more banks per inhabitant than anywhere else in Europe. The Andalusian government turns a blind eye, despite these places being rampant hotbeds of abuse of power and extreme abuse of human rights!

This type of industry exists in many places from Huelva all the way to Valencia: The produce of this industry tastes like paper or at worst is tasteless. The contamination and nurturing quality should also once be investigated. Taste amongst consumers has already degenerated and will continue to degenerate.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

9. Armament and Wars

▪ General figures

- June 2010: World military spending increased by 5.9 percent to hit a new record high of \$1.53 trillion in 2009.
- Global military expenditure is increasing fast; money spent per year: 36,000,000,000 of US\$ with increasing tendency.
- Global military expenditures in January 2011; i.e. during one month: \$3,200,000,000.
- The USA has wasted 3,000 billion dollars on wars that have no benefit whatsoever.
- Cost of Iraq War (2001-2010) plus war in Afghanistan: over US\$ 1,000,000,000,000.
- Iraq War victims: 1.4 million killed people; 4.7 million displaced; 5 million orphans; 1-2 million widows.
- Afghanistan war: no access to statistics; we estimate: more than one hundred thousand Afghans killed, including people in Pakistan.
- The Afghan war costs the US taxpayers \$300 million per day.
- The war in Afghanistan and in Iraq since 2003 costs the US citizens \$3 trillion just for caring for the wounded from both of those two wars over the next thirty years.

▪ Some perspectives to form a picture of war

In numerous countries around the world, US and NATO soldiers are active since decades. They kill, they murder, they rape, they torture, they torment, they injure, they create handicapped people and psychically ill, they burns babies and women and men, they slaughter, they bomb homes of human beings, they destroy infrastructure, they destroy agricultural land, they destroy the functioning of the administrations and governments, they create hunger and thirst, they produce fear and terror or terrible nightmares, they produce untold agony and calamity, they create strife and sow hate for the coming 100 and more years.

The global military armament business is booming. Germany has a big part of the pie. According to the peace research institute SIPRI the third biggest weapons exporter holds an 11 per cent portion of the global market. Only Russia and the USA export more weapons.

The defense business as a whole has increased by 24 per cent in the past 5 years compared to the period between 2001 and 2005.

The biggest weapons producer between 2006 and 2010 was the USA, laying claim to around 30 per cent of the global weapons industry.

According to a report, other official estimates point to a whopping 2,500,000 Iraqi fatalities as the result of the invasion, in addition to four million children that were left orphaned by the war. The Iraqi Interior Ministry has also released figures pointing to 800,000 individuals that had gone missing in the country by January 2008.

According to UN statistics, Afghanistan produced only 185 tons of opium before the 2001 US-led occupation. Currently, however, the figure stands at 3,400 tons annually.

The US government has admitted selling USD 40 billion worth of private arms worldwide in 2009 with almost USD 7 billion of them going to the Middle East and Northern African countries.... The main recipients of the US arms in 2009 were Japan with USD 4.5 billion, Britain with USD 3.4 billion and Singapore with USD 5.5 billion purchases.

A total of USD 7.3 billion arms were sold to the Middle East and North African nations. Turkey and the United Arab Emirates with USD 1.50 and 1.09 billion purchases respectively, were among the major recipients of the US arms in these regions.

A Swedish think-tank reports the possession of over 20,500 nuclear weapons by eight nuclear states, including Israel, with 5,000 of them all ready for instant use.

"More than 5,000 nuclear weapons are deployed and ready for use, including nearly 2,000 that are kept in a high state of alert,"... Washington plans to invest \$92 billion to expand its nuclear arsenal in the next 10 years.

US Military: Lies of American Politicians and the Media to start war or to intervene with not democratic activities:

- 1) Vietnam (1964-1975)
- 2) Grenada (1983)
- 3) Panama (1989)
- 4) Iraq (1991)
- 5) Somalia (1993)
- 6) Bosnia (1992-1995)
- 7) Yugoslavia (1999)
- 8) Afghanistan (2001)
- 9) Iraq (2003)
- 10) Venezuela - Ecuador (2008)
- 11) Libya (2011)

The US military spends USD 20.2 billion annually on air conditioning for the American troops stationed in war-torn Iraq and Afghanistan; including the costs to deliver the fuel to the most isolated places, escorting, command and control, and other support and infrastructure.

The Pentagon's demand for a budget of USD 300 million a day for the Afghan war will put a "back-breaking burden" on US taxpayers... Since 2003, over 1,300,000 Iraqi civilians have been killed and an estimated 4.7 million have been displaced as a result of the war. Other statistics speak about 2m victims.

The world's military spending has increased to a record high of \$1.6 trillion in 2010.... the top three arms investors are the US, China and Britain... The Unites

States, with extravagant military operations in Afghanistan and Iraq, increased the arms investment by 2.8 percent to \$698 billion -- about six times as much as China which is the world's second-biggest spender followed by Britain, France and Russia.

By the end of November 2010 the number of private military contractors in the United States will surpass for the first time in history the combined number of US Military forces and police officials combined

The US Department of Defense (DoD) has wasted almost \$50 billion over the past decade, an independent public policy think tank in the United States says. According to a report on the 2012 US defense budget, issued by the Center for Strategic and Budgetary Assessments (CSBA), Pentagon has put some \$46 billion since 2001 into developing military systems that were never deployed in the combat fields, Reuters reported Monday. The think tank has suggested in his report that the Pentagon's efforts have produced no meaningful results as far as the modernization of the US military is concerned.

An article in July 2011 reports: The latest objective estimate for the wars in Iraq and Afghanistan, made public June 29, is between \$3.7 trillion and \$4.4 trillion. This doesn't even include the thousands of deaths and injuries among quasi-military contractors... (not included) the "hidden" costs of the war that include enormous medical care expenses over the next 50 years for tens of thousands of badly wounded soldiers, other benefits, equipment replacement, and interest on war debts ... (the effective costs) will certainly top \$5 trillion in real costs ... Defense Department expenses are only half the story. Double the Pentagon's \$700 billion for a true estimate of the amount of money the U.S. spent on war-related issues last year. That's \$1.4 trillion a year for the United States.... Washington's various other "national security" budgets. That of course includes the costs of Washington's 16 different intelligence services, the percentage of the annual national debt to pay for past war expenses, Homeland Security, nuclear weapons, additional annual spending requests for Iraq and Afghan wars, military retiree pay and healthcare for vets, NASA, FBI (for its war-related military work), etc. When it's all included it comes to \$1,398 trillion for fiscal 2010

▪ America's Wars and aggression

America has intruded in the affairs of at least 50 countries of the world over 130 times during the last 121 years.

While the US troops have intervened in the affairs of Panama eight times (1895, 1901-14, 1908, 1912, 1918-20, 1958, 1964 and 1989), they entered Nicaragua (1894, 1896, 1898, 1899, 1907, 1910, 1912-33), Honduras (1903, 1907, 1911, 1912, 1919, 1924-25, 1983-89) and China (1894-95, 1898-1900, 1911-14, 1922-27, 1927-34, 1948-49, 1958) some seven times each under one pretext or the other during this period under review.

The American forces sailed for Cuba (1898-1902, 1906-1909, 1912, 1917-33, 1961, 1962) six times, they went to Iran five times (1946, 1953, 1980, 1984, 1987-88), and they interfered on four different occasions in Haiti (1891, 1914-34, 1987-94, 2004-05) Dominican Republic (1903-04, 1914, 1916-24, 1963-66), Yugoslavia (1919, 1946, 1992-

94,1991-93), Iraq (1958, 1963, 1990-91, 1991-93) and Philippines (1898-1910, 1948-54, 1989, 2002).

The US troops were dispatched thrice to Korea (1894-96, 1904-05, 1945-53), Libya (1981, 1986-89, 2011), Guatemala (1920, 1954, 1966-67), Yemen (2000, 2002, 2004) and Liberia (1990, 1997, 2003).

They were sent on foreign missions twice to nations like Chile (1891, 1964-73), Mexico (1913, 1914-18), Puerto Rico (1898, 1950), El-Salvador (1932, 1981-82), Germany (1948, 1961), Laos (1962, 1971-73), Somalia (1992-94, 2006) and Afghanistan (1998, 2001).

Apart from featuring prominently in World War I and II, the US combat forces have also been active at least once in countries like Argentina, Samoa, Russia, Guam, Turkey, Uruguay, Greece, Vietnam, Indonesia, Cambodia, Oman, Macedonia, Syria, Pakistan, Bolivia, Virgin Islands, Zaire (Congo), Saudi Arabia, Kuwait, Lebanon, Grenada, Angola, Sudan, Albania, Bosnia and Colombia.

▪ **Some perspectives and more examples**

1971, the United States stored 7,300 tactical weapons in Europe. Today they have 200 nuclear warheads in European countries without an all-out accord from Europe. Where are the remaining 7,100 tactical weapons now?

The US Military has more than 1,000 military bases in about 130 countries and another 6,000 bases in the United States and its territories. In total, there are more than 3,000,000 US personnel serving across the planet. Additionally they have an unknown number of so-called secret bases and other bases in the Middle East. There are still 268 bases in Germany, 124 in Japan, and 87 in South Korea.

Global NATO: The U.S. and NATO military alliance has expanded into a globally active 50-nation military network; Germany, Australia, Spain, France, Italy and Japan also on the new war-boat.

The North Atlantic Treaty Organization (NATO) has 24 military bases in Turkey alone.

The annual cost of US intelligence has been made public for the first time and it shows that the overall spending this year (2010) has surpassed \$80 billion. Figures released by the government demonstrate that \$27 billion goes to military intelligence and \$53.1 billion covers the CIA and some of the other 16 intelligence agencies. Official documents have shown that in 2007 spending was \$43.5 billion and as such spending on intelligence has almost doubled since then.

Arms race with new dimensions: 1.5 trillion dollars per year; wars not included.

By the end of November 2010 the number of private military contractors in the United States will surpass the combined number of US Military forces and police officials combined for the first time in history.

The United States could cut its military budget (just the Department of so-called Defense, not counting the hundreds of billions spent through other departments) by 85% and still be the most expensive military on the planet.

President Obama is being given the power to shut down the Internet for any reason he chooses.

In the US, in any case of “state of emergency”, the government can take over any goods and wealth, including fruits, vegetables or meat the citizens produce in their own garden; self-evidently without paying or compensating for it.

The US Government now says it has the right to assassinate any American citizen they deem a “terrorist”. Under US law only the President can define who a “terrorist” is. Under US law the President’s defining of an American as a “terrorist” is not only secret but cannot be reviewed by any court.

Nearly 3,000 of America’s top scientists have called for a new investigation of 9/11 because the government’s official story was found to be “impossible to have happened in the way it has been officially described”.

A study calculated the cost of the Iraq and Afghanistan wars, publicized as the “war against terror” could end up costing the American tax payers \$6 trillion.

All the wars of the capitalist coalition since 20 years caused several million fatalities and ten times as many injured and handicapped people, plus untold millions of orphans. There has been an incredible destruction of infrastructures and families along with a burned earth policy of their means of sustenance. Gulf War I and Gulf War II, Balkan Wars, Iraq War, and Afghanistan War with undoubtedly more to come.

A US government audit has found that billions of dollars earmarked for reconstruction projects in Afghanistan cannot be traced. Nearly 18 billion dollars received by thousands of firms to rebuild Afghanistan remain unaccounted for.

The estimated cost to kill each Taliban is as high as \$100 million with a conservative estimate being \$50 million. Killing 20 Taliban costs \$1 billion; killing all the Taliban would cost \$1.7 trillion.

1. Taliban field strength: 35,000 troops
2. Taliban killed per year by coalition forces: 2,000 (best available information)
3. Pentagon direct costs for Afghan War for 2010: \$100 billion
4. Pentagon indirect costs for Afghan War for 2010: \$100 billion

The question is: Who is the profiteer of such mad politics and legal mendacity? Who profits from such bellicose governmental criminality ‘in the Name of the Creator and the Almighty God’?

▪ The perspectives of military expenditures

- \$1 trillion over a period of 5 years could be spent for a program to repair roads and bridges.
- \$1 trillion over a period of 5 years could have hired 15.3 million people out of work for \$50,000 a piece. With \$1 trillion we could invest in clean energy.
- \$1 trillion over a period of 5 years would be enough to provide all people around the globe with healthy drinking water.
- \$1 trillion over a period of 5 years would be enough to provide all people around the globe with sanitation infrastructure.
- \$100 trillion over a period of 20 years would be enough to provide all megacities and cities with an efficient public transport system.
- \$30 billion over a period of 10 years is enough to provide 1,000,000 school teacher jobs in developing countries at \$3,000 per year.

▪ **The lost chance for peace and justice**

The Swiss government and the Swiss people are pivotally responsible for the First and Second Gulf War, Iraq War, Balkan War, Afghanistan War, global terrorism, the suffering of the Palestinians, incredible global poverty and misery worldwide, the financial collapse, the exorbitant increase of climate change, and especially the preparations for World War III that have been in motion for many years already. The Swiss people and the Swiss government were offered the most unique solution, based on the Archetypes of the Soul, to avoid all these global developments. They all rejected this solution and therefore committed the most terrible crime against humanity in the history of mankind.

Indictment: The entire Swiss population is collectively charged with the gravest crime against humanity and is herewith convicted with 20,000 years of being far from God and his light! They all lose their Swiss homeland for all times.

▪ **Motives for wars**

- Need for water, food, and other resources
- Bankrupt financial situation of a country
- Lunacy of a religion; collective religious psychosis
- Dogmatism and fundamentalism of a religion
- Unsolved conflicts between countries from the past
- Sovereignty of stolen lands
- World greed for power
- Geopolitical strategic interests
- Radical ideologies
- Poverty, misery, famine
- Climate change: originator and victims
- Archaic understanding of humans and human life
- Financial interests of the arms industry
- Industrial profit and power interests
- Projection of the evil aspects of humans onto others
- Extreme high rate of unemployment
- Collapse of economy and industry
- Extreme distribution of wealth (financial power)
- Power conservation in unstable political situations

- Originator and victims of emissions
- Political megalomania and psychopathic leaders
- Governmental oppression and exploitation of a folk
- Regional injustice in most basic services
- Religious claims to have the only true God and belief
- Fundamentalist missions to lead humanity to God
- Brainwashed, manipulated, blinded and exploited folks
- The planet in danger due to climate change / pollution
- A nation in danger due to overpopulation
- Humanity in danger due to overpopulation and emissions

Nearly all motives for a new global war, WWIII are given today!

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

10. Criminality and Corruption

▪ Manifoldness in an overview

- Organized crime threatens peace on earth, development and sovereignty of states.
- Organized crime is one of the biggest economies of the world.
- Organized crime use immense money, weapons, bribes, and corruption.
- Organized crime decomposes politics, blackmail politicians, and abuse military.
- 140,000 people in Europe are abused for human trafficking, especially sexually; profit: \$3 billion.
- In Russia 70 tons of hard drugs are consumed; Europe is the supermarket for heroin.
- Corruption: US\$5 trillion, approx. 5% of the world's GDP.
- Around the globe 43 percent of companies are affected by economic crime (corruption).
- Up to 80 per cent of international aid to Afghanistan is being lost in international and local corruption schemes.
- The revenue of organized crime worldwide is estimated at 2 trillion US\$.
- Damage caused by cybercrime estimated at \$100 billion annually; we estimate: \$300 billion.
- Over 700,000 people around the globe are trafficked every year for sexual exploitation and forced labor.
- World spending on illegal drugs per year: more than US\$300,000,000,000.
- Fossil fuel and nuclear energy industries receive direct / indirect subsidies over \$300 billion.
- Bribery and price-fixing influencing public policy costs billions of dollars in lost revenues.
- Malicious computer use such as virus writing and hacking cost businesses globally more than \$1 trillion each year.
- The respondents estimated that in 2008 businesses lost data worth a total of \$4.6 billion and spent about \$600 million cleaning up after breaches.
- The recent recession is only increasing the security risk for corporations, with 42 per cent reporting that displaced workers were the biggest threat to sensitive information on the network.
- 47 per cent of Chinese said they believed the US poses the biggest security threat to their data.
- The average company has \$12 million worth of sensitive data residing abroad.
- Companies lost on average \$4.6 million worth of intellectual property each year.
- At least one of every three women on earth has been beaten, coerced into sex or abused in some other way, usually by an intimate partner or family member.
- Two million girls between the ages of 5 and 15 are introduced into the commercial sex market each year.
- 6,000 people are executed every year; 95% in the following countries: China, Iran, Pakistan, Saudi Arabia, and USA. In total, 58 countries practice the death penalty.
- Pompously ultraconservative and nationalistic ideals about manliness promote readiness for violence.
- Fundamentalist attitudes (beliefs) promote readiness for violence

▪ **The World of Crimes**

- Aiding & Abetting
- Arson
- Assault
- Bribery
- Burglary
- Business Crimes
- Child Abduction
- Child Abuse
- Child Pornography
- Conspiracy
- Corruption
- Credit / Debit Card Fraud
- Cyber Crime
- Disorderly Conduct
- Disturbing the Peace
- Domestic Violence
- Drug Cultivation and Manufacturing
- Drug Distribution and Trafficking
- Drug Possession
- Embezzlement
- Extortion
- Forgery
- Fraud
- Harassment
- Hate Crimes
- Homicide
- Indecent Exposure
- Identity Theft
- Insurance Fraud
- Kidnapping
- Manslaughter
- Money Laundering
- Murder
- Perjury
- Probation Violation
- Prostitution
- Public Intoxication
- Pyramid Schemes
- Racketeering
- Rape
- Robbery
- Securities Fraud
- Sexual Assault
- Shoplifting
- Stalking
- Statutory Rape
- Tax Evasion (Fraud)
- Telemarketing Fraud

- Theft / Larceny
- Vandalism
- Wire Fraud

▪ Global cost of crime

According to a recent study 7.3 million Americans are in prison, on parole or probation, at a cost to the states of \$47 billion in 2008. In other figures: one in every 31 adults is in prison, on parole or probation. A survey of 34 states found that these states spent an average of \$29,000 a year on prisoners.

- The financial damages of such crimes are exorbitant: trillions of dollars!
- The administrative costs of such crimes are exorbitant: trillions of dollars!
- The prison costs are exorbitant: trillions of dollars!

▪ Capital punishment

There are over 20,000 people around the globe sitting in prison cells waiting for their execution. In 2009 a total of 714 people were executed in 18 U.S. states.

▪ Causes of crimes

- Humans create crime.
- The society creates crimes.
- Life style creates crime.
- Poverty and misery creates crimes.
- Inadequate sexual education creates crimes.
- Neurotic parents create crimes.
- Unlimited greed for money creates crimes.
- Early childhoods with difficult family environments create crimes.
- Lack of love and Spirit, care and understanding, creates crimes.
- Unemployment creates crimes.
- Social injustice creates crimes.
- Amoral politicians are a pattern for crimes copied from countless people.
- Amoral leaders in economy and industry are a pattern copied from others.
- Archaic religions create lies, cheat, deceit, and crimes.
- Lack of psychical-spiritual and ethical education in general.

▪ Punishments

- Nobody is born a criminal.
- No soul is genetically or naturally criminal.
- Society is always co-responsible for serious crimes.
- The current forms of punishment with prisons needs to be thoroughly overhauled and changed. The current form is primitive and stupid. The whole system needs to be educational and serve the society as a whole.
- Capital punishment is the most primitive arrogance of power.
- Capital punishment is an expression of perversion and psychopathy.
- Those in favor of capital punishment are themselves deeply neurotic or psychopathic.

- Those in favor of capital punishment are in their innermost self bound to archaic times.
- Those in favor of capital punishment must be punished.
- War is an exception, yet not permission for the death penalty. War objectors should not be punished by imprisonment or death penalty. They must serve society in some other form for peace.
- Every form and duration of punishment requires extensive and thorough psychical-spiritual education and formation as well as work for the victims and society as a form of compensation.
- Every type of punishment must be created in such a form, that a relationship with a partner of the opposite sex (and the family if existing) can be lived in a healthy manner, also sexuality.
- There are people and groups of people that try to pull nearly the entire humanity into the Abyss with all criminal and legal ways, driven by political and religious psychosis. The death penalty does not solve the problem for the present nor for the future because these people are a “product” of society. Nevertheless humanity must be protected from such a pest. These people lose the right to significant wealth and power positions for their entire life.
- There are also those amongst the people that in spite of years of educational and correctional work camps remain “unhealable”, these must be locked up for their entire life in such institutions. The death penalty does not solve the problem. These people lose the right to significant wealth and power positions for their entire life.
- People with responsible positions in politics, military, education, economy and in religion must be immediately discharged if they do not respect the Archetypes of the Soul and do not strive to promote the Archetypes of the Soul amongst the people. Should these people radically operate against the Archetypes of the Soul, they must be punished, in extreme cases with lifelong exclusion from positions with responsibility.
- **The unavoidable spiritual law:** Every soul receives the place it deserves in the spiritual world, according to its way of life, learning, and its psychical-spiritual growth in the frame of the Archetypes of the Soul and in its actions with respect to love on earth.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

11. Contamination

▪ Contamination: Sewage and Garbage

In the oceans: Sewage and garbage (plastic), poisoning chemical elements, cesium, pesticide, heavy metal and mercury, oil pest, chemicals for agriculture, etc.

Oceans, seas, lakes, rivers, streams and groundwater are contaminated by remains of consumed medicaments: 50-90% go to the sewage, medicaments in urine and feces, also from showering: pain killer, antibiotics, hormones, tranquilizers, cholesterol reducers, medicaments for epilepsy and cancer, birth control pills, and other drugs.

Antidepressants, blood pressure and diabetes medications, anticonvulsants, oral contraceptives, hormone replacement therapy drugs, chemotherapy drugs, antibiotics, heart medications and codeine are all showing up in the water supplies.

Soaps, shampoos, cosmetics and perfumes contain chemicals that disappear down the drain, and goes to the water in the nature: elements from cosmetics, perfumes and hair products. Fishes and sea fruits are eating this chemical soup.

Farmers give veterinary drugs to their animals, including large amounts of antibiotics. Drug-contaminated sewage sludge is sold as farm fertilizer. Later, these chemicals disappear down the drain and goes to the water in the nature. Fishes and sea fruits are eating this chemical soup.

Already today and much more in the future, people around the globe have the chemical cocktail in the fish or sea fruits on their plate.

The artificial female sexual hormones in the anti-baby pill have lasting effects beyond the sewage plant treatment facilities, turning male fish into females.

A teaspoon of fully concentrated Estradiol is enough to cause the male trouts in a river section of ten meters deep, twenty meters wide and ten kilometers long, to turn into females.

Apart from hormones from the pill, fish also absorb painkillers, antibiotics and cell poisons from cancer treatments. Even medicines to treat cholesterol levels are now readily found in pike fish.

Even at low doses, the drug residues in water stop cells from reproducing.

Fish are experiencing reproductive problems as a result of chemical contamination.

Beyond having their sperm damaged, some fish are actually changing sexes due to chemical and medicament elements.

Some water creatures are experiencing organ failure and the inability to grow.

More than 100 different pharmaceutical compounds have been detected around the world, affecting fish and wildlife everywhere.

No laws exist to protect the public from pharmaceuticals.

According to a UN study on sanitation, far more people in India have access to a mobile phone than to a toilet. (Statistics 2011: 791 million mobile phone users in India)

At least 46 million Americans are drinking water contaminated with trace amounts of pharmaceuticals.

India's rivers are full of dangerous pharmaceuticals. In an Indian River found: 90 different pharmaceutical elements, from pharmaceutical companies dumping their waste in the river.

All kinds of drugs are being found in the bodies of fishes near major U.S. cities.

Researchers found drugs for high cholesterol, allergies, high blood pressure, bipolar disorder and depression in the livers and tissue of fishes.

Drug residue cocktails actually do cause harm to humans.

Antidepressants, blood pressure and diabetes medications, anticonvulsants, oral contraceptives, hormone replacement therapy drugs, chemotherapy drugs, antibiotics, heart medications and even codeine are all showing up in the water supplies of American Cities.

Pharmaceutical drug contamination in streams: roughly 80 percent of the streams tested were found to be contaminated.

In 2008, an investigation found that at least 46 million Americans are drinking water contaminated with trace amounts of pharmaceuticals.

India's rivers are full of dangerous pharmaceuticals.

One Indian River where 90 different pharmaceutical companies dump their waste tested positive for over 21 active drug ingredients. In one river alone, there was enough ciprofloxacin (a strong antibiotic) being dumped every day by drug companies to treat 90,000 people!

It is estimated that 75 percent of India's surface water is now contaminated by human and agricultural waste.

According to a report back in 2009, all kinds of drugs are being found in the bodies of fish near major U.S. cities. Researchers found drugs for high cholesterol, allergies, high blood pressure, bipolar disorder and depression in the livers and tissue of fish.

Sea-life faces extinction, unprecedented in history, because of waste.

Carbon is being absorbed by the ocean at an alarming rate.

Russia has a long list of environmental problems. The total amount of hazardous waste stockpiled in the country is over 30 billion tons. Reversing the environmental damage is a large and complicated topic.

Contaminated water kills 25,000 people every day around the globe, and each year some 20 million children are impaired by malnourishment.

In northern China, the water table is dropping one meter per year due to over-pumping.

Approximately 150 billion tiny pieces with an average weight of 1.8 milligrams, that is approximately 500 tons of tiny plastic pieces from waste, are currently swimming in the Mediterranean Sea. They serve as food for plankton and therefore for the fish and can easily land on our plates at the dinner table.

Less and less medicine is working to combat illnesses. Antibiotics resistance will become a global problem. The responsibility lies in the massive use of medicines in the industrial livestock farming. There are enough loopholes for produces with high criminal drives

Around the globe every year millions of tonnes of antibiotics are being used. Herewith the industrial livestock farming is one of the most important markets for the pharma industry.

In Germany, nothing related to livestock husbandry is under control. Organized crime dominates. Global corporations don't care what happens to their animals. They seem them as values. It is all about the profit, 15 per cent profit that needs to be retrieved. It doesn't matter how this is achieved.

▪ **Some facts that illustrate the problems**

a) Sanitation:

- The United Nations estimates that 2.6 billion live without proper sanitation.
- 2.5-3 billion people have no access to sanitation; no local sewage treatment!
- Lack of toilets and other sanitation facilities costs India nearly \$54 billion a year.
- About 200 million tons of human waste is discharged into watercourses yearly.
- More than half of India's 1,170,000,000 people were mobile-phone subscribers, yet only 366,000,000 people had access to proper sanitation in 2008.

b) Contamination:

- Toxic chemicals released by industries into the air, land, water: 650,000,000 tons of sewage, 60,000 tons of mercury, 36,000 tons of phosphates is dumped into the Mediterranean each year.
- 7,000,000 of tons of plastic debris, industrial chemicals, agricultural waste, petroleum, etc., end up in the oceans every year.

- 250 billion of small plastic pieces are swimming in the oceans; and 500 tons swim in the Mediterranean Sea.
- 46,000 pieces of plastic debris swim on each square kilometer of ocean.
- Medicine residues go through the toilette into the water circles and via fishes back to the food chain.
- Global emission of carbon dioxide will increase until 2030 by 40% up to 40,000,000,000 tons (2006: 29,000,000,000 tons).
- Acidification of the oceans is a major threat to marine life and humanity's food supply. It affects marine life and in turn it affects the number of fish.
- There is the rubbish that comes from the land, delivered by run-off, storm water drains and the wind-blown rubbish that people leave behind. There is also ocean-based debris; it includes fishing lines and nets, offshore oil and gas rig/platform debris, waste from merchant ships, ferries and cruise liners and garbage from recreational and tourist vessels. Every day, ships jettison 5,500,000 million pieces of rubbish into the sea.
- An estimated 14 billion pounds of trash, much of it plastic is dumped in the world's oceans yearly.
- Today, Americans generate 10,500,000 tons of plastic waste a year but recycle only 1 or 2 % of it.
- The worldwide fishing industry dumps an estimated 150,000 tons of plastic into the ocean each year, including packaging, plastic nets, lines, and buoys.
- A plastic milk jug takes 1 million years to decompose. A plastic cup can take 50 - 80 years to decompose.
- The traffic emissions: Many tons of oil drops of vehicles go every day into the nature (soil and drinking water): rate of cancer, asthma, depressions, stress, and tickle in one's throat, etc., is increasing.
- Fine dust from cars, industry, oil heating, trains, chemical industry, oil industry, coal and gold mining, etc., produces immense illnesses (respiratory tract) and cancer, millions of times more than smoking.
- The chemical industry, working 24 hours daily, let into the air thousands of tons of poisoning emissions.
- Toxic chemicals released by industries into our air, land, and water in January 2011: 870,000 tons.
- Carbon dioxide (CO₂) released in January 2011: 2,000,000,000
- An estimated 90 tons of gold has been sold in 2010. The dark side: scrupulous exploitation, environmental damages and serious violation of human rights. Gigantic areas of land and exorbitant amounts of water are needed to exploit gold. The extensive contamination is horrifying. Cyanide is used to separate gold from rocks. Cyanide is highly poisoning and deadly. One gram of gold is found in 5 tons of rocks.
- 190,000 tons of asbestos, produced in Canada, are shipped to India, Pakistan, Indonesia, Thailand and Vietnam despite global bans of asbestos. Asbestos is a toxic mineral which causes lung cancer. Asbestos is responsible for 90,000 deaths per year worldwide.
- With over 20 million tones of nitric oxide every year the shipping industry outnumbers the air traffic industry tenfold; with 12 million tones of sulphur dioxide even by one hundred. Carbon dioxide stays in the atmosphere for up to one hundred years. Sulphur dioxide contributes massively to the contamination of the air close to the coasts, especially around areas with harbours.

Wikipedia: “Smog is also caused by large amounts of coal burning, which creates a mixture of smoke and sulfur dioxide. World coal consumption was about 6,743,786,000 short tons in 2006 and is expected to increase 48% to 9.98 billion short tons by 2030. China produced 2.38 billion tons in 2006. India produced about 447.3 million tons in 2006. 68.7% of China’s electricity comes from coal. The USA consumes about 14% of the world total, using 90% of it for generation of electricity.”

▪ Special facts

- Pollutants come from cleaning products, furniture, cars, building materials, and the much debated odorless radon gas.
- The accelerated problem of air pollution is determined not only by the increase of the carbon dioxide in the atmosphere but the phenomenon is closely connected with deforestation as well. Trees absorb the carbon dioxide from the atmosphere and in turn release oxygen but with the reduction of the wooded areas like forests and jungles this causes new issues.
- Ships and cruise ships are major water pollutants that are responsible for the deaths of about 65,000 people every year.
- Power plants that generate the electricity which we rely on everywhere in our society cause about three and half thousand lung cancer cases and over thirty-five thousand heart attacks and this is just in the United States on a yearly basis.
- The chemicals in the water evaporate and fall back on the ground in the form of acid rains.
- There are 74 different kinds of pesticides that have been found in groundwater, which is used today as potential drinking water.
- Toddlers born to expectant mothers exposed to a common chemical found in insecticides show a slower brain development, a new US study says. Pyrethroid insecticides, including PBO and Permethrin, are commonly used in many homes.
- Space debris: There are now more than 370,000 pieces of junk compared with 1,100 satellites in low-Earth orbit (LEO), between 490 and 620 miles above the planet.
- US estimations calculate \$40-100 billion for environmental and economical damages from the oil-pest in the Gulf of Mexico.
- Dioxin is present everywhere in the environment. Dioxin is ultra-poison. Improper recycling of electronic scrap produces enormous environmental damages.
- The 3,000 most important enterprises produce environmental damages (“lateral effects”) of approximately 2 billion Euros.
- Each year, approximately 500 billion to 1 trillion plastic bags are consumed worldwide. That’s over one million bags per minute. Billions of them end up as litter each year. The Worldwatch Institute estimates that in the U.S. alone, an estimated 12,000,000 barrels of non-renewable petroleum oil are required to produce the 100 billion bags consumed annually. That’s over \$500,000,000 the country could be saving to put towards clean, green energy. These plastic bags can take from 400 to 1000 years to decompose but their chemicals residues remain for years after that.
- Ink found in printers produces fine dust that gets breathed in, which can produce illnesses as well as cancer.
- Billions of batteries in electronic products and cars, which are not correctly disposed of produce contamination that leads to severe health risks and cancer.

- ➔ In clothes and shoes there are chemical dyestuff that partly lead to allergies and in some cases even lead to cancer; e.g. colored bras whose dyes get transferred to the skin of the breast.
- ➔ If we take a global average life expectancy of 50 years then within 50 years 7 billion people will die. 7 billion corpses that need to be disposed of; staggering figures in the future. Already today, dead bodies contain a high concentration of chemical and medicinal substances. More and more people also have artificial components in their body.
- ➔ Bisphenol A: The hormonal effects of bisphenol A is suspected, among other things, to create erection and ejaculation problems, to create infertility, damage the development of the brain and trigger breast cancer. Bisphenol A is found in baby bottles made of polycarbonate, on paper receipts, baby pacifiers, tickets and invoices. Bisphenol A is absorbed through the mouth and skin contact.
- ➔ The sperm quality of men in industrialised countries is continually decreasing. Over 500 hormone related substances are responsible for this. These substances are found in a huge variety of products such plastic, insecticide, pesticide, medicines, flame retardants (chemicals), UV-filters in cosmetic products and sun creams.
- ➔ Most of the bees around the world are sick and billions are dying every year. Billions of bees have completely died off around the world. The entire human food chain is in danger given that 80% of all edible plants are dependant on bees. Bees pollinate over 90 types of vegetables, fruits and grain. The damage to harvests as a result of dying bees can easibly be in the hundreds of billions, if not over a trillion (dollars, euros).
- ➔ The loss of species is increasing at an alarming rate. The reasons are: construction, urbanization, deforestation, overfishing, climate change and invasive species. The diversity of species on our planet provides the basis of the fundamental elements of our ecosystem such as food, drinking water, medicine, wood, etc. Humanity must expect serious consequences in the coming 20-30 years.

▪ Contamination and Honey Bees

The loss of the honey bee threatens worldwide famine.

All the developed countries of the world are responsible for the collapse of honey bee communities.

In the United States, beekeepers are experiencing unprecedented die-offs of bees, some losing as much as eighty percent of their colonies. Commercial beekeepers in twenty-two states have reported deaths of tens of thousands of honeybee colonies.

A British researcher writes that there are probably many causes for the loss of honey bees, from loss of foraging grounds to viruses, parasites, chemical pollution, and other pathogens that spread quickly from continent to continent. Apart of contamination and pollution, climate chaos and extreme weather seem to be a major factor.

Mass deaths of honeybees affect more than 30 percent of bee colonies in the US and over 20 percent in some European countries, Reuters reported.

Some 52 of the world's 112 leading crops rely on pollination and honeybee losses can greatly affect the world economy as the value of insect pollination, mainly by bees, is put at about \$212 billion.

▪ **Space Debris**

More and more garbage is massing in outer space. Around 150 million objects are in orbit. Many are merely a few millimeters in width. 600,000 are bigger than one centimeter. When these pieces collide then they are like a hand grenade.

▪ **Oil and Gas**

Gas flaring has a global impact on climate change by adding about 400 million tons of CO₂ annually. 90 million tons of heat-trapping emissions are constantly dumped every 24 hours into the earth's atmosphere.

Oil firm Texaco is accused of dumping billions of gallons of toxic waste into unlined pits in Amazon's rainforests and rivers. The poisonous waste has not only contaminated water but also killed wildlife and increased cancer rates in the region. Apart from health issues, the locals say that their homes were destroyed and that their hunting and fishing grounds were polluted, all due to the oil company's actions.

The US state of Louisiana estimates that the damage to the environment and the economy from the oil spill in the Gulf of Mexico could reach 40 to 100 billion dollars.

This oil spill in the Gulf of Mexico was shown around the globe in the media. The oil catastrophe in the Niger delta on the other hand is completely concealed. Since 2006 over 3,000 leaks have been detected there.

Dioxins are organic elements, that can be found everywhere in our environment. They are colorless and odorless, long-lasting and liposoluble and they are toxic.

The incorrect recycling of electronic waste leads to high Dioxin contamination of the environment.

The United Nations states: Most corporate groups don't care about the massive destruction of the environment. The 3000 mightiest corporation alone cause environmental damages of nearly 2 billion (2000 million) euros per year.

The economy doesn't even take note of the nature and species around the globe.

▪ **Mines and Gold**

The constantly increasing price of Gold has increased the destruction of the Amazon rainforests in the Peruvian Madre de Dios six fold. Between 2003 and 2009 the Gold diggers working with primitive techniques destroyed 7000 hectares of untouched and extremely species-rich rainforest in Guacamayo and Colorado-Puquiri.

44.4 tonnes of Gold were digged out in the second half of 2010. The dark shadow: unscrupulous exploitation, destruction of nature and grave human rights violations.

Gold digging devours massive amounts of land and uses huge amounts of water. The creation of mines violates the human rights of thousands of people who are expelled from their towns and fields.

In Peru rain forests are devoured, in Guatemala Indian folks are expelled and attacked. In the “gold coast” of Africa, in Ghana, the chemicals contaminate rivers and people, and on top of it they lose their homes.

The use of the highly toxic Zyanide is extremely damaging to health and environment. This chemical is used to free the gold from the stone.

To get one gram of gold around five tones of stone need to be exploded. The toxic sludge is massed in huge artificial lakes. When it rains they risk overflowing and causing an environmental catastrophe. Zyanide is absolutely deadly.

▪ **Chemicals in Milk**

Scientists have revealed that a glass of milk can contain a cocktail of up to 20 painkillers, antibiotics and growth hormones. Using a highly sensitive test, scientists found a host of chemicals used to treat illnesses in animals and people in samples of cow, goat and human breast milk.

Man-made chemicals are now found throughout the food chain. The highest quantities of medicines were found in cow’s milk. Milk is contaminated also with the anti-depressant Prozac. The hormones from the contraceptive pill and HRT have been blamed for feminizing fish, leading to male fish producing eggs.

The tests also found niflumic acid in goat’s milk, while breast milk contained traces of painkillers ibuprofen and naproxen, along with the antibiotic triclosan and some hormones. If the findings are true for Spanish and Moroccan milk, they could equally be true for milk produced in Britain and northern Europe.

▪ **The main products of emissions**

- Toxic chemicals
- Plastic debris
- Industrial chemicals
- Industrial waste
- Agricultural waste
- Agricultural chemicals
- Petroleum, oil
- Sewage
- Rubbish, garbage
- Nuclear waste
- Emission of carbon dioxide
- Residue of medicines

Oceanic genocide: Between 700,000 and 1,000,000 sea birds are killed each year by marine debris such as discarded fishing lines and plastic bags. An estimated 100,000 marine mammals are killed each year by plastic in the ocean.

▪ **Drug residue cocktails**

- Laboratory experiments show: even at low doses, the drug residues in water stop cells from reproducing.
- Fish are experiencing reproductive problems as a result of chemical contamination.
- Beyond having their sperm damaged, some fish are actually changing sexes due to chemical and medicament elements.
- Some water creatures are experiencing organ failure and the inability to grow.
- More than 100 different pharmaceutical compounds have been detected around the world, affecting fish and wildlife everywhere.
- Antidepressants, blood pressure and diabetes medications, anticonvulsants, oral contraceptives, hormone replacement therapy drugs, chemotherapy drugs, antibiotics, heart medications and codeine are all showing up in the water supplies.
- At least 46 million Americans are drinking water contaminated with trace amounts of pharmaceuticals.
- India's rivers are full of dangerous pharmaceuticals. In one Indian river 90 different pharmaceutical elements have been found, from pharmaceutical companies dumping their waste in the river.
- All kinds of drugs are being found in the bodies of fishes near major U.S. cities.

Drug residue cocktails actually do cause harm to humans. How long will it take until such effects start to globally strike down a billion humans? No laws exist to protect the public from such pharmaceuticals.

▪ **Other chemicals in the water**

- Natural oestrogenes
- Synthetic oestrogenes
- Clofibric acid
- Phytoestrogene
- Benz(a)anthracen
- Benzo(a)pyren
- Benz(a)anthracen
- Benzylbutylphthalat
- Bisphenol
- Nonylphenol
- Nonylphenoldiethoxylat
- Endosulfan
- Dieldrin
- Chlordan
- Diethylhexylphthalat
- Dibutylphthalat
- Tributylzinn
- Dichloranilin

- Dichlordiphenyldichlorethylen
- Linuron
- Diuron
- And much more ...

▪ **The result of contamination**

- Millions of people die every year due to fine dust: cars, industry, heating with oil, all kind of mining.
- Hundreds of millions of people die due to chemical emissions from the industry.
- More than 3,000,000,000 people suffer from illnesses and disease due to pollution.
- Air, soil, sea, oceans, drinking water, nature and animals are dramatically contaminated.
- Chemical reactions in human bodies will reduce fertility or create handicapped babies.
- Dying in the future will be very painful due to chemical elements (combined multiple effects) in the body.
- Radicalism, terrorism, and archaic religious teachings will increase due to the global misery and suffering.
- The industrialized nations will fall into poverty and indescribable misery with all its implications.
- Exposure to two types of common pesticides, rotenone and paraquat, may place individuals at a higher risk of developing Parkinson, a US study reveals.

▪ **Human causes of pollution**

- Loss of human values
- Loss of genuine spirituality
- Unlimited capitalism
- Uncontrolled financial business
- Corruption
- Lobbyism
- Lack of adequate education
- Archaic religions imprisoning people in illusions
- Megalomania
- Narcissism
- Egoism
- Individualism
- Greed
- Loud-moulds
- Religious lunacy disrespecting the human problems
- Unlimited consumption
- Fun oriented society and life style
- Pure hedonism
- Unlimited consumption
- Brainwashed and manipulated (seduced) people
- Life lies
- Religious obsession
- Arrogance

- Ignorance
- Laziness
- Superstition
- Brainless ways of living
- Lack of leadership integrity
- Insensibility and indifference
- Lack of moral education
- Incompetent politicians

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

12. Climate Change

▪ Basic facts

3,000 of the very best scientific experts in the world confirm the human made Climate Change with its frightening consequences.

2005 as the hottest year measured since instruments were first used systematically in the 1880s. Nineteen countries set all-time high temperature records.

The past decade (2000-2010) has been the hottest ever measured.

We are destroying the climate balance and the balance of the eco-systems that are essential to the survival of our civilization, of our children and our following generations.

The 15 nations (of the UN Security Council) warn that global warming can become a threat to global peace. Droughts could lead to food and water wars.

Irreversible destructions of the environment: the Gulf Stream, the glaciers in the Alps and the massive ice caps in Greenland and in Antarctic. Source: the human emitted greenhouse gases, that make the global average temperature rise.

The emission of greenhouse gases speeds up the melting of the ice caps in west Antarctica.

Previously the transformation of an ice age took 5000 years at an increase of 5 degrees. If we continue as today we will reach an increase of 5 degrees in 100 years.

If for example the monsoon rain in India would fail to arrive as a result of climate change, then in one go the food of around 1.2 billion people would be at stake.

Greenhouse gases in the atmosphere now are at 329 parts per million and climbing, with most climate scientists warning that the level must remain below 350 ppm to sustain life as we know it. The Intergovernmental Panel on Climate Change estimates that the measurement could reach 541 to 970 ppm by 2100.

At that point huge parts of the planet, beset with over-population, droughts, soil erosion, freak storms, massive crop failures and rising sea levels, will be unfit for human existence.

As a result of the ice melting: The algal bloom in the Arctic comes earlier. This is a result of climate change, which brings the ice in the North Pole region to melt. This has heavy consequences for the food chain.

In the past 25 years the water temperature of the 160 biggest fresh water basins has risen. Every decade the water temperature has risen by an average of 0.45 degrees

Celsius, in many seas up to 1 degree. The biggest increase was registered in Northern Europe, followed by Siberia, Mongolia, Northern-China and South-east Europe around the Black Sea.

Minor temperature changes can already lead to an increase in algae growth. This can destroy the habitat of fish or lead to foreign unknown species reproducing, which in turn changes the natural ecosystem of the Oceans.

More greenhouse gases than ever before: Carbon dioxide, methane and nitrogen oxides are the gases that produce global warming. The more we emit into the atmosphere, the faster climate change develops. The most recent measurements from the global weather organization reveal absolute peak values. Researchers fear, that climate change has already taken on a momentum of its own.

It is clear, that Asia and the Pacific regions are the ones most affected by the changes in climate. The heating of the planet and its consequences could result in masses of migration in the coming decades.

Last year, 89 per cent of the 207 million people that suffered from natural catastrophes lived in Asia. In China floods and landslides in 2010 caused damages of 18 billion dollars, in Pakistan the damages from the floods reached 9.5 billion dollars.

The US space agency NASA has reported the largest collapse of our Earth's upper atmosphere in history, and they don't know why.

Since the Gulf of Mexico oil and methane gas leak our world has experienced its hottest temperatures in recorded history.

▪ **Facts – Examples**

a) Ice melting:

- The melting of Arctic and Antarctic ice started in 1990.
- Today each year more ice is melting than the amount of ice that exists in the Alps.
- Glaciers are melting faster than expected and jeopardizing the demand of drinking water.
- The melting of the glaciers in the Himalayas will affect 70% of India's population dependant on agriculture.
- The Arctic summer sea ice will disappear in the second half of the century.
- Glaciers are melting twice as fast as in 1999. Billions of people are affected!
- Melting glaciers will initially increase flood risk and then strongly reduce water supplies.
- According to a new study global warming will result in the defrosting of 30-60 per cent of all permafrost by the year 2,200. As a result around 190 billion tones of carbons emissions will go into the atmosphere. As the permafrost begins to thaw they rot and thus set free greenhouse gases especially the damaging carbon dioxide and methane gases.

b) Rise of sea level:

- The global average sea level would probably rise by 28-43 cm by the end of the century; but is likely to rise by about 1.4m globally by 2100 as polar ice melts.
- Increasing sea level to be expected within 300-400 years: 3-4 meters.
- Many islands and costal towns will be lost already at a global warming of 2°C.
- Methane gas emanating from the bottom of the Arctic Ocean is harmful to the climate.

The increase in sea level by 100-150 cm by the year 2100 is more than certain.

The rise in sea level of the Mediterranean Sea was lower than in the rest of the world due to atmospheric pressure, but since the start of the 21st century the levels of the Mediterranean have regained pace and seem to be accelerating... The sea level in the Mediterranean has risen by between 1 and 1.5 millimeters each year since 1943, but this does not seem set to continue, because it now seems that the speed at which it rises is accelerating"... Since the start of the 21st century the level has already risen by 20 centimeters. During the next 30 years the rise in temperatures and in sea level will continue: estimated 20 cm per 10 year which means, for instance, more than 60 centimeters in 30 years (not only in the Meditaerranean Sea)..

UK: Seas could be 1.5 meters higher by the end of the century.

c) Facts about global warming:

- Probable temperature rise between 1.8C and 4C; or: between 1.1C and 6.4C.
- Arctic summer sea ice will disappear in the second half of century.
- The year 2010 is almost certain to rank in the top 3 warmest years since the beginning of instrumental climate records in 1850.
- Warming will have many severe impacts, often mediated through water.
- Increasing global warming triggers an unstoppable chain reaction with unknown effects.
- June 2010 was the warmest month on record worldwide, according to a report from the National Oceanic and Atmospheric Administration. Warmer-than-average conditions were present across nearly all continents, including much of the United States.

d) Effects of global warming:

- Areas of the Mediterranean Sea are drying out every year faster. Forest fires will increase.
- Areas around the Mediterranean and other subtropical regions: increase in wildfires and tropical storms.
- Water shortages, heat waves, tropical storms, hunger, and floods will be an ever growing threat.
- 85% of major deltas have seen severe flooding in recent years.
- The area of land vulnerable to flooding will increase by about 50% in the next 40 years.

- Water shortages, hunger, flooding and damage to homes will be a heightened threat.
- Heat waves, rainstorms, drought, tropical cyclones and surges in sea level are among the events expected to become more frequent, more widespread and/or more intense.
- Until 2100 up to 20-40% of the species (plants, animals) are endangered.
- Frequent drought and higher global temperatures could destroy until 2100 up to 70% of the Amazon rain forest. Enormous amounts of CO₂ (carbon dioxide) will increase global warming.
- The US space agency NASA has reported the largest collapse of our Earth's upper atmosphere in history, and they don't know why.
- Since the Gulf of Mexico oil and methane gas leak, our world has experienced its hottest temperatures in recorded history.
- Climate change (global warming) and its consequences will produce an inter-regional movement of population of unknown extent, especially in Asia.
- With earthquakes, heat waves, floods and snowstorms affecting 208 million people, killing nearly 300,000, and costing \$110 billion in losses in 2010 alone.

▪ Thermohaline Circulation

- The latest satellite data establishes that the North Atlantic Current (also called the North Atlantic Drift) no longer exists and along with it the Norway Current. These two warm water currents are actually part of the same system that has several names depending on where in the Atlantic Ocean it is. The entire system is a key part of the planet's heat regulatory system; it is what keeps Ireland and the United Kingdom mostly ice free and the Scandinavian countries from being too cold; it is what keeps the entire world from another Ice Age. This Thermohaline Circulation System is now dead in certain places and dying in others.
- The Thermohaline Circulatory System, where the warm water current flows through a much cooler, much larger, ocean, effects the upper atmosphere above the current as much as seven miles high. The lack of this normal effect in the eastern North Atlantic has disrupted the normal flow of the atmospheric Jet Stream this summer, causing unheard of high temperatures in Moscow (104F) and drought, and flooding in Central Europe, with high temperatures in much of Asia and massive flooding in China, Pakistan, and elsewhere in Asia.

▪ Floods and Droughts

Gigantic floods displaced 20 million people alone in Pakistan.

In Australia, 28 of the 32 districts have been flooded.

Many places around the world are experiencing larger and more frequent extreme downpours and snowstorms.

Historic drought and fires in Russia killed an estimated 56,000 people.

Wheat and other food crops in Russia, Ukraine and Kazakhstan had to be removed from the global market.

This spring 2011 the majority of the counties in Texas were on fire.

Before summer 2011, Arizona is fighting the largest fire in its history.

Extreme droughts in central China and northern France are currently drying up reservoirs and killing crops.

The acceleration of ice loss in both Greenland and Antarctica has caused another upward revision of global sea-level rise. The numbers of refugees expected from low-lying coastal areas will dramatically increase.

Scientists warn: The record droughts, fires, floods and mudslides continue to increase in severity and frequency. Weather extremes are more frequent and intense due to global warming.

Thousands of scientists have been warning that things will get much worse, if we continue the reckless dumping of more and more heat-trapping pollution into the atmosphere.

Drought is projected to spread across significant, highly populated areas of the globe throughout this century.

20% of the global-warming pollution we spew into the sky each day will still be there in 20,000 years.

Actual consequences of Climate change are of highest importance for humans: The price of corn has doubled over the last six months. The price of wheat has more than doubled over the past year. The price of soybeans is up about 50% since last June. The price of cotton has more than doubled over the past year. The commodity price of orange juice has doubled since 2009. The price of sugar is the highest it has been in 30 years.

▪ Superstorms

Superstorms is combined with the cataclysmic destruction of over one-third of Russia's crops due to historic fires and drought, the historic drought in China that is now being warned could cripple their entire winter wheat crop.

Superstorms have pounded Southern Africa leaving their agricultural sector in ruins.

Superstorms have virtually destroyed Sri Lanka's ability to feed itself.

Superstorms killed over 2,000 in Pakistan and destroyed its agriculture sector

Suprstorms produced historic fires and drought in Ukraine and destroyed 20% of their crops, the record cold and snow hitting a European Continent after their worst flooding in decades.

Superstorms hitting Brazil left nearly 700 dead

Superstorms produced catastrophic drought in Argentina.

To all of this and more, the damage done in the past 12 months to our world's ability to feed its 6.8 billion human beings has been completely destroyed.

- 300,000 deaths and 300 million people are affected every year by global warming.
- Every year an average of over 400 million people are directly exposed to a flood.
- 200 million are to be displaced due to rising sea levels, heavier floods, more intense droughts (other figures go up to 500 million).
- Floods will affect 2 billion by 2050 due to climate change, deforestation, rising sea levels.
- Lack of water threatens one-sixth of the world's population, India, China, and South America.
- 3.2 billion people will experience water shortages due to climate change.
- An additional 600 million people are at risk of famine due to climate change.
- Hundreds of millions will be affected by floods in the future.
- Most of the world's major river deltas are sinking, increasing the flood risk faced by hundreds of millions of people.
- Food speculations increase food prices by 10-40% yet in 2011, unaffordable for billions of people. Hunger will increase dramatically!

▪ Eco-Systeme

As a result of the thawing of permafrost enormous amounts of greenhouse gases are emitted into the atmosphere. Scientists warn insistently of the consequences.

Global warming will lead to the thawing of one to two thirds of the global permafrost by 2200. The atmosphere will have to take on 190 billion tones of carbon dioxide from this.

The permafrost areas in Canada and Russia for example, store large amounts of frozen plants. If they begin to thaw, then these plants rot and release greenhouse

gases – especially the very damaging methane (CH₄), but also carbon dioxide (CO₂).

Depending on forecasted scenarios by 2100 only 18 – 45 of today's rainforests would still exist. The tropical forests in South America, South-east Asia and Africa are home to more than half the planet's animal and plant species. The combination of climate change and deforestation forces these species to adapt, migrate or die.

Around 41 per cent of the oceans are badly damaged as a result of direct human intervention; only 3.7 per cent of these waters are still untouched.

Only 15% of Japan's land is suitable for cultivation, meaning they have to import about 50% of their requirements for grain and fodder crops and rely on imports for most of their supply of meat.

▪ **Costs of climate change**

- Costs of extreme weather alone could reach 0.5 to 1 per cent of world GDP in 40 years.
- Impacts of climate change will cost \$75-100 billion per year in the developing world.
- The total cost of global warming will be 3.6 percent of GDP, if nothing is done.
- Hurricane damage, real estate losses, energy costs, water costs: US\$1.9 trillion per year.
- Floods will produce damages in the trillions of US dollars in the future.
- UN: 500 billion USD in costs for climate damages per year (in developing countries alone).
- Estimated yearly costs of climate change damages: over 1 trillion Euros.
- Costs of 500 billion dollars per year due to climate change only for developing countries.
- The costs of damage from extreme weather (storms, hurricanes, typhoons, floods, droughts, and heat waves) will increase rapidly at higher temperatures.
- A 5 or 10 per cent increase in hurricane wind speed, linked to rising sea temperatures, is predicted to double annual damage costs, in the US.
- Heat waves with agricultural losses reached \$15 billion will be commonplace in 30-40 years.
- Climate change could cost the world up to 25% of its entire wealth. Global gross domestic product (GDP) could be reduced by up to 20 per cent due to the damages caused by rising temperatures, droughts, floods, water shortages and extreme weather events.
- In the UK, annual flood losses alone could increase from to 0.2 to 0.4 per cent of GDP once the increase in global temperatures reaches 3°C or 4°C.
- Fighting against climate change could cost the international community up to \$20 billion per year.

▪ **Prediction**

Thousands of scientists and thousands of dreams I experienced during the last 30 years draw a frightening picture about our future over the next 20-30 years:

- Rapid climate change will most probably result in a global catastrophe costing millions of lives in chaos, wars and natural disasters.
- A strong and fast increase of climate change could bring the planet to the edge of anarchy. Conflicts and warfare will define human life.
- Widespread flooding as a result of an increase in sea level will create major upheaval for hundreds of millions of people.
- Dramatic shortages of water and energy supply will become increasingly harder to overcome, plunging the world into global war.
- Britain must expect a “Siberian” climate by 2020. Nuclear conflict, mega-droughts, famine and widespread riots will erupt across the world.
- Over the past 50 years around 60 per cent of the global ecosystems have been heavily damaged. Over 40% of the oceans are also significantly damaged due to human behavior. The damages increase exponentially every year. The additional combined damages between interacting ecosystems will produce combined damages of unknown dimensions. In 10-15 years around 95% of the global ecosystems humans depend on will be damaged.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

13. Unemployment

The statistics about the rate of unemployment in general are rather obscure and manipulated with hidden criteria. The figures do not show the far worse reality. The manipulations are manifold to get rid of unemployed people from the statistics: people put in further education programs, people after a certain period not getting unemployment benefits, people integrated in part time jobs with low salary, young people that have not started to work or not tried to find work (because to doing so is futile), students unable to find employment after graduation, prisoners, early retired people who could not find a job anymore), etc.

World unemployment rate: over 20%, under-employment and not registered people included.

- 80% of workers in the industrial nations are scared of losing their job and see no future perspectives. The middle class is shrinking in most of these nations, especially in Europe and the United States. Many well educated professionals are finding it difficult if not impossible to find a decent and suitable job or they are simply underpaid. The number of University graduates that do not find jobs or are underpaid is increasing dramatically.
- Most of the workers in the private sector do not have long-term job security anymore. For more and more couples, the creation of a family is becoming a financial nightmare. At the same time the rich are becoming richer and richer. Additionally real estate, food, and consumer goods are all becoming more expensive. Politicians cheated their citizens and at the same time they are earning more and more.

▪ Rate of unemployment

In many countries the rate of unemployment is extremely high. The figures vary every month and year. Some examples:

- Spain, January 2011: more than 4.2 million; 4 of 10 under 25 years have no job!
- Another source about Spain: end of 2010: 4.7 million (Source: El Pais).
- Germany, January 2011: 8.1%; 3,4 million people are unemployed.
- France, February 2011: 12.4%; estimated more than 3 million people.
- EU27, March 2010: 9.6%; 23 million unemployed people.
- EU27, March 2010: 20.6% unemployed people less than 25 years old.
- US, April 2010: 9.9%; 15.3 million people are unemployed.
- UK, May 2010: 8.1%; 2.51 million people have no job.

The United Nations say that nearly 212 million people were unemployed around the globe in 2009. That is 6.6 per cent of the global workforce. The number will increase during 2010 with about 3 million more people unemployed.

The global youth unemployment rate rose by 1.6 percentage points to reach 13.4 per cent in 2009 relative to 2007.

For many of the unemployed there is no viable form of protection with social services. 400,000,000 young people will want a job within the next 10 years. Most of them will not have work and will live under very poor social conditions during their entire lives. Critical statement: Statistics are manipulated. Many countries have absolutely no reliable statistics. Does earning 1-2\$ per day working here and there mean being employed? Around the world there may be over 2 billion people without regular work and income. There are probably more than 4 billion people who cannot earn enough for a reasonable lifestyle.

Globally, an estimated 1.53 billion workers were in vulnerable employment in 2009, which corresponds to a vulnerable employment rate of 50.1%.

US unemployment 2011, April: the real unemployment number was actually 17.7 percent. The official government unemployment figure has been carefully crafted to intentionally underestimate actual unemployment. The federal lie includes 13.5 million unemployed workers but the real number is more like 28.2 million.

Worldwide, 78 million young people were unemployed in 2010

Globally, some 1.53 billion workers were in vulnerable employment in 2009

In the 35 countries for which data exists, nearly 40% of jobseekers have been without work for more than one year and therefore run significant risks of demoralization, loss of self-esteem and mental health problems.

Spain: More than 800,000 people are illiterate, and of these, seven out of ten are women. How can they get a job?

▪ Unemployment and fear of unemployment produces

- Low self-esteem
- Illnesses
- Permanent state of fear
- Sleeping disorder
- Unhappy state
- Bad mood
- Alcoholism
- Depression
- Exaggerated smoking
- Passivity
- Isolation
- Feeling of shame

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

14. Trouble Spots

Definition: A place of recurring trouble, riots, civil war, religious fights, political unrest, especially a country or region where fighting between opposing groups often happens.

Motives: Poverty, hunger, access to water and resources, food price increase, lack of money, financial collapse, high rate of unemployment, high rate of taxes, lack or abuse of human rights, corruption, megalomaniacs, exploitation of manpower (slavery) and resources, ignorance towards citizens, lack of democracy, dictatorship, mega land ownership, political interests, demands for independency (separation), martial laws suppressing people or minorities, apartheid, ethnic conflicts, military coup, extreme ideologies and dominance of religion (fundamentalism), and collective religious psychosis.

- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

15. Political Power

▪ The Elites

The elites do what all elites do. They launch more wars, build grander monuments to themselves, plunge their nations deeper into debt, and as it all unravels they take it out on the backs of workers and the poor.

The collapse of the global economy, which wiped out a staggering \$40 trillion in wealth, was caused when our elites, after destroying our manufacturing base, sold massive quantities of fraudulent mortgage-backed securities to pension funds, small investors, banks, universities, state and foreign governments and shareholders.

The elites, to cover the losses, then looted the public treasury to begin the speculation over again. They also, in the name of austerity, began dismantling basic social services, set out to break the last vestiges of unions, slashed jobs, froze wages, threw millions of people out of their homes, and stood by idly as we created a permanent underclass of unemployed and underemployed....

As Sigmund Freud grasped in “Beyond the Pleasure Principle” and “Civilization and its Discontents” human societies are as intoxicated and blinded by their own headlong rush toward death and destruction as they are by the search for erotic fulfillment.

And the elite are all at the mercy of finance. Who owns the significant financial institutions and who has the say in the world of finance?

The elites destroy the core of societies in Europe and America; also in this way for example: British society is witnessing a swift end to traditional family life with 46 percent of children now born to unmarried mothers... nearly half of all children will go through the trauma of seeing their parents divorce before they are 16....A child in a single-parent family is 75 percent more likely to struggle at school, 70 percent more likely to become addicted to drugs, 50 percent more likely to develop a drinking problem and 35 percent more likely to be unemployed in adulthood

In Germany a third of singles are against marriage. Many unmarried Germans want to remain unmarried. Only 43 per cent of them can imagine getting married sometime in the future.

On the internet and in the media one can find many critical observations with respect to politics. The facts of yesterday are forgotten or covered up with new facts. A lot is interpreted and assessed subjectively. Depending on the side of the political questioning or the analysis one will find completely different pictures of a concern. By using a few examples we intend to motivate questions and hypotheses, which could lead to further questions and meticulous investigations. One or the other critical observations may be seen as a conspiracy or allegation.

We understand the political topics and facts here as a starting point for hypotheses, which the science of history, free from ideology and specific interests should

investigate. 95% of everything that is really important for the citizens, especially critical circumstances on a local, national or international level and on the earth as a whole are either categorically avoided by the media or presented in extreme simplicity with the intention of depriving the people of the seriousness of the situation. The people need to be enlightened about the many lies and tinkering with truths.

We can only provide some classical examples of extremely hot topics such as those discussed on hundreds of thousands of websites:

▪ **Politics, Power and Money**

With politicians it is first and foremost always about money. Money for the own pocket, privileges and guarantees for a future to follow their political career. Governments generally have far too much money.

Instead of serving the people, politicians first serve themselves, their morbid narcissism and their 'clubs'. This makes them fall easy prey to blackmail. They are secretly blackmailed or lured for whatever, whenever. Rarely are politicians out of vocation or for genuinely ideological reasons; but always out of self interest.

Many governments sell or lease agricultural land and provide licenses for others to exploit the resources in their countries. This serves the elite, never the population; especially not as a measure against poverty or unemployment.

Governments misuse and misspend far too much money from taxpayers for their own protection. For the same purposes they continuously create new laws to limit the rights of the citizens and increase the size of the elite's wealth (economy).

Most government officials have no comprehensive knowledge of the real situations faced by their own people, of global humanity and the planet's best interests. They are unable to think in complex networks, oriented in the past and the future.

When politicians don't know how to deal with conflicts due to a lack of knowledge, skills and personal character, they react with brutal force. They are not capable of identifying the conflict as a result of their own failures. They are not capable to engage in dialogue with the citizens and together to work out solutions.

Most politicians are adept at exaggerating, understating, sweet talking, glossing over, lying, cheating, forging, seducing, manipulating, maneuvering and coming to terms. For these leaders, almost every means is justifiable to achieve their objectives and to use every possible loop hole including covert extortion.

Most politicians have an idea of mankind from the middle Ages. Practical politics has not changed since 500 years in its fundamental principles. They "lead" their people and yet know nothing about human beings or the inner being.

Many politicians misuse God and religion for their own perverse political games. They violate the values that earlier pioneers in their own people fought so hard to

acquire. Slavery, the conquest and imperialism of the past have merely changed in form and appearance.

Most politicians do not want truth. The logical conclusion is simple: they are never in the position to solve the big problems in their own country let alone the critical state of humanity and the earth. They always talk about the (essential) growth of the economy, never about quality and balance and never about the “true inner being”.

Most women in politics simply copy the patterns of men. In this sense they are nothing but masculine women. The qualities of real (natural) women are not welcome in politics and also not in religion. Also as a result of this politics (and religion) will and must fail.

The state administration, the servant of power is a massive Moloch. Most people that work within the state administration are absolutely incapable of reacting to imbalance and of dealing constructively with the individual situations of a citizen. Most of them suffer from feelings of inadequacy in their ‘elevated’ positions and compensate by working to the letter. Their completely inefficient apparatus sucks up millions if not billions and in spite of supposedly serving the people treats them like human biomass, dealing with them like industrial mass production. Politicians prefer it like this!

Politicians experience maximum lust at the destruction of the Archetypes of the Soul: For example with love, truth, marriage and family, the inner life and the inner Spirit. With that they destroy themselves and they destroy the future of their own children, of their population, and humanity as a whole. This is the way it goes in Marbella, Madrid, Zurich, Berlin, Paris, London, in the United States, in Israel, in the whole capitalist coalition as well as in other countries, completely infected with European capitalism (Imperialism), not to talk about contaminated Christianity over 800 years.

In January 2011 a Swiss politician of highest executive position said: “I recommend to every woman, that she should get herself a man who is active in the military. Everything else is like at the discount store; you never really know what you are buying.” This attitude we already know from the Nazis and from Hitler’s loyal followers.

The people are blind, brainwashed, misled and deceived, too lazy to think, deformed by the education system, rotten by religion and focused only on their own daily physical and material needs.

▪ Holocaust

In many states there are laws that prohibit anyone from critically investigating or even critically expressing oneself about the Holocaust. In actual fact most of the critical investigations do not deny the Holocaust; the murder of Jews during the Second World War. The critical statements and observations are usually related to the alleged number of “6 million Jews” and about the subject matter of what can be defined as murder and what can be defined as war victim.

Critics claim that it was never 6 million Jews who were murdered, that such a figure is impossible. One thing can be said as a matter of fact: It is not important if it was 6 or 3 or “only” half a million. It is and will remain a terrible genocide. The consequences however are extremely different: Compensation payments and collective (German) guilt as a means for endless political manipulation (blackmail and extortion) come to a new light. Israel and generally affected Jews have received billions of DM, USD and EUR to date.

As a follow up, one must also integrate the judgement of other collective murders in the 19th, 20th and 21st century. From what figure can one talk about “genocide”? To this topic there are far worse hypotheses (evil allegations?): Jews (Zionists) proposed their plan to Hitler of murdering millions of Jews, in order to subsequently take claim the right to Palestine and as blackmail for massive financial payments in the future.

There are at least 100 historical and scientific questions that would need to be clarified to this matter. The Holocaust laws prohibit this. These whole circumstances make the whole Holocaust affair extremely suspicious: indeed something very explosive is being covered up, something that nobody can uncover or discuss. Science should uncover this transparently in the interest of the people!

The necessary questions to the “extensiveness” of the Holocaust are simple:

- The Jewish population (officially proven) before and after the war, specifically according to region and transportation routes (transport means) from where they live to the exact location of death, statistically calculated from the first day to the last. Are the victims calculated from 1932 or 1939 until 1945?
- What is defined as “murder” and “genocide”? Are the “normal” war victims also included in these figures (bombs, disease, hunger, accidents, sinking ships of those fleeing, etc.).
- How many were gassed where and when? How much gas was needed for this? Who provided this gas? Who paid for it and how? How long does the procedure of such “gasing” take? Size of a group? How was this technically and timely organized? How many Jews were gassed, shot and hung? Are the capacities traceable to the number of victims, the resources, the means of transport, the cost and the “instruments” of death, etc.?
- Corpres: Where were the 6 million corpses taken to? How much wood or coal was needed on average per victim? How was this material provided, when and by whom and how much did who pay for it? How long does the burning of a group of corpses take? Where did they take the ash? How was the ash transported? What vehicles were used? Where are all the remains? How much time is needed per procedure and how long did all the procedures, including transport take? The burning of millions of Jewish corpses produces immense amounts of smoke and smell. How was this documented amongst the general population and when? Has any politician from the time registered anything, anything specific in their memoires?

- ➔ To be honest it would be essential to meticulously analyze the witness reports and (secret) documents from the time in order to verify if the Holocaust objectively occurred in the manner and form it is portrayed. It must also be taken into account that politics and religion are masters in the art of forgery and lying.
- ➔ If there are people that claim that the Holocaust of 6 million Jews did not happen, then the government simply has to provide facts; 100% factually documented, without a doubt – and not punish the people who ask! Punishment is the only thing that politicians today can do: punish those that put the truth on the table or those that merely begin to try and search for the truth!

▪ **Tourism and taxpayers money**

The Spanish government has earned billions over the past 25 years from taxpayers and from tourism as well as from the sale of property to foreigners (especially in the Mediterranean areas, Balearic Islands, Canary Islands). At the same time the European Union provided further billions to Spain. What did the Spanish government do with these billions? The Costa del Sol, Costa Blanca, Mallorca raked in billions if not hundreds of billions in taxes, duties and fees.

Where exactly did this money go? One thing is certain, the money did not go to a nationwide efficient infrastructure (public transport, sewage system, renewable energy), nor into a solidly founded and all-sided economy in these regions. That is why today Spain has its self-inflicted financial crisis and its extremely high unemployment. The same questions have to be asked in Greece and other regions of the Mediterranean. Science should investigate this transparently in the interest of the population!

In Spain there are over 300,000 bars, cafes and restaurants as well as hotels with dining areas where smoking used to be permitted, later in designated areas (for smokers and non-smokers). Since 2011 smoking has been prohibited in hospitality businesses, also in specific public places such as around hospitals. This has a dramatic economic effect on the owners of hospitality businesses; with an unemployment rate of over 20%, regionally up to 40%, this new law is like throwing petrol on a fire.

▪ **Power of the Banks**

They say that the most important banks (as well as the central banks of the USA and EU) in the capitalistic world, first of all in the USA, Germany (and in Switzerland), are in the hands of Jews or rather Zionists, as owners or managers in the top positions. The estimated value of the Rothschild family's wealth is at 500 trillion dollars. Who has the say on earth? They also say that half the world owes these banks billions of dollars. Is this merely a conspiracy? What is fact?

In any case one thing is certain: The power of the banks over governments is bigger than the power of the governments over banks; or both parties have the other at gunpoint. Who profits what from all this debt? Where do the massive sums of interest payments and capital flow? If this should all be true then this would show new views regarding Israel. The power of the media in the Christian-Jewish world also has to be

put into the context of these critical questions. Science should transparently investigate this in the interest of the population!

▪ **Media Propaganda**

The media use and abuse a great variety of mechanisms:

- When people are afraid, they don't think rationally. And when they can't think rationally, they'll believe anything.
- Go after the person's credibility, motives, intelligence, character, or, if necessary, sanity.
- Where anti-racists are accused of racism, or in the climate change debate, where those who argue for human causes of the phenomenon are accused of not having science or facts on their side.
- Why lie about the historical facts, even when they can be demonstrated to be false? Well, because dogmatic minds actually find it easier to reject reality than to update their viewpoints.
- If you can find a group to blame for social or economic problems, you can then go on to a) justify violence/dehumanization of them, and b) subvert responsibility for any harm that may befall them as a result.
- Violence becomes synonymous with power, patriotism and piety.
- Bullying and yelling works best on people who come to the conversation with a lack of confidence, either in themselves or their grasp of the subject being discussed.
- The idea is to deliberately confuse the argument, but insist that the logic is airtight and imply that anyone who disagrees is either too dumb or too fanatical to follow along.
- With morality politics, the idea is to declare yourself and your allies as patriots, Christians and "real Americans".
- Because the speaker has been blessed by God to speak on behalf of all Americans, any challenge is perceived as immoral.
- Being repetitive, being ubiquitous and being consistent. The message must be repeated cover and over, it must be everywhere and it must be shared across commentators
- The disdain for education and other evidence of being trained in critical thinking are direct threats to a hive-mind mentality,
- Any attempt to bring the discussion back to the issue at hand will likely be called deflection, an ironic use of the technique of projection/flipping
- The more someone is losing their temper in a debate and the more intolerant they are of listening to others, the more you can be certain they do not know what they're talking about.
- The fact that a lot of people believe something is not necessarily a sign that it's true.

The average Americans watches television 5-6 hours per day. In the average household, at least one television set is turned on more than eight hours a day. Moreover, approximately 75 percent of those using the Internet frequently watch television at the same time that they are online.

What the managers and top executives of the state-run British Broadcasting Corporation claim is nothing but sheer lie and falsification.

The BBC is simply a mouthpiece for spreading biased falsehood and untruth.

Throughout the past decades, particularly following the establishment of the Israeli regime in 1948, BBC has made concerted efforts to function as a mouthpiece for Israel and the Zionism movement... spreads biased falsehood and fabrication simply to please the United States and Israel.

BBC has the second largest budget of any UK broadcaster with an operating expenditure of £4.26 billion in 2009/10 compared to £5.9 billion for British Sky Broadcasting.

They are clearly aware of the fact that this news network is their country's propaganda instrument and once this instrument is derailed and weakened their international influence, and their power to intervene in other countries' internal affairs will diminish dramatically.

The first rule is to view the Middle East through Israeli eyes: Palestinians are terrorists and aggressors; Israelis are victims who retaliate; self-defense is their motive; so is avoiding the truth.

Another rule is to ignore and veil the historical facts and figures regarding the Israeli-Palestinian conflict, "Ignore the historical context", avoid mentioning six decades of dispossession, occupation, and hundreds of preceding years during which Palestine was the Palestinian homeland; also suppress the idea that a Jewish homeland first originated with Zionism's late 19th century's founding and didn't exist prior to that."

Another rule is to suppress or minimize news which is unfavorable and unpleasant to the Israelis: This rule is ironclad and unforgiving; open debate isn't tolerated; facts are suppressed; aggressors are called victims; self-defense is called terrorism; news is carefully "filtered," minds manipulated, and truth conspicuously absent;

War and militarization are being passed off by mainstream media as "humanitarian intervention".

Journalists are pressured into accepting media disinformation as routine, as part of the job.

Professional journalists committed to truth in media are invariably penalized by their corporate employers.

This is a system which rewards mediocrity. Those who lie are promised fame, funding and career advancement.

Those who refuse to abide by the standards of the mainstream media are not only fired, they are blacklisted and their prospects extinguished.

Journalists who have the courage to say the truth find themselves marginalized and excluded, and therefore often driven into poverty.

Poisonous polluters and right-wing or left-wing ideologues fight against science and reason. Pseudo-scientists are financed from these ideologues (industries, politics) to produce doubt about what is true and what is false. They even buy elected officials with bribes. They spend hundreds of millions of dollars each year on misleading advertisements in the mass media. They hire anti-climate lobbyists to lure politicians.

The extremist ideologues, financed or employed by carbon polluters, undermine the public's respect for Science and Reason by attacking the integrity of the scientists. These extreme ideologues accuse scientists of being greedy extremist ideologues.

To have access to television requires immense amounts of money; we are talking about millions of Euros. Communicating with people is only for the super-rich and mega-power people possible. Who pays the marketing of political programs and political campaigns? The values of democracy are gone!

The power has replaced the truth and accuses the truth to be false.

Our ignorance is always the bliss of politicians, the corporate managers, and the elite.

▪ Israel

Most people in America and Europe, as well as many other countries, especially in the Islamic world, know that the Middle East, that is Israel, is the most explosive, never ending hot spot since 1948. During 60 years Israel has silenced the world by raising guilt complexes and accusations, demands and wars and morally obliged every politician to get involved in the Middle East issue. The United States has blocked over 100 United Nations resolutions against Israel. Nobody to this day has resolved the terrible suffering of the Palestinian people.

It doesn't work: The religious psychosis is vertiginous and the moves of the Israeli government can only be compared with Nazi practices; arguably a form of dealing with a "trauma". Sigmund Freud and Carl Gustav Jung already said: history is engraved in the (collective) unconscious and it repeats itself until it is solved. Seen from that perspective look at the Balkan from 1991-1996. Seen like that in Israel today. Since 2,000 years the same guilt and collective failure repeats itself.

In many places one can read that the problem is actually quite simple: The Jews stole the land from the Palestinians and therefore all problems are easy to solve: they must give back the land. The Jews and especially the Zionists claim: they received the land of Palestine from God and that they are the (only) chosen people from God and therefore they have the only true religion, to save humanity and the world.

I can prove with the Archetypes of the Soul and many dreams, that the Jewish people had their mission taken away from them by God already 2,000 years ago; and that "nobody that is part of the Jewish stream will get into Paradise" as for

example one dream showed. With this we also have the answer about the true Jewish religion.

What remains is a different problem: Some accuse the Jews and Zionists of wanting to gain complete world domination and financial domination via proxy-wars. There are over one hundred thousand Jews that operate as lobbyists and corporate managers throughout the world with Zionist delusion, so they say. This should be something that scientists, scholars and politicians should investigate and clarify using real facts in a transparent manner for the people.

One thing is proven: US politicians receive money from Israeli lobbies in exchange for securing Israel's interests. The Israeli lobby bribes practically every politician in the US Congress.

▪ **The United States of America diagnosed by an American Expert**

America is number one in divorce, drug addiction, debt, obesity, car thefts, murders and total crimes.

America has become a slothful, greedy, decadent nation that is exhibiting signs of advanced decay.

The United States has the highest incarceration rate.

The United States has largest total prison population.

The United States has the highest percentage of obese people.

The United States has the highest divorce rate.

The United States has the most hours of television watched per person each week.

The United States has the highest rate of illegal drug use.

There are more car thefts in the United States each year than anywhere else.

There are more reported rapes in the United States each year than anywhere else.

There are more reported murders in the United States each year than anywhere else.

There are more total crimes in the United States each year than anywhere else.

The United States has more police officers than anywhere else.

The United States spends much more on health care as a percentage of GDP than any other nation.

The United States has more people on pharmaceutical drugs than any other country.

The percentage of women taking antidepressants in America is higher than in any other country.

Americans have more student loan debt than anyone else.

The United States spends 7 times more on the military than any other nation on the planet does. In fact, U.S. military spending is greater than the military spending of China, Russia, Japan, India, and the rest of NATO combined.

The United States has far more foreign military bases than any other country does.

The U.S. has accumulated the biggest national debt that the world has ever seen and it is rapidly getting worse.

President Obama is being given the power to shut down the Internet for any reason he chooses.

The US Government now says it has the right to assassinate any American citizen they deem a "terrorist".

Under US law only the President can define who a "terrorist" is.

Under US law the President's defining of an American as a "terrorist" is not only secret but cannot be reviewed by any court.

Americans, only 5 percent of the world's population, are outraged if anyone tries to tell them that they don't have a divine right to levels of consumption that squander 25 percent of the world's energy.

▪ **9/11 Attacks**

The 9/11 attacks on the World Trade Center in New York is probably vivid in most people's memory. They say it was an act of terror, ordered by Osama Bin Laden, so they say.

Yet 3,000 scientists (!) in the USA put this into question: they say the events never occurred as they have been portrayed in the media and presented by politicians. They say the buildings could never have collapsed alone because of the airliners' impact. The buildings were "prepared" with special explosives on all floors in order to create the downfall. The whole scenery of those events was orchestrated by the secret service of the US (CIA) and Israel (Mossad).

The aim they say was to create a reason for war, to invade and occupy Iraq. This however is said to also be but a small element of the global plan for a "One World Order" of the capitalist coalition, including the occupation and possession of oil fields around the globe and the weakening of Russia, China and the whole Islamic world. The centres of operation are in Israel and the USA they say. A conspiracy? Simplified truth? Half truth? All lies? Or damn frightening facts? This should be something that scientists, scholars and politicians should investigate and clarify with real facts in a transparent manner for the people.

Nearly 3,000 of America's top scientists have called for a new investigation of 9/11 because the governments "official" story was found impossible to have happened.

Apollo 11 landing is a fake: has become one of the biggest cover-ups in the history of mankind.

Most of the big events of global importance are masterly planned and orchestrated by the Elite, by enormously powerful people, that do not belong to just one nation or one organization. Their roots go far back into the past.

▪ Terrorism

How many people died through terrorist attacks, orchestrated by Bin Laden, Al-Qaeda and other similar groups around the world? There were some 2,000 from the World Trade Center. To these can be added perhaps 1,000 deaths from individual terrorist attacks around the world. This does not include terrorist outrages in Iraq, given that these are understood as part of the war. We are perhaps talking about 4,000 deaths to date since 9/11. This adds up to approximately 400 victims per year or 33 per month. This is indeed a terrible tragedy, a miserable suffering for those left behind and obviously not justifiable.

But let us compare these figures with some other figures:

- Over 42,000 deaths from Road Traffic Accidents in Europe alone (every year).
- 380,000 deaths from fine dust (cars), in Europe alone (every year).
- Over 46,000 deaths from Road Traffic Accidents in America alone (every year).
- 400,000 deaths from fine dust (cars), in America alone (every year).
- Millions of deaths around the world due to contamination, also every year.
- 3-4 billion people living in poverty, so that 1,000 people can earn billions.

Do you understand? Something is not right here: The proportions are not comprehensible: Wars to fight terrorism with around 4,000 victims spread over 10 years, or 33 victims per month. At the same time trillions of dollars are spent of armament and all the wars since 9/11. These disproportions indicate extreme lies!

New martial laws have been created to control individuals as well as the flow of money in America and Europe, as well as other capitalistic countries: to protect against terrorism (they say). Fact is however, that these laws serve to absurdly x-ray every individual citizen and their life. Scanners that strip passengers visually naked are already standard and implemented in America. This will indeed damage tourism in Europe.

Denunciation has become not only the norm but is becoming a legal obligation. In the US waste collection industry around 30,000 people have allegedly been employed with the assignment of checking for suspicious items in the trash (from people's homes).

This clearly indicates that behind the facades politicians have prepared the foundations for dictatorship and for the event of continual re-cycling of war. All the

relevant facts need to be collected and presented to the citizens, in order to ask them, if this is something they really want and feel the need for.

▪ **Example Germany**

Life expectancy is increasing; society is growing older and older. Two thirds of the affected will be over 80 years old by 2030. Around 50 million people between the age of 20 and 64 count towards the work force. Experts forecast that with the decreasing birth rates this figure will drop by a whopping 17 million people.

Estimates suggest that by 2030 a million more people than today will be in need of care.

Nearly every sixth child in Germany is poor. In September 2010 1.72 million children under the age of 15 lived in a household that received unemployment benefits.

Many people in the work force in Germany have big problems with reading and writing. Around 14 per cent are so-called “functional analphabets” – they cannot write or read continuous texts. Around 4 per cent of the population is Analphabet in the stricter sense.

Around 7.5 million adults in Germany cannot read or write simple texts.

In Germany, those without a graduation, hardly have any chance to successfully integrate into the labor market... According to a recent study bad education and lacking training qualifications result in costs of billions of euros for the general public. Every year around 150,000 young people join the workforce without any qualifications.

No school, no apprenticeship. This logic is creating more and more problems in Germany. There are already nearly 1.5 million young people between the age of 20 and 29 years old without any formal qualifications. Their chances in the labor market are minute.

Out of the 1.484 million unskilled young people around 729,000 are women (49.1 per cent). Also in the vocational training family background and professional status of the parents extensively determines over success or failure. Children of parents who don't have schooling and professional backgrounds tend to follow the same path.

60 per cent of the unskilled youngsters have at least one parent without any school leaving certificate or professional qualifications. 17 per cent of youngsters aged 20 to 29 years old are considered unskilled.

Public debt rose to nearly two trillion euros in 2010. Federal government debt rose in 2010 by 22 per cent (230.3 billion euros) up to 1284 billion euros. German States had debts of 595.3 billion euros at the end of 2010. Municipal debt rose 4.9 per cent (5.6 billion euros) up to 119.4 billion euros.

▪ **Israel's Economy**

Israel's economy is booming from avocado, oranges, and some Dead Sea beauty products? They do not make cars; nor do they make electric or electronic appliances; they hardly manufacture consumer goods.

How can Israel be so rich? Israel may be rich because "out of the seven oligarchs who controlled 50% of Russia's economy during the 1990s, six were Jewish." During the last two decades, many Russian oligarchs have acquired Israeli citizenship. They also secured their dirty money by investing in the kosher financial haven; Wikileaks has revealed recently that "sources in the (Israeli) police estimate that Russian organised crime (Russian Mafia) has laundered as much as US \$10 billion through Israeli holdings."

Israel's economy is booming because mega swindlers have been channeling their money via Zionists and Israeli institutions for decades. Israel is also the fourth biggest weapon dealer on this planet.

Israel is also prosperous because it is caught out engaged in organ trafficking and organ harvesting. Increasingly, Israel seems to be nothing more than a humongous money laundering haven for Jewish oligarchs, swindlers, weapons dealers, organ traffickers, organised crime and blood diamond traders. In the Jewish state 18 families control 60% of the equity value of all companies in the land. Is there any international court or government in Europe, or in the United States, taking legal action?

Additionally to this we have to mention the trillions of DM, US-dollars and euros the State Israel received the last 60 years and the billions they receive every year from the United States and from Europe. What is the function of Mossad in the economic and political fields in Europe and in the U.S.?

There also must be a hidden economic reason of highest importance why, for example, every week or month a politician from the German Government or a personality of highest importance in the German society goes to Israel for reference or obeisance. The slaves need their own blind slaves: their folk.

▪ Political Messianism

3.2.2011: Obama's speech; he claims: the "leadership that made the U.S. (is) the light of the world. In other words: Obama claims the U.S. to be "the predestined nation, the only one that can save mankind". This implies that he is the new Messiah saving the world; and the U.S. is the chosen folk from God. "God bless the United States of America", he was saying; but I say: "God will not!"

Confucius: "Signs and symbols rule the world, neither words nor laws." Today we must say: Corporations rule the world and the politics, not politics. The meaning of signs and symbols of corporate groups dominate people. States have de facto converted into corporate groups. Their only creed is ultimately greed for money or of power, which is fueled by lust. In their agenda, they all have the complete destruction of all Archetypes of the Soul.

There are hundreds of thousands of CEOs, owners of corporate groups, politicians and religious leaders who have acted over decades with their megalomania, paternalism, extreme greed, stubbornness, sick narcissism, arrogance, falseness and scrupulousness, perversion, amorality and a religious psychosis or political lunacy.

The psychological and material question is always the same: Who is the profiteer of such mad politics and legal mendacity? Who is the profiteer of such governmental criminality “in the Name of the Creator and the Almighty God”?

▪ **Maturity of politicians**

The Defense Minister in Germany (May 2011) is a 39 year old attorney. The Foreign Minister is a homosexual, married to a man. Never can a 39 year old have the maturity, moral integrity, life experience and wisdom necessary for such a position. Age alone surely does not provide the wisdom and moral integrity. The life experiences alone neither. Homosexuality is a very complicated neurosis, marked by a disturbance in the balance of the male and female pole; also in a deep libido disorder to the mother and father. On top of that the use of the “Marriage” Archetype for a same-sex relationship is a desecration of the eternal “Marriage” Archetype.

In Spain there is a government minister who was born in 1971 and another in 1976; both are women. Never can a 35 or 40 year old person have the maturity, moral integrity, life experience, human knowledge, personal psychical-spiritual foundation, knowledge and skills to manage a government department with global perspectives, and the corresponding wisdom necessary for such a position.

The people should start to think about what relevant skills and psychical-spiritual preconditions (free from neurosis, psychosis and psychopathy) a person should have in order to be in a position of the highest political responsibility in order to carry out and manage in the interests of the people. This question should be asked around the world, regardless of culture or form of government. It is especially valid for church office holders (e.g. minister, priest, monk, bishop, cardinal, Pope) and for religious teachers of all kinds. In the future, those who violate the Archetypes of the Soul should never be allowed to fill top leadership positions in a society if humanity wants to have a good future!

▪ **For the people**

It has been clear for a long time now that the people in Europe and America feel that governments have long lost touch with the healthy and genuine needs of the people. The citizens say: governments and political leaders cheat, lie, twist and distort. They only act in their own interest. They are doing nothing against poverty in their own country. They are doing nothing for the long-term benefit of their citizens.

“Democracy” has been a hollow word for a long time. The oligarchy of the capitalistic financial markets has the power. The population merely serves for the exploitation for their “One World Order” aims. Nobody gets into the government without a lot of money or without being promoted by “important” personalities and institutions.

Politics serves those that have and want to have more. More recently politics serves the political and religious psychosis: For the new Christian-Evangelical-Zionist World Order. This also means: Against Islam. With this the people will once again have the never ending religious war at their doorstep like every few centuries. This is exciting for the Pope! It has been like this since 2,000 years. Religion abuses politics and politics abuses religion. Both in turn misuse the people. Who is the actual culprit here?

“Justice” today is in many democratic (and other) countries nothing but a lie. Laws protect political crimes, political corruption, political mendacity and hypocrisy.

When you look at the outcome, then you know what is wanted or approved. This is what the governments, and the politicians want and approve:

- The people are helpless.
- The people are ensnared.
- The people are lied to.
- The people are brainwashed.
- The people need to be blind.
- The people should shut up.
- The people should not think.
- The people are chained to credit.
- The people are allowed to buy a car.
- The people should suffer from emissions.
- The people must suffer in general.
- The people are allowed to have a cell phone.
- The people should lose themselves in the internet.
- The people are allowed to have fun.
- The people can speculate.
- The people should consume.
- The people should use credit cards.
- The people should be (relatively) poor.
- The people can have a swimming pool.
- The people can have a walkway.
- The people should feel lust when shopping.
- The people should go to the doctor.
- The people should go to the pharmacy.
- The people can go on holiday.
- The people cannot have a soul.
- The people should not ask questions.
- The people should see lies as the truth.
- The people should see neurosis as something healthy.
- The people should see lunacy as a mission.
- The people should experience narcissism as being.
- The people should get meaningless things for cheap.
- The people must adapt.
- The people who are critical need to go into psychotherapy.
- The people who do not follow the lunacy must be punished.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

16. The Lost Humanity

Jewish Power

Many writers speak about the Jewish power:

Most of the major events of world significance are masterfully planned and orchestrated by an elite coterie of enormously powerful people who are not of one nation, one ethnic grouping, or one overridingly important business group. They are a power unto themselves for whom those others work. Neither are these power elite of recent origin. Its roots go deep into the past.

The control of the US, and of global politics, by the wealthiest families of the planet is exercised in a powerful, profound and clandestine manner. This control began in Europe and has a continuity that can be traced back to the time when the bankers discovered it was more profitable to give loans to governments than to needy individuals.

These banking families and their subservient beneficiaries have come to own most major businesses over the two centuries during which they have secretly and increasingly organized themselves as controllers of governments worldwide and as arbiters of war and peace.

The US is controlled through the privately owned Federal Reserve, which in turn is controlled by the handful of banking families that established it by deception in the first place.

Here is a 'High Cabal' that has made US what it is... This "High Cabal" is the "One World Cabal" of today, also called the elite by various writers.

The elites own the media, banks, defense and oil industry. They own the US military, NATO, the Secret Service, the CIA, the Supreme Court, and many of the lower courts. They appear to control, either directly or indirectly, most of the state, country, and local law enforcement agencies.

1774 that Amschel Mayer Rothschild stated at a gathering of the twelve richest men of Prussia in Frankfurt: Wars should be directed so that the nations on both sides should be further in our debt.

The elites own numerous "think tanks" that work for expanding, consolidating and perpetuating its hold on the globe. The Royal Institute of International Affairs (RIIA), the Council on Foreign Relations (CFR), the Bilderberg Group, the Trilateral Commission, and many other similar organizations are all funded by the elite and work for it.

The Tavistock Institute on Human Relations, Shaping the Moral, Spiritual, Cultural, Political and Economic Decline of the United States of America, was established in 1913 at Wellington House, London for manipulation of public opinion.

The Tavistock Institute has a 6 billion dollar fund and 400 subsidiary organizations are under its control along with 3,000 think tanks, mostly in the USA.

The modern science of mass manipulation was born at Wellington House London.

Bernays was a nephew of Sigmund Freud, a fact never mentioned, and developed the technique of engineering consent.

Bernays "pioneered the use of psychology and other social sciences to shape and form public opinion so that the public thought such manufactured opinions were their own.

Absolute behavior control is imminent...

80% of US electronic and print media are owned by only six large corporations. The distortions, lies and fabrications, incessantly are pouring out of this media, a propaganda and brainwashing organ of the elite.

Who rules East Europe commands the Heartland: Who rules the Heartland commands the World-Island: Who commands the World-Island commands the world.

For America the chief geopolitical prize is Eurasia... About 75 percent of the world's people live in Eurasia... Eurasia accounts for about 60 percent of the world's GNP and about three fourths of the world's known energy resources.

For decades Israel has violated well established precepts of international law and defied numerous United Nations resolutions in its occupation of conquered lands, in extra-judicial killings, and in its repeated acts of military aggression.

For decades the US has provided Israel with crucial military, diplomatic and financial backing, including more than \$3 billion each year in aid.

Although Jews make up only about three percent of the US population, they wield immense power and influence - vastly more than any other ethnic or religious group.

Since the 1960s, Jews have come to wield considerable influence in American economic, cultural, intellectual and political life.

Jews played a central role in American finance during the 1980s, and they were among the chief beneficiaries of that decade's corporate mergers and reorganizations.

Though barely two percent of the (US) nation's population is Jewish, close to half its billionaires are Jews.

The chief executive officers of the three major television networks and the four largest film studios are Jews, as are the owners of the nation's largest newspaper chain and the most influential single newspaper, the New York Times.

Jewish economic influence and power are disproportionately concentrated in Hollywood, television, and in the news industry.

Jews alone had contributed 50 percent of the funds for [President Bill] Clinton's 1996 re-election campaign.

In a few key sectors of the media, notably among Hollywood studio executives, Jews are so numerically dominant that calling these businesses Jewish-controlled is little more than a statistical observation

They (Jews) are a major source of money for Democratic candidates.

Hollywood is run by Jews. It's owned by Jews.

The three most important groups pressing America into war (WW II) were the British, the Jews, and the Roosevelt administration.

Their greatest danger to this country lies in their large ownership and influence in our motion pictures, our press, our radio, and our government."

The Jewish-Zionist connection thoroughly pervades affluent financial, commercial, social, entertainment, and art circles.

Hardly a month goes by without a new TV production, a new film, a new drama, new books, prose or poetry, dealing with the subject, and the flood is increasing rather than abating.

Non-Jewish suffering simply does not merit comparable attention. Overshadowed in the focus on Jewish victimization are, for example, the tens of millions of victims of America's World War II ally, Stalinist Russia, along with the tens of millions of victims of China's Maoist regime, as well as the 12 to 14 million Germans, victims of the flight and expulsion of 1944-1949, of whom some two million lost their lives.

The well-financed Holocaust media and "educational" campaign is crucially important to the interests of Israel.

Organized Jewry has exploited the Nazi holocaust to deflect criticism of Israel's and its own morally indefensible policies

The Holocaust may yet turn out to be the 'greatest robbery in the history of mankind'.

I've never seen a President standing up to the Israelis. They always get what they want.

If the American people understood what a grip those people have got on our government, they would rise up in arms. Our citizens certainly don't have any idea what goes on.

Israel and Jewish organizations, in collaboration with this country's pro-Zionist Christian fundamentalist "amen corner," are prodding the United States - the world's foremost military and economic power - into new wars against Israel's enemies.

Jews wield immense power and influence in the United States. The Jewish-Zionist dominates the U.S. political system. The "Jewish lobby" is a decisive factor in US support for Israel.

Orchestrated 9/11 and Apollo landing from Jews (?):

An Insider speaks about the Illuminati Power:

"I was involved in the payment, in the direct payment in cash to a person who killed the president of a foreign country. I was in the meeting where it was decided to give this cash money to the killer... I know that certain people who are Bilderbergers were involved in such orders.... We had to pay on the instructions of foreign powers for the killing of persons who did not follow the orders of Bilderberg or the IMF or the World Bank for example.... the biggest banks in Switzerland are involved in unethical activities.... its trillions, completely unaudited, illegal and besides the tax... most of the directors of Swiss banks are not locals anymore, they are foreigners, mostly Anglo-Saxon, either American or British... they destroy our society and destroy the people world wide just for greed. They seek power and destroy whole countries, like Greece, Spain, Portugal or Ireland and Switzerland will be one of the last in line. And they use China as working slaves. And a person like Josef Ackermann, who is a Swiss citizen, is the top man at a German bank and he uses his power for greed and does not respect the common people. He has quite a few legal cases in Germany and also now in the States. He is a Bilderberger and does not care about Switzerland or any other country... They have huge amounts of money available and use it to destroy whole countries.... The real aim is to destroy Europe.... the big Swiss banks, because they are not Swiss anymore, most of them are lead by Americans.... a kind of exclusive elite club that has all the power and everybody else is impoverished and down.... The EU is under the iron grip of Bilderberg.... The big banks are training their staff with Anglo-Saxon values. They are training them to be greedy and ruthless. And greed is destroying Switzerland and everybody else... We are confronted with really ruthless criminals, also big war criminals. It's worse than genocide. They are ready and able to kill millions of people just to stay in power and in control.... Question: In the structure of Bilderberg, is there an inner circle that knows the plans and then there is the majority who just follow orders? Answer: Yes.... Bilderberg was founded by Prince Bernard, a former member of the SS and Nazi party and he also worked for IG Farben, who's subsidiary produced Cyclone B."

7.7.2011 - Hillary Clinton reviews Spanish government and applauds their servility. She said at the visit of President Zapatero and the King Don Carlos: "There is virtually no important global or military challenge that we are not working on together." Even before that visit, Trinidad Jiménez, Minister of Foreign Affairs cleared all possible doubt by stating that "close cooperation between the U.S. and Spain will be visible in the political, economic and military spheres." Zapatero and the King have sold Spain to the Illuminati – read: to America, means: to the Jews and

Zionists! No Spaniards can see it because no media and no responsible people are talking about it!

Everything, but really everything is hijacked by finance: The US, the dollar, the EU, the Euro, politics, political parties, media, military, IMF, bailouts, labor laws, judicial system, industry, globally operating corporate groups, shopping malls, etc. is all at the mercy of finance! And the owner and CEOs and managers of the finance are the Jews. The entire Western world is in the grip of the Jews for the sake of their religious psychosis, partly only as a false pretenses to hide their psychopathy. Their power has been built up the last 150-180 years. They are the hidden wirepuller of WW I and WW II. And they are the hidden wirepuller of the imminent WW III.

But what are their true primordial motives? Sexual frustration? Psychopathy? Megalomania? Narcissism? Madness? Religious Psychosis? The roots of all their inner conflicts lie in their failure 2000 years ago! At that time they have lost their status as "chosen folk from God". They have roped in the entire world into their collective unconscious conflict, burdened themselves increasingly with immense guilt and inner pain.

They will never get forgiveness, redemption and salvation without me, the RC! RCIGI clarifies it with the "Conference-Seminar". <http://www.rcigi.com/century-enlightenment/>

▪ Lies and more lies

Everywhere around the world there are far too many lies and liars, far too much falseness, fakeness, stubbornness, sadism and a complete lack of respect as well as lunacy, unscrupulousness, arrogance and ignorance.

There are far too many people that poison everything with their amorality, perversion, greed, megalomania, dogmatism, fundamentalism and their religious psychosis.

Everywhere you go people are brainwashed and manipulated, exploited like slaves and defrauded with spiritual labyrinths. They are all treated like a soulless human bio-mass. Most of the time this makes the select more powerful and wealthier as the bulk of the people gets poorer and more disenfranchised.

Far too many people live with facades and masks, twisting and distorting reality. They are mere copies of the Zeitgeist. They make empty promises and assurances. They do everything in their power to undermine justice and the truth.

Many even think that they can actually solve the problems of the local population with money. Political and military power must enable solutions. Often it is religious psychosis that gives them the drive.

The truth was lost a long time ago! Nobody wants it anymore. The truth no longer has any "power". This is the triumph of pathogenic narcissism, political and religious psychosis, lies and perversion, and last but not least also of the stupidity of the people! Nobody can find their way out of this maze.

Truth and a good personality do not exist without the psychical-spiritual formation and respect for the Archetypes of the Soul.

▪ **Barbarity**

Many places on this earth have become soulless:

- No love
- No hope
- No trust
- No faith
- No truth
- No honesty
- No fairness
- No business morale
- No service quality
- No balanced prices
- No disposition to learn and change
- No environmental protection
- No hygiene control
- No efficient and professional skills
- No interest to learn for love and business
- No interest for personal psychical-spiritual formation
- No respect for the genuine inner needs
- No leisure offers for the soul and for creativity
- No respect for the Archetypes of the Soul
- No love with the inner Spirit

Certainly there are exceptions in individuals and business.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

17. Archetypes of the Soul

▪ Main pillars

- A life with love, truth, honesty, happiness and truthfulness.
- Authentic satisfaction and fulfillment of the genuine inner needs.
- Understanding oneself, one's behavior and life, and other people.
- Efficiency with knowledge and skills to deal with life.
- Being free of biographical burdens and unconscious complexes.
- Authentic, integral, self-realized and strong personalities.
- Ideals, norms, values, and rules that are constructive towards life.
- Capability to understand and constructively manage feelings.
- Living sexual needs and longing for affection with love.
- Solving difficulties, crises, problems and conflicts for peace.
- Outstanding self-management that provides a strong self-confidence.
- Correctly interpreting dreams and meditating provides the best development.
- Preparing a happy relationship and family life with education.
- Elaborating quality of life with thorough and networked thinking.
- Living the meaning of the Archetype "Marriage", leads to complete fulfillment.
- Meaning of life, anchored within, centered in the inner Spirit.
- Environment and business world for the soul of people.
- An all-encompassing positive life philosophy for living and growing.

▪ Archetypes

The Archetypes of the Soul are the highest orientation for humanity and humaneness, for religion, spirituality, politics, economy, industry and education. With approximately 2,000-3,000 dreams about the Archetypal processes of the Soul, I do know what I am talking about here:

- The complete acceptance of the inner life and the dedication towards it.
- The discovery and formation of psychical forces and functions.
- The formation and living of the genuine inner self through conscious formation.
- The integration of the inner Spirit as a guiding power (Dreams, meditation).
- Carrying out the process of "dying and rebirth" (renewal).
- The development of the unification with the inner opposite gender pole.
- Integrating the spiritual principles in ethics, behavior and meaning of life.
- Bringing the inner and outer world into a balance, anchored within.
- Achieving the fulfillment of wholeness and completeness (Individuation).

Individuation is complete with these Archetypal Processes of the Soul. Higher levels of psychical-spiritual developments are for special spiritual vocations, acts and are the authority that stands above all religions and political institutions.

The Archetypal experiences express themselves in dreams and are the result of spiritual, psychical, theoretical, meditative and practical processes, including a lot of experience and learning about life, human beings, societies, cultures, humanity and the state of the earth:

- Experiencing God and his manifoldness
- Experiencing (receiving) the bond with God
- Receiving a specific designation at the service of God (e.g. Priest, spiritual leader, highest teacher of the Archetypes of the Soul)
- Experiencing the transcendental World of the Souls
- Receiving the designation of being a representative of a Prophet or Messiah
- Receiving the permission to further develop the spiritual concepts
- Receiving the mission of being Prophet or Messiah
- Receiving all the spiritual power of attorney from God to judge all Souls*

* Until this day, this has not been given in the whole history of mankind.

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

18. Solutions for Humanity

The disaster of collective failure

- 2.2-2.4 billion Christians failed.
 - 1.5-1.8 billion Muslims failed.
 - Other religions also failed.
 - All kind of spiritual teaching failed.
 - Over one billion atheists failed.
 - Millions of politicians failed.
 - Millions of public schools failed.
 - Most academic education failed.
 - Millions of media outlets failed.
 - Millions of CEOs and managers failed.
 - More than a billion parents failed.
- The Mission of Buddha and other Asian masters of wisdom could not provide a breakthrough. The people have failed!
- The chosen Jewish folk could not provide a breakthrough. They already failed 2,000 years-ago and lost their “chosen status“!
- The Mission of Jesus Christ and the Prophet Mohammed could not provide a breakthrough. The people have failed!
- An estimated one hundred thousand wise masters since 3,000 years could not provide a breakthrough. The people have failed!
- More than 6.5 billion people are brainwashed and deformed in their soul. They are trapped in dark psychical and spiritual labyrinths, in pathogenic narcissism, in neurosis and psychopathy, in obsession and greed, in lies and falseness, in political and religious psychosis, in stupidity, in arrogance and ignorance. Like this they will never find a real solution for humanity and the planet! They fail and will continue failing!

This collective failure is an unbelievable disgrace in front of humanity and God!

▪ The Prophecy

Today is the “Kairos” for the Millennium prophecy because:

- Fame, power and fortune have corrupt most innocent souls.
- Perversion has become main stream.
- Lunacy attracts admiration.
- Hope is abused.
- Courage is raped.
- Individuality is slaughtered.
- Money is the lure spirit.
- Religious psychosis has replaced the genuine spiritual inner path.
- The truth has lost; Lies have taken its place.
- The true good has lost; it can never win by itself.

- Love has lost; People are rotten to their innermost core.
- The Spirit of God, who speaks through dreams, barely stands a chance anymore.
- All Archetypes of the Soul have been raped, abused, and completely destroyed.

With around 12,000 dreams since over 30 years about human beings, the state of humanity and the earth, about politics, economy, war preparations and religion, I know very well how horrifying the facts about the state of humanity and the earth really are.

On the 14.08.2010 I dreamt: "In 35-40 years everything will be over, the end, no more earth and no more humanity."

In 2008 I dreamt: "Humanity has 10 years left to take drastic measure". Today, 2011, Humanity has 7 years left!

▪ Practical Problem

One problem to even begin discussing solutions is the completely pompous and stubborn state administration. As the supreme authority politicians and especially government members are all rigid in defensiveness and focused on ego, power and greed. There are many local, regional and national members of government that enormously enrich themselves on the goods and possessions of the people. They mispend and misallocate huge tax incomes. But they do nothing, really absolutely nothing that in consideration of the global disaster would actually be needed. They have no interest to live or promote the Archetypes of the Soul.

Many governments have racked up horrendous debt and mispent finances: for the 'Big War' and the 'One World Order' of the capitalistic coalition! They are also responsible for wars, unrest, poverty, financial crises, high unemployment, climate change, contamination and the man-made catastrophes of all kinds over the past 20 years. The following generations will have to pay for this even with their blood. Indeed it is odd that the people around the world actually put up with this.

Most people cannot identify and recognise the infantile ties they have to their mother and father, or the bond to the church and the Bible. They don't want to learn anything about themselves or about life. They approvingly swallow the monstrous lies and illusions because they themselves want to live lies and illusions. Political responsibility isn't something they are interested in. They actually don't want any responsibility whatsoever, not even for themselves or their own life.

If you don't want to change yourself then you don't deserve anything better than those incompetent and unscrupulous politicians and in 35-40 years the "end".

The modern Titanic of today already has horrifying leaks and is driving towards the Abyss at unstoppable speed. The millions of well-off, rich and super rich, the millionaires and billionaires around the world cannot be so incredibly stupid to believe they will survive in their suite on the Titanic? Or can they?

With regards to the tragedy of the "unsinkable" Titanic one thing must be made clear: Only the captain was responsible for the sinking of the Titanic! Consequence: The

captains around the world are the biggest problem: They do not recognise the danger of such a downfall. Or they simply don't want to take any efficient measures against it because it could damage their career. Then there are those who with perverted lust are wishing for this danger and ultimately even provoking this downfall. They are abusing their power for their lunacy obsessed "One World Order" or out of personal frustration (Love, Happiness, Sex, and Fulfillment).

One has to take away all the power from these doomed captains without long discussions. With all legal means, one has to defy their orders, which are based on their pathogenic narcissism, their power obsession, their megalomania, their religious psychosis and their devilish messianism.

The word "legal" in this context however also poses delicate questions; for example: What should be done, when the people are not able to get rid of their tyrants, their incompetent, amoral, greedy, perverse leaders and politicians? The problem goes both for the people as well as for the police, the secret service and the military. Without a global collective solidarity for the Archetypes of the Soul there will be no breakthrough towards a new paradisiacal era with love and the inner Spirit. Intelligent and rational thinking are essential, but are never enough for solutions! The truth remains above the law!

Despite the massive defensive bulwarks set up against solutions there is hope: The creative potential in the soul of the people, especially when utilized with the inner Spirit and the collective execution of the Archetypes of the Soul, will make solutions for humanity and the earth possible; solutions, that today nobody can even begin to imagine. For that we first need collective conscious formation about the truth.

- There are no solutions without the truth!
- There are no solutions with old-fashioned ways of thinking, with dogmas and ideologies, with power and violence, with ignorance and arrogance, with megalomania and religious psychosis.
- There are no solutions without regard for the genuine inner and world needs of the people – and this around the globe.
- There are no solutions without networking in a global and future-oriented perspective.
- There are no solutions without a new education and without a new understanding about human beings.
- Ultimately there are no solutions without the Archetypes of the Soul, whether for superlative holiday resorts nor for humanity as a whole!

Those who do not want to make the Archetypes of the Soul vivid with enormous effort and struggle will not get in to Paradise, guaranteed!

The big majority of humanity needs to declare: “I confirm the willingness, to live and work within the truth and the Archetypes of the Soul, and to respect these in full extent.” This is: Living in the truth!

Additionally it must be said that there is never practical success without education, skills, understanding, communication, co-operation, clarification, creative development of ideas, and adaptation to local (cultural) singularities, will power and assertiveness. The solutions are without a doubt extremely challenging.

Seen like this: It is about “all or nothing” and about “evolution or downfall” for the powerful, the rich, the normal earners and for the poor. Who would not want the breakthrough to hope and bring solutions for humanity without political and religious lies?

Do the people really not want to live with the truth? Do the people really not want to protect the truth to save humanity and the earth? Do the people perhaps want to “crush”, “destroy” and “eliminate” or even “kill” the Archetypes of the Soul and the inner Spirit?

You decide: Armageddon or Catharsis and Renewal!

The Indictment of Humanity:

- You are charged with the destruction of the planet and humanity.
- You are charged with the extremely greedy misuse of all resources.
- You are charged with the intended perversion of the truth.
- You are charged with the malicious brainwashing of human beings.
- You are charged with the misuse of power or the assistance thereof.
- You are charged with the refusal of the psychical-spiritual evolution.
- You are charged with the complete destruction of the Archetypes of the Soul.

Those found guilty will be punished with 500–50,000 years of “being far from God and his light”.

▪ **The Start of the Solutions**

There are solutions! With over 3,000 dreams about all Archetypes of the Soul, about God, about the spiritual world, about the true source of religion, and about the sick psychical-spiritual life of the people I am 100% certain that I have the only possible solution. These dreams have formed the biggest mission of all times. Without the slightest doubt this is the mission for humanity. In a dream I spoke to humanity and told them: “I did not come here to this earth from millions of light years away to play the idiot!”

What are the possible solutions?

- The Natural Laws of the Chaos Theory?

- Millionaires and Billionaires together with Financial Power?
- Corporate Groups with Industrial and Economic Developments?
- Western Democracy with its Politics, Politicians and Values?

The United Nations has completely failed. It is rotten to the core. It is misused and abused by a select few self serving super powers and never really respected. Humanity needs an alternative to the UN: The “**Free Nations**”. The preliminary outline is lying on my table. The ethical and spiritual authority is me, clearly given by the above reasons.

▪ **The Prophetic Millennium Mission**

You want a new world, a good future for yourself, for your loved ones, for the young generation today and for the coming generations, for humanity and the planet as a whole. Therefore, forget your “bunker” mentality and get rid of your stubbornness.

Do something for the biggest and most demanding mission of all times! Find people who want to show their solidarity for this mission! The internet offers you practically unlimited possibilities. Do something now for the millennium mission!

I want 500 million people to systematically demonstrate for the millennium mission, up until the breakthrough to a new era! At the same time everyone must

fundamentally reconstruct their life with the book "Management of Knowledge"; everyone in their own way, with their own priorities and free forms of expression.

My archetypal and prophetic dreams and all the current facts and figures to the state of humanity and the earth show a clear overall picture that is unmistakable: In 35-40 years everything is over, the end, over and out with humanity and the earth. You and all other people have got 7 years left to take drastic measures! Begin now; otherwise your soul will spend 50,000 years far away from God and his light, before you can then start again as a pre-hominid on another planet. This is how a prophetic dream unveiled this to me. Given the acute danger for humanity and the earth, if necessary, I will not hesitate to ask God for permission, to increase the punishment to 200,000 years. This should be enough time, to look at and bear oneself everyday to learn for a new project of the psychical-spiritual evolution on another planet.

Live the Archetypes of the Soul! Renew yourself! Reconstruct your life! Form and live your new life! And everything will become new! If and when 500 million people live with their inner Spirit and the power of love, then a breakthrough to a new and promising era will be given. The complete global renovation will take 35-40 years. Then I will bestow upon all renewed souls the Paradise!

Sent by God and agreed in the name of all prophets and wise men from the history of mankind. Sealed fate with all powers of attorney.

July 2011

Dr. Edward Schellhammer, RC

Founder of the RC Institute for Global Individuation

<p>Regardless of how you want to react to my mission, first consider the following: If you do not want my mission or even intend to harm me or damage me in any way or even kill me, you will lose the earth! If you harm my son, or even kill him you will lose a quarter of the earth! If you harm my future wife, or even kill her you will lose a quarter of the earth! I have all the powers of attorney, to impose the harshest punishments in the interest of the future of humanity and the planet.</p>
